

Bapen Enteral Feeding Guidelines

An essential guide to critical care nursing that includes all the key scientific knowledge and procedures you will need to know when entering the critical care environment. Written by a dedicated team of lecturers and practitioners with extensive experience in critical care nursing, this textbook covers all the key elements involved in nursing critically ill adults, with individual chapters on managing problems associated with different organ systems and the pathophysiology behind these disorders. It also features coverage of psychological care and infection prevention, and includes a consistent focus on the importance of a person centred, evidence-based approach to critical care delivery. To further support your learning, the book is full of activities that enhance your knowledge and test your understanding, including clinical case studies, critical thinking tasks, and reflective practice exercises. For lecturers and instructors, there is a collection of online resources including a testbank of multiple-choice questions, links to relevant videos for each chapter, and PowerPoint slides for each chapter. The ideal textbook for nursing students studying critical care, undertaking clinical placements in intensive care, or nurses new to the critical care environment.

Bailey & Love is the world famous textbook of surgery. Its comprehensive coverage includes the scientific basis of surgical practice, investigation, diagnosis, and pre-operative care. Trauma and Orthopaedics are included, as are the subspecialties of plastic and reconstructive, head and neck, cardiothoracic and vascular, abdominal and genitourinary surgery. The user-friendly format includes photographs, line diagrams, learning objectives, summary boxes, biographical footnotes, memorable anecdotes and full-colour page design. This book's reputation for unambiguous advice make it the first point of reference for student and practising surgeons worldwide.

Back for a second edition, Current Surgical Guidelines has been fully updated to reflect changes in guidelines across the surgical sub-specialities since its first publication. Drawing together printed and digital guidelines from the Scottish Intercollegiate Guidelines Network (SIGN), the National Institute for Health and Clinical Excellence (NICE), and relevant US guidelines, this book acts as a valuable complete and comprehensive reference for those embarking on their surgical training, revising for exams, or for senior staff as an aide-memoire. Guidelines have been distilled into summary tables, and topics are formulated to answer most real-life clinical practice questions with contemporary facts and figures, decision recommendations, and treatment options. New chapters on hernias, skin malignancies, trauma, and medicolegal practice have been added to increase fresh challenges facing the contemporary surgical trainee.

The standard work for all those involved in the field of clinical nutrition and dietetics, The Manual of Dietetic Practice has been equipping health care professionals with the essential foundations on which to build expertise and specialist skill since it was first published in 1988. The fourth edition responds to the changing demand for multidisciplinary, patient-centred, evidence-based practice and has been expanded to include dedicated chapters covering adult nutrition, freelance dietetics, complementary and alternative therapies. Compiled from the knowledge of both individual experts and the British Dietetic Association's Specialist Groups, this truly is the essential guide to the principles of dietetics across its whole range.

Alexander's Nursing Practice E-Book

The Royal Marsden Manual of Clinical Nursing Procedures Student Edition
for Nurses and Health Care Workers

Developing Practical Nursing Skills

This case-based approach to the intensive care medicine curriculum provides 48 case

studies linking core knowledge to clinical context. Topics chosen have been mapped to eight key areas of study, making this ideal for both FFICM and EDIC exam candidates. The aim of this book is to provide a starting point for discussion between doctors in primary and specialist care about the recognition, follow-up and continuing management of patients with chronic gastrointestinal disorders

'Applying the Roper-Logan-Tierney Model in Practice' has been written to enable students and their teachers (in higher education and clinical practice) to explore the different dimensions of the model through a variety of case studies and exercises.

Fundamentals of Children and Young People's Anatomy and Physiology contains the critical knowledge required to provide safe and effective care to young people.

