Managing Stress: Principles and Strategies for Health and Well-Being

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

TESOL and the Cult of Speed in the Age of Neoliberal Mobility argues that because the nexus between TESOL and the cult of speed in an age of increased neoliberal mobility has not yet been explicitly unpacked, discussed, identified and theorized, the implications of this socio-economic phenomenon for TESOL policies, curricula, pedagogies and practices have been overlooked.

Through the presentation of several qualitative case studies, the book illustrates the social dynamics of speed and its key aspects (i.e., the materiality and the politics of time) in different TESOL contexts, including Saudi Arabia, the USA and Canada. The aim in presenting these diverse case studies was to craft a collection of responses, which, when put together, could offer new insights into the TESOL academic community. The book examines the ways in which the cult of speed has been envisioned, celebrated, negotiated with, enacted and justified by the various actors within the contemporary field of TESOL. It also investigates the new language teaching practices and forms the cult of speed in TESOL has generated and is generating. TESOL and the Cult of Speed in the Age of Neoliberal Mobility will be of interest to TESOL/applied linguistics educators, students, policy makers, administrators, employers and the wider community, and it is hoped will give them ideas about how to deal with today's culture of fast movement in the globalized higher education landscape.

Covers various trends in supply chain and logistics management, transportation, just in time delivery, warehousing, distribution, inter modal shipment systems, logistics services, purchasing and advanced technologies such as RFID. This book includes one page profiles of transportation, supply chain and logistics industry firms.

In this fresh list, Stephen James O'Meara presents 109 new objects for stargazers to observe. The Secret Deep list contains many exceptional objects, including a planetary nebula whose last thermal pulse produced a circumstellar shell similar to the one expected in the final days of our Sun's life; a piece of the only supernova remnant known visible to the unaided eye; the flattest galaxy known; the largest edge-on galaxy in the heavens; the brightest quasar; and the companion star to one of the first black hole candidates ever discovered. Each object is accompanied by beautiful photographs and sketches, original finder charts, visual histories and up-to-date astrophysical information to enrich the observing experience. Featuring galaxies, clusters and nebulae not covered in other Deep-Sky Companions books, this is a wonderful addition to the series and an essential guide for any deep-sky observer"

This text is aimed at defining the current concepts that define trauma induced coagulopathy by critically analyzing the most up-to-date studies from a clinical and basic science perspective. It wi

for any clinician interested in reviewing the pathophysiology, diagnosis, and management of the coagulopathic trauma patient, and the data that supports it. By meticulously describing the methods as well as state of the art coagulation assays the reader will have full understanding of the tests that are used to study trauma induced coagulopathy. The evolving use of blood products as well as hemostatic medications are reviewed in detail. Trauma Induced Coagulopathy will also be a valuable source for quick reference to the clinician that is faced with specific clinical challenges when needed. This book introduces the reader to fundamentals of engine combustion processes and pollutant formation. Combustion thermodynamics, conceptual and thermodynamic engine combustion models for a cylinder, the conventional and advanced combustion systems such as for DISC, CAI, and HCCI engines are discussed. For a wider coverage on the subject, emission measurement alternative procedures are included in this text. Laser based and other combustion diagnostic techniques are outlined to introduce readers to modern combustion research methods. The book attempts to present theoretical concepts including the latest developments in engine and emission control technology.

MATCHING SUPPLY WITH DEMAND by Cachon and Terwiesch is the most authoritative, cutting-edge book for operations management MBAs. The book demands rigorous analysis on the part of students requiring consistent use of sophisticated mathematical modeling to perform it. When the use of quantitative tools or formal modeling is indicated, it is only to perform the necessary analysis needed for a practical business solution.

