Find Joy in the Beauty and Wonder of Birds Birding is among the most popular outdoor activities—especially in California, where hundreds of different bird species can be seen and observed. Now is the perfect time to join the fun and let our feathered friends astonish and inspire you. Award-winning author, naturalist, and wildlife photographer Stan Tekiela has written the best-selling bird identification guides for almost every state. In Stan Tekiela's *Birding for Beginners: California*, he provides the information you need to become a skilled birder in the Golden State. The first section of the book presents "how to" information. Learn the basics of bird feeders. Get to know your birdseed. Create a bird-friendly yard—and even make your own bird food with do-it-yourself recipes. The book's second section is an identification guide, featuring 63 California birds that are most likely to be seen at your backyard feeder or near your home. The species are organized by color, making it simple to identify what you see. If you spot a yellow bird, go to the yellow section to discover what it is. Each bird gets a full-page photograph with notations about key field marks, or identification characteristics. The full-color photos are paired with information ranging from the bird's nest and eggs to favorite foods, as well as Stan's fascinating naturalist notes. Give birding a try, and get started with the guidance of an expert. You'll be amazed by how much joy birds can bring, and you'll have a lifetime to enjoy them.

This updated field guide, organized by color, features full-color photographs and information to help readers quickly and easily identify the Alabama birds they see.

Hear the songs and learn about 12 of North America's woodland birds. Being able to identify a bird's song is a skill that brings joy and fosters an appreciation of nature. Some bird songs are distinctive and easily recognized, like the common loon and wild turkey. Hawks as a group are distinctive but the individual species vary, as do the owls. Picking up the songs of a Black-capped Chickadee and a White-breasted Nuthatch, however, is not easy. That is where this enchanting book comes into its own. The Little Book of Woodland Bird Songs features recordings of twelve bird songs from some of the best-known woodland species seen and heard in North America. It is an interactive board book that is ideal for curious young readers. The sturdy pages are easy to turn and the twelve song buttons, each with a portrait of the bird, are easy to activate. The high-quality sound module is encased in durable plastic and the one-inch (3-cm) speaker makes it easy to hear and differentiate the elements of the bird's song, such as pitch, tempo and trills. Beautiful lifelike illustrations aid in identifying the birds and a descriptive paragraph and facts panel provide information such as the time of day the bird is likely to sing, what it eats, behavior traits and how it constructs its nest. All twelve birds have winter or summer ranges in the United States or Canada. This means that readers are sure to see most if not all the birds in at least one season over the year. Red Crossbill Sharp-shinned Hawk Hermit Thrush Blue-gray Gnatcatcher Black-capped Chickadee Purple Finch Common Loon Barred Owl Red-eyed Vireo Wild Turkey White-breasted Nuthatch Downy Woodpecker. Birds can be hard to spot at the best of times and never more so than in the woods. Once you learn to recognize these bird sounds, a walk through the forest will never be the same. This partner to The Little Book of Backyard Bird Songs is sure to become another family favorite.

New York City 's favorite naturalist returns with a guided tour of the beautiful birds living in the five boroughs. Look around New York, and you ' ll probably see birds: wood ducks swimming in Queens, a stalking black-crowned night-heron in Brooklyn, great horned owls perching in the Bronx, warblers feeding in Central Park, or Staten Island ' s purple martins flying to and fro. You might spot hawks and falcons nesting on