Emphasising the application of evidence-based theory to practice, this comprehensive yet accessible textbook helps nursing and healthcare students understand how children's anatomical and physiological systems influence disease processes and treatment options differently than in adults. Highly visual, succinct yet comprehensive, this textbook presents an overview of the structure and function of each body system, supported by clinical applications demonstrating how the concepts relate to nursing in practice. Fully revised to reflect the Future Nurse Curriculum Standards, this second edition contains a new chapter on physical growth and development, discussion of social, political, and environmental impacts to children's health and wellbeing, updated problems and activities, and more. Each chapter includes a range of effective pedagogical tools, such as learning objectives, clinical considerations, body maps, and self-assessment questions. Designed to prepare students for their careers in delivering high-quality care for children in a range of settings, this leading textbook: Provides information on the anatomical and physiological changes that leads to an altered state of health Emphasises clinical application throughout, applying the anatomy and physiology to common health conditions in children Offers a structured and comprehensive approach to child-related anatomy and physiology theory to prepare students for practice Fundamentals of Children and Young People's Anatomy and Physiology is essential reading for nursing and healthcare students, and a useful reference for nurses, nursing associates, healthcare assistants, assistant practitioners, and other professionals working in the field. All content is reviewed by students for students. If you would like to be one of our student reviewers, go to www.reviewnursingbooks.com to find out more.

Bailliere's Nurses' Dictionary

Clinical Nursing Practices

Developing Practical Nursing Skills helps you learn and perfect the practical skills required to become a qualified nurse.

Adopting a patient-focused and caring approach, this essential text helps you integrate nursing values alongside physical skills in your daily practice. Now in its fifth edition, the text takes into account the NMC standards of proficiency and is relevant

to nurses across all fields. Key features of the book include: i) New chapters on mental health assessment and end-of-life care, along with expanded content on sleep, pain and medication management. ii) Full-colour text design with clear illustrations and clinical photographs to aid visual learning. iii) Reader-friendly style with learning outcomes, activities and reflection points to help you link theory to practice. iv) Scenarios from a range of settings, including community, mental health and learning disabilities nursing. v) A focus on adults and young people, and with 'pointers' on caring for children and pregnant women to promote a lifespan approach. This is a complete clinical skills resource for all pre-registration nursing students. It is also a useful text for nursing associate and healthcare support workers.

The subject of enteral nutrition is an interesting one both to the healthcare professionals working in this practice area and to the individuals who may benefit from nutritional support. These individuals usually have functional guts but may be suffering from dysphagia (with the underlying neurological deficits) or the effects of radiotherapy treatment. Enteral nutrition involves the provision of nutritional support to individuals whose nutritional requirements cannot be met by a normal diet. In particular, it is the process of delivering enteral feed via feeding tubes such nasogastric feeding, nasojejunal and percutaneous endoscopic gastrostomy tubes. Often, enteral nutrition provision involves the assessment of nutritional status, the determination of nutritional requirements, the establishment of feeding regimes, and the management of patients, pumps, feeds, and feeding tubes. Researchers in this field are also keen to evaluate the effect of enteral feeding protocols, algorithms, and guidelines on patients with different medical conditions in various care settings. There have also been a series of comparisons between the use of feeding tubes, feeding methods, and management approaches. Economic evaluations of enteral nutrition and Home Enteral Nutrition (HEN) teams show the benefits of Home Enteral Tube Feeding (HETF); however, due to the rising cost of HETF, there has been intense debate on the subject. There have been reviews on advances, challenges, and prospects in enteral nutrition. This Special Issue is intended to provide information on recent advances in the area of enteral nutrition.