Longlisted, Man Booker International Prize, 2018 Six-time Winner of the China Times Open Book Award and 'Author of the Year', Eslite Bookstore A writer embarks on an epic quest in search of his missing father's stolen bicycle and soon finds himself caught up in the strangely intertwined stories of Lin Wang, the oldest elephant who ever lived, the soldiers who fought in the jungles of South-East Asia during the Second World War and the secret worlds of the butterfly handicraft makers and antique bicycle fanatics of Taiwan. The Stolen Bicycle is both a majestic historical novel and a profound, startlingly intimate meditation on memory, family and home. Award-winning novelist Wu Ming-Yi is also an artist, designer, photographer, literary professor, butterfly scholar, environmental activist, traveller and blogger, and is widely considered the leading writer of his generation in his native Taiwan. A long-time resident of Taipei, Darryl Sterk has interests in Taiwan's local literature and indigenous cultures. He translated the first of Wu Ming-Yi's novels to be published in English, The Man with the Compound Eyes. Taiwan Literary Award, 2015 (Taiwan) China Times Open Book Award (Six-time winner, including 2015) (Taiwan) Eslite Bookseller Award for Author of the Year, 2015 (Taiwan) Dream of the Red Chamber Award, Judge Recommendation 2016 (Hong Kong) UDN Grand Literary Award, 2016 (Taiwan) Publishers Weekly International Hot Book Properties, 2015 Turnaround Favourite Fiction of 2017 'A work of astonishing energy, in which Wu beautifully touches on loss, life and death, fate and destiny, establishing emotional connections between memory and objects, and between the natural world and war... a novel that provides comfort and reconciliation from a wounded past.' Thinking Taiwan 'The novel, inspired by his love for bicycles and Taiwanese history, brings readers back to a simpler time when life moved more slowly and people spent more time face-to-face with friends and neighbors. Riding a bike allowed people to appreciate and digest the details of the world around them.' Taipei Times 'A profoundly moving novel, such is the power of words and depth of feeling by Taiwanese author Wu Ming-Yi...He turns events into linguistic gold with his poetic, dreamlike language.' Good Reading 'A visionary ride through flame-scorched lands and machine-clutching trees and metamorphoses into metal and earth...' World is crazier and more of it than we think,/Incorrigibly plural', Louis MacNeice wrote...Multiply that by 10 or so and you get some sense of Wu's astonishing, often-affecting kaleidoscope.' NZ Listener 'Unusual insights and vividly observed detail abound in this witty and sensitive story.' Toowoomba Chronicle 'Beautifully written and beautifully translated. . . . [Ming-Yi] guides us to see the entirety of experience as bumping flotsam in an unending ocean of life colliding and making a mess of things or making something new. . . . Lyric, simple, soft, the story crests and recedes and comes back again.' The Bloomington Sun-Current 'Offering a heady dose of realism, surrealism, and magic realism, with several shots of allegory, award-winning Chinese author Wu [Ming-Yi] offers a work for 'literary fiction' readers, but not in the snobbish sense. It's really for any curious, intelligent reader.' STARRED review, Library Journal 'The authors uses conversation, flashbacks of memory, war diaries, memoir and voice recordings to create a network of literary tributaries in bringing together this ambitious, far-reaching narrative that touches so many unique aspects of Taiwan's history, culture, development and influences.' Globalization is about Americans outsourcing product development and services to other countries. Globality is the next step, where rapidly developing economies from around the world are now competing with us head to head. The authors present a strong case that the economic climate in which we have lived is going to change in unprecedented ways. "...their insights into the competitive battle in emerging markets are so keen." -William J. Holstein of The New York Times "Many American chief executives, it turns out, are aiming at emerging markets...And they will find many insights into prevailing in those battles in this book." -William J. Holstein of The New York Times "...for any corporate strategist pondering the challenges and opportunities of globalization, this book is an indispensable guide." -John Cummings of Business Finance "While the global economy has been a hot topic for at least two decades, it is in constant need of updating ...GLOBALITY...does the job nicely." - BNET "[This] vividly detailed tome describes the latest shift in globalization from a one-way street of Western domination to an increasingly competitive global playing field, where businesses from once-discounted nations are solidifying their standing." - CIO Insight "Whatever the next New World Order turns out to be, the advice in GLOBALITY will come in useful, for multinationals and individual workers alike." -Business Pundit "A smart discourse on how local companies in developing economies, such as China, India and Brazil, are bucking tradition and going for broke on their own terms..." -BNET "This book is a must-read for leaders of companies in the developed world who want to get into the globality act and stay in it." - Cecil Johnson, McClatchy-Tribune News "Get ready for a new wave of challengers, 'bursting their way onto the big stage.' So say the three authors of this smart

analysis about the latest developments in global competition" - Andrea Sachs of TIME

While living in Tudor England wasn't a picnic for many people, the unluckiest were at the top of the social ladder—queens. Henry VIII was one of the Tudor kings and he famously divorced and killed many of his queens in his quest for a male heir. That's not all that happened during the Tudors' reign! Readers learn about the place of rebellions, the plague, and even the use of leeches in the history of England. A colorful layout, playful tone, and relatable content keep readers engaged with a distinctive historic era.