skyscrapers or robins belting out songs from trees along the street. America's largest metropolis teems with birdlife in part because it sits within the great Atlantic flyway where migratory birds travel seasonally between north and south. The Big Apple's miles of coastline, magnificent parks, and millions of trees attract dozens of migrating species every year and are also home year-round to scores of resident birds. There is no better way to identify and learn about New York's birds than with this comprehensive field guide from New York City naturalist Leslie Day. Her book will quickly teach you what each species looks like, where they build their nests, what they eat, the sounds of their songs, what time of year they appear in the city, the shapes and colors of their eggs, and where in the five boroughs you can find them—which is often in the neighborhood you call home. The hundreds of stunning photographs by Beth Bergman and gorgeous illustrations by Trudy Smoke will help you identify the ninety avian species commonly seen in New York. Once you enter the world of the city's birds, life in the great metropolis will never look the same. " ' Take this guide wherever you go, ' [Day] implores readers in the introduction. And we hope many do, since it reveals a New York we long to see, the wild, beautiful city of birds known to Audubon, Chapman, and Griscom. " —Chuck Hagner, *BirdWatching Magazine* " An excellent guide for New York City residents. If you have any interest in the birds around you (and there are plenty of birds around you, even in NYC), this guide will really open your eyes. " —Birder's Library " Day's deeply researched and richly illustrated Field Guide to the Neighborhood Birds of New York City will be indispensable to locals and tourists alike. " —Sierra " Will fill a niche for beginning birders and backyard watchers in the northeastern U.S. " —Choice " You don't have to live in or be visiting New York to enjoy this book. " —Times Literary Supplement (UK)

From the editor of the nation's premier birding magazine, a no-nonsense, no-fluff quick guide to the birds you see every day. Of all the classic American pastimes, perhaps none is as widely accessible as watching birds. Our unusually vast, diverse environmental landscape supports fascinating species and variations exclusive to each region of the country. But while birders often spend their efforts in search of the rarest creatures, some of the most beautiful and intriguing birds are the ones that frequent our backyards (or nearby) daily. For that reason, where other, larger volumes focus on bird types that the casual observer is never likely to encounter, *Midwestern Birds* concisely celebrates those species living under our very noses. Written by Bill Thompson III, the editor and co-publisher of *Bird Watcher's Digest*, this portable 5"x8" book contains the same variety of entertaining and informative entries that make *Bird Watcher's Digest* the nation's most popular birding magazine. Inside, you'll find profiles of the 55 most common birds in the Midwest, complete with large color photos, gender-specific physical descriptions, nesting and feeding information, bird call particulars, and interesting stories about each species. Thompson also introduces the reader to the basics of bird watching: essential gear, bird-friendly food and plantings, housing tips, and observational techniques. This guide covers Indiana, Ohio, Iowa, Illinois, Michigan, Wisconsin, Minnesota, Kentucky, Missouri, Arkansas, Kansas, Oklahoma, Nebraska, North Dakota, and South Dakota. National bestselling book: Featured on Midwest, Mountain Plains, New Atlantic, Northern, Pacific Northwest and Southern Regional Indie Bestseller Lists Perfect book for the birder and anti-birder alike A humorous look at 50 common North American dumb birds: For those who have a disdain for birds or bird lovers with a sense of humor, this snarky, illustrated handbook is equal parts profane, funny, and—let's face it—true. Featuring common North American birds, such as the White-Breasted Butt Nugget and the Goddamned Canada Goose (or White-Breasted Nuthatch and Canada Goose for the layperson), Matt Kracht identifies all the idiots in your backyard and details exactly why they suck with humorous, yet angry, ink drawings. With *The Field Guide to Dumb Birds of North America*, you won't need to wonder what all that racket is anymore! • Each entry is accompanied by facts about a bird's (annoying) call, its (dumb) migratory pattern, its (downright tacky) markings, and more. • The essential guide to all things wings with migratory maps, tips for birding, musings on the avian population, and the ethics of birdwatching. • Matt Kracht is an amateur birder, writer, and illustrator who enjoys creating books that celebrate the humor inherent in life's absurdities. Based in Seattle, he enjoys gazing out the window at the beautiful waters of Puget Sound and making fun of birds. "There are loads of books out there for bird lovers, but until now, nothing for those that love to hate birds. *The Field Guide to Dumb Birds of North America* fills the void, packed with snarky illustrations that chastise the flying animals in a funny, profane way. " – *Uncrate* A humorous animal book with 50 common North American birds for people who love birds and also those who love to hate birds • A perfect coffee table or bar top conversation-starting book • Makes a great Mother's Day, Father's Day, birthday, or retirement gift