This volume is a practical resource for all those responsible for caring for older people across health and social care. It

provides a comprehensive and holistic approach helping nurses, therapists and social care professionals to better understand the impact of ageing upon the person and wider society. A unique feature of this text is the focus upon positive ageing and the attempt to dispel and challenge some of the myths, prejudices and negative attitudes that still prevail towards ageing and older people. A key objective of the book is to introduce practitioners to some of the neglected or under-addressed aspects of ageing such as spirituality, sexuality, and LGBT. Chapters are written in an engaging and interactive style and where appropriate draw upon case studies and scenarios to maximize engagement developing competence, by informing knowledge, attitudes and skills. The text introduces the practitioner to key dimensions of what it is to be a person, physically, psychologically, socially and spiritually and how these contribute to the ageing process and can enhance the quality of life of older people. Irrespective of whether one cares for older people in an acute hospital setting or domiciliary, home care, this text will be of relevance. The material and content transcend health and social care boundaries, providing valuable, contemporary evidence that can inform and shape practice. Above all this text will encourage reflection, dialogue and engagement with some fundamental aspects of ageing, challenging, attitudes, values and behaviour so that a more positive and balanced insight towards ageing is fostered. This book will ensure that self-awareness and professional practice are enriched and informed and the practitioner has a holistic understanding of ageing that will enable them to care for older people with compassion, dignity and respect.

The latest addition to the Kumar & Clark family, this thoroughly updated new edition covers more than 200 cases presenting with acute symptoms in the hospital, everything from shingles and breathlessness to chest pain, acute coronary syndromes, poisoning, renal failure and stroke. The authors give clear and concise advice on immediate and further management, management of complications, differential diagnoses, history-taking, tips and pitfalls, alerts, investigations, and prioritization. • More than 200 cases • Remember! boxes • Investigations boxes • Information boxes Edited by Parveen Kumar, CBE, BSc, MD, FRCP, FRCP(Edin) and Michael L Clark, MD, FRCP Enhanced e-book accompanies the print book, for ease of transportation and use on the move. Over 200 cases

Fundamentals of Critical Care

Understanding Ageing for Nurses and Therapists

Nutrition in Institutions

Shared Care For Gastroenterology

Bailey & Love's Short Practice of Surgery, 27th Edition

The new edition of this highly successful text brings it fully up to date with recent developments in surgical nursing, and includes a new chapter on perioperative stress and anxiety. The need for surgical nurses to remain at the cutting edge in relation to their knowledge and skills has never been greater, as the demands of higher patient throughput and reduced hospital stays take their toll. *Nursing the Surgical Patient* is written for, and by, nurses. It adopts a patient-centred approach to the care of people requiring a wide variety of surgical procedures. Compiled by experienced practitioners and educators in the field, it covers relevant anatomy and physiology, investigations, brief information on relevant medical conditions leading to surgery, an outline of the surgical procedures and the nursing care the patient will require. The key nursing care issues are described and explored, with case studies and care plans to bring theory to life. Comprehensive and research-based, yet accessible and engaging, *Nursing the Surgical Patients* a vital companion to nurses caring for surgical patients in either the primary or secondary care setting. This title is directed primarily towards health care professionals outside of the United States.

Supported by a companion skills volume and website, *Foundation Studies for Caring* is a comprehensive introductory text for all health professionals, which maps directly on to the key skills framework. Taking a student-centred learning and interprofessional approach, it is the most inclusive and engaging theory text in the market.

Contemporary and fully updated, the new edition of this accessible guide builds on the success of previous editions to bring together all the key principles of nursing care for surgical patients. Split into two sections, the first section explains the basis of surgical care. The second section has comprehensive coverage of all major areas of surgical practice, providing both a theoretical and practical understanding across a wide range of procedures. Written from a patient-centred perspective but with an added emphasis on safety and the role of the nurse in relation to current legislation, the new *Pudner's Nursing the Surgical Patient* offers all you need to provide the best care. Its user-friendly format will make it invaluable not only to nurses but to a range of health care practitioners. Easy-to-read, easy-to-understand approach Ultra-clear and simple line art Written by 20+ expert contributors from around the UK Patient-centred approach places the patient at the centre of all that is done Reflects the latest practice and retains the principles of care Completely updated to reflect recent developments in the field, from advances in laparoscopic surgery to the inclusion of new surgeries that can take place in a day-care setting Wider scope of reference from specialist to associate nurse, to a range of healthcare professionals New section on patient safety including informed consent Expanded reference to NMC standards and guidelines Now with a full colour design and colour illustrations