Childhood trauma and abuse have repercussions that can last a lifetime, interfering with our ability to trust, hope, and love, forever casting a shadow over our perception of the world ... and of ourselves.

What's worse is that so many people will spend their entire lives suffering in silence, afraid, ashamed, and feeling alone even when surrounded by family or friends. Nuta Miller was one of those people for most of her life. Having suffered horribly at the hands of her mother and step-father, she felt desperately alone-helpless and voiceless. Fortunately, prior to those abusive years, her grandparents had instilled in her a strong foundation of love and generosity, and a deep and abiding faith that helped her to survive. With their support, she was able to recognize and embrace the blessings that inevitably came her way. So she was able to become the sort of mother and protector for her own children that she wished she'd had herself. Though everyone's story is different, by sharing we exemplify the road to recovery for others to follow. Offering hope and perseverance, Resurrection of Innocence hopes to show that we are never truly alone.

Managing Stress, Seventh Edition, provides a comprehensive approach to stress management honoring the integration, balance, and harmony of mind, body, spirit, and emotions. The holistic approach taken by internationally acclaimed lecturer and author Brian Luke Seaward gently guides the reader to greater levels of mental, emotional, physical, and spiritual well-being by emphasizing the importance of mind-body-spirit unity. Referred to as the "authority on stress management" by students and professionals, this book gives students the tools needed to identify and manage stress while teaching them how to strive for health and balance.

One of the foundations of civilization as we know it is the ability to make and transport fire. Ever since our cave-dwelling ancestors rubbed sticks and stones together, humankind has pursued a quest for an efficient and reliable fire-making device - a quest that has inspired some of the most innovative inventions in history. The Legend of the Lighter traces this fascinating journey from the fire steels of the ancient world to the tinderboxes of the seventeenth century up to the modern cigarette lighter, which is featured here in an astonishing variety of designs. Drawn from the unparalleled collection of the Dutch Lighter Museum Foundation, the numerous unique, distinctive, and whimsical lighters reproduced here chart the voyage of the lighter from an important scientific discovery to a treasured collector's item. Along the way, we learn about the history of the pipe, the popularization of smoking, and the growth of today's global marketplace, as well as other significant events and wondrous inventions that have played a role in the history of the lighter.

The problems of the patellofemoral joint remain a challenge to the orthopaedic surgeon. In spite of many articles in scientific journals, an outstanding monograph, and several excellent textbook chapters, the patella is still an enigma in many respects. The etiology of patellar pain is controversial, and there is no completely satisfying explanation for its cause or its relationship to chondromalacia. Curiously, neither the widespread use of arthroscopy nor the advent of newer diagnostic tests such as CT scanning and magnetic resonance imaging have cast much light. Without a better understanding of why patellar disorders occur it is not surprising that there is no consensus on how to fix them. Arthroscopy has contributed little except to the patient's psyche. The currently most popular surgical treatment for recurrent dislocation of the patella was first described 50 years ago. One concrete advance, albeit a small one, is a better understanding of the role of anatomical abnormalities and patellofemoral dysplasia in patellar instabilities. It gives me great pleasure that many of the contributors are, like Dr.

The Norton Commando is a motorcycle with an ohv pre-unit parallel-twin engine, produced by the Norton Motorcycle Company from 1967 until 1977. If you have ever driven by a building and wondered what has happened within its walls, you know what drives Abandoned Arkansas. Every day neglected structures are on the verge of being demolished or in desperate need of renovation. Join Michael Schwarz, Eddy Sisson, Ginger Beck, and James Kirkendall through the forgotten history of the Natural State, from the Majestic Hotel in Hot Springs to Dogpatch USA, an abandoned theme park once loved by thousands. Travel to decayed places around the state and bear witness to the vandalism, weathering, and slow death of countless historic buildings. It's simultaneously heartbreaking and captivating. Through historic documentation, these photographers hope to immortalize the stories of the places they visit beyond the building's finite lifespan, and to preserve an echo from the past. To see over 150 locations and more photos from abandoned places around the state, please visit AbandonedAR.com