The importance of good nutrition for individual health and well-being is widely recognized, yet for a significant number of people who rely on institutions for food and nutrition, this importance has not always been a primary consideration. People,

therefore, may find themselves consuming food they would not ordinarily choose to eat, with, in some cases, restricted choices precluding individual preferences and compromising health. In recent years, there have been major advances in the quality of catering in some areas, particularly schools. Other institutions which have not been thrust into the media spotlight have fared less well in terms of policy drive and commitment. This insightful new book looks in detail at five institutions: schools, hospitals, care homes for the elderly, prisons and the armed forces. As well as providing a fascinating history of the provision of food in each institution, each section considers: current policy and standards and their implementation adequacy of food provided with regard to the health status and dietary requirements of the people in the care of each institution efficiency of catering organization and issues relating to contract tendering, expenditure and procurement A broad spectrum of further relevant issues is also covered, including the meaning of food to those in institutions and determinants of choice.

Foundations for Nursing and Healthcare Students

Using Student-Centred Learning

The Royal Marsden Manual of Clinical Nursing Procedures

Foundation Studies for Caring

Food for the Aging Population, Second Edition, is a unique volume that reviews the characteristics of the aging population as food consumers, the role of nutrition in healthy aging, and the design of food products and services for the elderly. The first section of the book discusses the older population as consumers of food and beverages, while the second section covers the extension of functionality into later life. The final section highlights tactics on how to develop food products and services for older people. Fully updated and revised from the first edition, the book covers advances in various fields, introducing a number of new chapters, including, amongst others, topics on the economic determinants of diet in older adults, public policy and older people's diets, and interventions to support healthy eating in later life. Covers the topic of food for an aging population more broadly than any other book on the market Presents a thoroughly revised and updated edition of a very popular and well regarded book Contains new chapters on the implementation of food-related interventions among the elderly population and their relationship to policymakers

The authoritative guide for dietetic students and both new and experienced dietitians - endorsed by the British Dietetic Association Now in its sixth edition, the bestselling Manual of Dietetic Practice has been thoroughly revised and updated to include the most recent developments and research on the topic. Published on behalf of the British Dietetic Association, this comprehensive resource covers the entire dietetics curriculum, and is an ideal reference text for healthcare professionals to develop their expertise and specialist skills in the realm of dietetic practice. This important guide includes: The latest developments and scientific evidence in the field New data on nutrition and health surveillance programs Revised and updated

evidence-based guidelines for dietetic practice An exploration of how Public Health England has influenced the field Practical advice on public health interventions and monitoring A companion website with helpful materials to support and develop learning Written for dietitians, clinical nutritionists, and other healthcare professionals by leading dietitians and other professionals, the Manual of Dietetic Practice continues to provide a crucial resource for experts and novices alike.

The student edition of The Royal Marsden Manual of Clinical Nursing Procedures has been the definitive, market-leading textbook of clinical nursing skills for fifteen years. This internationally best-selling title sets the gold standard for nursing care, providing the procedures, rationale, and guidance required by pre-registration students to deliver clinically effective, patient-focused care with expertise and confidence. With over two-hundred detailed procedures which reflect the skills required to meet The Standards of Proficiency for Registered Nurses (NMC 2019), this comprehensive manual presents the evidence and underlying theory alongside full-colour illustrations and a range of learning activities designed to support student nurses in clinical practice. Loved and trusted by millions, The Royal Marsden Manual of Clinical Nursing Procedures, Student Edition continues to be a truly indispensable textbook for students, and includes coverage of patient assessment and discharge planning, communication, infection prevention and control, perioperative care, wound management, nutrition, diagnostic testing, medicines management, and much more. Learning features in this revised tenth edition include: Learning outcomes – summarise the focus of the information in each chapter Learning in practice – asks you to consider issues within your practice environment Case studies – provide learning around a particular patient scenario Clinical applications – ask you to consider how you would apply your knowledge to a clinical situation Stretch activities – challenge you with more nuanced, advanced issues to reflect upon Many of the features in the book are relevant to trainee nursing associates, especially when used in conjunction with supervision from academic and clinical teachers. A companion website to this title is available at www.royalmarsdenmanual.com/student10e

This handbook is for nurses needing practical guidance in clinical situations, either as an aide memoire for the specialist nurse, or an essential reference source for newly qualified nurses caring for people with neurological problems for the first time.

Developing Practical Nursing Skills, Fourth Edition

Case Studies in Adult Intensive Care Medicine

Dementia Care

Hospital and Home - The Adult

Assessment and Management of Clinical Problems

Provides comprehensive and practical guidance for managing the nutritional requirements of critically ill patients and thereby improving prognosis.

The new edition of Clinical Nursing Practices reflects the many changes in nurse education and

practice. A team of clinical and education experts has updated the core practices contained within this text, while to ensure continuity the previous editors have acted as consultants in the development of this edition. To reflect the continuing evolution of nursing and nursing practice, this new 6th edition emphasizes the importance of evidence-based practice, values-based care, person centred care, health and social care integration and interprofessional education. To encourage reflective practice, self-assessment questions remain at the end of each chapter for some of the practices. Where appropriate, certain practices are evidenced mainly by National Guidelines and Standards such as Cardio Pulmonary Resuscitation, Infection Control and Blood Transfusion; consequently, the presentation of the skill or procedure reflects this. The updated text addresses the wider issues which impact on everyday nursing and healthcare practice and is specially written to meet the needs of nurses today. The core philosophy of book, however, remains the same: to encourage its readers to deliver the highest quality care to each individual patient, safely and effectively. Simple and straightforward step-by-step account of the key clinical procedures with clear learning outcomes. For nurses learning procedures for the first time, for newly qualified nurses needing to check their knowledge or for nurses returning to work needing an update or refresher. Equips readers to deliver high quality, safe and effective care to patients. References the new NMC standards of proficiency Updates to all chapters and skills New Action-Rationale format – clearly shows the reasons for performing each procedure. 25 new illustrations
New editor team

The fifth edition of Pharmaceutical Practice has been totally overhauled and restructured to bring the contents completely up to date and to reflect emerging new roles for pharmacists both within the traditional employment areas of hospital and community pharmacy, as well as other developing roles supporting the public health agenda, governance, risk management, prescribing and pharmacoconomics. It covers a wide range of subjects relevant to pharmacy practice, including communication skills, managing a business, quality assurance, dispensing, calculations, packaging, storage and labeling of medicines, sterilization, prescriptions, hospital-based services, techniques and treatments, adverse drug reactions, cost-benefit, and medicines management. Each chapter begins with Study Point and ends with Key Points to reinforce learning. Appendices include medical abbreviations, Latin terms and abbreviations, systems of weights and measurements, presentation skills and key references. Self-assessment questions for more complex areas of pharmaceutical practice. New chapters on control of medicines; control of health professionals and their staff; ethics in practice; Standard Operating Procedures; structure and organisation of pharmacy; veterinary pharmacy; appliances; public health, and pharmacy interventions. New editor on the team, Jennie Watson. Many new contributors, comprising practising pharmacists, teachers of pharmacy, and pharmacists with joint appointments between hospital/community pharmacy and universities.

The most comprehensive UK Adult Nursing core text, now in its fourth edition, for the next generation of nurses... This best-selling textbook has been fully revised by a team of experienced nurses for nurses focusing on the issues that are important to them. It provides a comprehensive source of the knowledge and skills required for competent, evidence-based nursing practice. High quality nursing care is patient-centred, knowledgeable and based on the best available evidence. This book will help you to achieve that. Key nursing issues summarise each chapter and enable you to check your understanding Interactive Reflection and Evidence-based practice boxes help make links between theory and practice A Reflection and Learning feature in each chapter to help you consider your learning and professional development and how you can use it to enhance patient/client care Now in full colour A customisable electronic version of the book, which makes searching for information easy and accessible An exciting companion website including: Self-test quiz questions with full explanations with the answers Critical-thinking questions with outline answers Full colour photographs, diagrams, tables and care plans Hyper-linked references All the images from the book Increased prominence of nursing and health promotion

Recent Advances in Enteral Nutrition

Current Surgical Guidelines

Manual of Dietetic Practice

Guidelines for Evidence-Based Practice

Lewis's Medical-Surgical Nursing

Like the original Ward-based Critical Care, this second edition aims to guide practitioners in the initial management of critically ill adult patients within the ward setting. It should be of value to a wide range of healthcare professionals, including doctors, nurses, physiotherapists and students. It will also be relevant to practitioners who are moving into any setting that cares for acutely ill patients. This volume has been slightly reorganised since the first edition to ensure that practical aspects are incorporated within the relevant sections. The book is still structured around the ward-based approach to assessing and managing patients, as this is promoted in critical care and resuscitation care training. The focus on practical examples and 'hot tips' to aid memory of key points continues. All the chapters have been updated with the most up-to-date guidance, as available at the time of writing. This has meant that some chapters required major revisions, while others have remained relatively unchanged. Some new chapters have been included, such as the ones on anaphylactic shock, patient safety and dealing with pregnant women in the ward setting, and massive blood transfusion. In addition, each section now starts with a chapter giving an overview of the A-E approach in order to provide more detail about assessing and managing those aspects of critical care. This informative book contains many useful features such as clinical scenarios, tips and practical skills, and the text is richly illustrated and cross-referenced throughout.

Alexander's Nursing Practice E-Book Hospital and Home - The Adult Elsevier Health Sciences

The latest edition of this popular volume has been fully updated throughout to meet the needs of the 2018 NMC Standards of Proficiency. Richly illustrated throughout, it comes with 'real-life' Case Studies to help readers contextualise and apply new information, pathophysiology to explain disease processes, enhanced discussion on pharmacology and medicines management to assist with 'prescribing readiness', and helpful learning features which include Key Nursing Issues and Reflection and Learning - What Next? Available with a range of supplementary online tools and learning activities, Alexander's Nursing Practice, fifth edition, will be ideal for all undergraduate adult nursing students, the Trainee Nursing Associate, and anyone returning to practice. New edition of the UK's most comprehensive textbook on Adult Nursing! Retains its popular 'three-part' structure to ensure comprehensive coverage of the subject. Common Disorders, Core Nursing Issues and Specific Patient Groups. Illustrative anatomy and pathophysiology help explain key diseases and disorders 'Real-life' Case Studies help contextualise and apply new information Explains relevant tests and investigations and, when needed, the role of the nurse in the context of each of them Helpful learning features include Key Nursing Issues and Reflection and Learning - What Next? Encourages readers to critically examine issues that are related to care provision

Nursing the Surgical Patient

Kumar and Clark's Clinical Medicine E-Book

Oxford Handbook of Neuroscience Nursing

Handbook of Drug Administration via Enteral Feeding Tubes, 3rd edition

Pudner's Nursing the Surgical Patient E-Book

Perfect for: • Undergraduate Nursing Students • Postgraduate Specialist Nursing Pathways (Advanced
Medical Surgical Nursing) • TAFE Bachelor of Nursing Program Lewis's Medical-Surgical Nursing:

Assessment and Management of Clinical Problems, 4th Edition is the most comprehensive go-to reference for essential information about all aspects of professional nursing care of patients. Using the nursing process as a framework for practice, the fourth edition has been extensively revised to reflect the rapid changing nature of nursing practice and the increasing focus on key nursing care priorities. Building on the strengths of the third Australian and New Zealand edition and incorporating relevant global nursing research and practice from the prominent US title Medical-Surgical Nursing, 9th Edition, Lewis's Medical-Surgical Nursing, 4th Edition is an essential resource for students seeking to understand the role of the professional nurse in the contemporary health environment. • 49 expert contributors from Australia and New Zealand • Current research data and Australian and New Zealand statistics • Focus on evidence-based practice • Review questions and clinical reasoning exercises • Evolve Resources for instructor and student, including quick quiz's, test banks, review questions, image gallery and videos. • Chapter on current national patient safety and clinical reasoning • Over 80 new and revised case studies • Chapter on rural and remote area nursing • Fully revised chapter on chronic illness and complex care • Chapter on patient safety and clinical reasoning • Greater emphasis on contemporary health issues, such as obesity and emergency and disaster nursing • Australia and New Zealand sociocultural focus.

The Royal Marsden Manual of Clinical Nursing Procedures has been the number one choice for nurses since it first published, over 30 years ago. One of the world's most popular books on clinical skills and procedures, it provides detailed procedure guidelines based on the latest research findings and expert clinical advice, enabling nurses and students to deliver clinically effective patient-focused care. The ninth edition of this essential, definitive guide, written especially for pre-registration nursing students, now includes a range of new learning features throughout each chapter that have been designed to support student nurses to support learning in clinical practice. Providing essential information on over 200 procedures, this manual contains all the skills and changes in practice that reflect modern acute nursing care.

Clinical skills are a fundamental aspect of nursing care of children and young people. The Great Ormond Street Hospital Manual of Children's Nursing Practices is an evidence-based manual of practical skills in children's nursing which builds on the extensive expertise developed at Great Ormond Street Hospital. It encompasses all aspects of children's nursing from the most basic aspects of everyday practice to advanced practice in high dependency and intensive care to provide a comprehensive resource for all qualified nurses, students, and other health-care professionals involved in caring for children, both in the hospital and the community setting. Children's and young people's nursing presents unique challenges. The Great Ormond Street Hospital Manual utilises the latest clinical research and expert clinical knowledge to address these challenges, and provides the underlying theory and evidence for nursing care of children. It provides a definitive guide to clinical skills procedures in children's and young people's nursing which enables nurses working with children and young people to practice confidently and deliver clinically effective family-centred care. Key features Offers access to clinical procedures developed through the extensive expertise from Great Ormond Street Hospital Contains evidence-based recommendations for expert care Encompasses all aspects of children's care Contains procedures guidelines students can rely on and effectively use in practice following qualification Highlights specific needs of neonates and adolescents Placed in the context of inter-disciplinary care of the child Includes the rationale for each procedure - the 'why' as well as 'how' Information presented in a similar way to The Royal Marsden Manual of Clinical Nursing Procedures - offering continuity to those working in both adult and paediatric settings This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from iTunes or the MedHand Store.

This book provides a comprehensive look at all aspects of nutrition from roles and responsibilities to caring for a patient with specific nutritional needs. It is aimed primarily at nurses and addresses some of the issues they will encounter when caring for patients nutritional needs in a hospital setting. It also highlights the benefits of a hospital based Nutrition Team providing a multidisciplinary approach to nutrition. It includes a number of case studies to clarify some of the issues discussed and concludes by

examining issues that need to be considered before discharging a patient home from hospital into the community.

Kumar & Clark's Cases in Clinical Medicine E-Book

The Great Ormond Street Hospital Manual of Children's Nursing Practices

This book discusses the contemporary medico-social, psychological, legal, and therapeutic concerns related to people affected by dementia as a patient or as a caregiver. It provides global emerging responses to dementia. It highlights different dimensions of dementia in terms of issues, concerns, policies, and strategies all around the globe. The contributing authors present issues from cross-cultural education visible in dementia studies and discuss the power of music, art therapy, artistic collaborations, and many innovative practices in dealing with dementia. Written by international specialists from various disciplines, the chapters include challenges and emerging issues related to the role of family caregivers, the concern with vulnerability to elder abuse and neglect, and the role of technology in dementia care. The book provides a diverse perspective to dementia care not covered in such a broad way by any other books on the topic. This book is intended for academics from a wide range of fields such as sociology, geriatrics, community medicine, public health, clinical psychology, social work all of which, collectively, bear on the problem and the solutions for better dementia care.

With over 400 drug monographs, this book covers the technical, practical and legal aspects that you should consider before prescribing or administering drugs via enteral feeding tubes.

The Royal Marsden is the world's first hospital dedicated to cancer diagnosis, treatment, research and education - a centre of excellence with an international reputation for ground-breaking research and pioneering the very latest in cancer treatments and technologies, as well as specialising in cancer diagnosis and education. This companion volume to the internationally successful The Royal Marsden Manual of Clinical Nursing Procedures is designed to support practitioners who work specifically with oncology patients by providing detailed evidence-based procedures and rationale, and problem-solving guidance on all aspects of oncology nursing. The Royal Marsden Manual of Cancer Nursing Procedures: Is organized and structured to represent the needs of the patient along their care pathway Provides the latest evidence underpinning all procedures Includes information on haematological procedures; pain assessment and management; wound care; oncological emergencies; and end-of-life care Gives detailed guidelines on supporting patients living with cancer with practical information on such things as benefits, exercise and nutrition. The Royal Marsden Manual of Cancer Nursing Procedures is an invaluable, definitive resource for all those involved in the provision of cancer care and support to patients and their families.

Developing Practical Nursing Skills, Fourth Edition helps you learn and perfect the practical skills required to become a qualified nurse. Patient-focussed and adopting a caring approach, this essential text will also help you to integrate nursing values alongside physical skills in your daily practice. Key features include: Full colour text design with clear illustrations and clinical photographs to aid visual learning Evidence-based and clearly mapped to key guidelines to

ensure best practice Reader-friendly style with learning outcomes, activities and reflection points to help you link theory to practice Scenarios from a range of settings, including community, mental health and learning disabilities nursing A focus on adults and young people, and with "pointers" on caring for children to promote a lifespan approach Free companion website providing image library, videos of key skills, and MCQs as well as additional resources for lecturers to download This is a complete clinical skills resource for all pre-registration nursing students.

Food for the Aging Population

Applying the Roper-Logan-Tierney Model in Practice

Bailliere's Nurses Dictionary for Nurses and Health Care Workers, 1st South Asia Edition - E-book

A Handbook for Hospital Practice

Essentials of Nursing Critically Ill Adults

‘ This book effectively bridges the gap between dietitian, doctor, nurse and pharmacist and there is much in it to educate even the more experienced practitioner. I recommend the book highly and feel confident that well-thumbed and battered copies will soon be found on wards everywhere. ’ Alastair Forbes, Chairman of the British Association of Parenteral and Enteral Nutrition ‘ This book will help non-specialists to make appropriate choices regarding nutritional care for their patients. It should prove to be a valuable resource for all professions, in many areas of practice. ’ Lynne Colagiovanni, Chairman, National Nurses Nutrition Group ‘ This is a much needed comprehensive clinical nutrition guide for busy healthcare professionals. It covers all aspects of nutritional care in a logical and systematic way and will aid clinicians in making reasoned judgments on the nutritional care that their patients require. ’ Vera Todorovic, The Parenteral and Enteral Nutrition Group of the British Dietetic Association ‘ This handbook will be an invaluable resource, as it provides a concise, practical guide covering all aspects of clinical nutrition, both for adults and paediatric patients. ’ Rebecca White and Vicky Bradnam, British Pharmaceutical Nutrition Group

This Second South Asia Edition of the popular classic Baillière's Nurses' Dictionary is fully updated to meet the needs of nurses and health care workers in the South Asia region.
