developmental guidance from the industry's leading authorial team. Henry Adams' Building Construction was first published in 1906. It was reprinted several times and revised in 1912 with the addition of 24 pages on reinforced concrete. Beautifully illustrated with over 2,300 engravings and twelve

# Download Ebook Basic Building And Construction

tinted plates, it is reprinted here, unabridged, for the first time in nearly one hundred years. Adams' work sits comfortably alongside the other great construction books of the period: "Rivingtons" (also facsimiled by Donhead) and "Mitchell's". The latter two were actually slightly earlier:

# Download Ebook Basic Building And Construction

"Rivingtons" had already reached its fifth edition by 1906, and "Mitchell's" was in its seventh. Nevertheless Adams was hugely popular, selling over 40,000 copies in its first decade. There seems to be little doubt that its great advantage over its rivals was its format: while the others consisted of several

# Download Ebook Basic Building And Construction

volumes, Adams covered everything in a single one. As such it was more popular with students of building construction preparing for their exams and no doubt they kept it at their side for reference throughout their working lives. Although a great deal has changed in building technology since 1906,

# Download Ebook Basic Building And Construction

there is still much to learn from this volume.

Of course it will be particularly useful to those who own a building of the period or who are professionals charged with looking after such buildings. But for everyone it provides an invaluable insight into the thinking of the time and an extraordinary snapshot

Basic Building  
And Construction

Degradation, the chemical/physical response of building and construction materials exposed to in-service environments, must be predicted prior to their installation in structures if materials are to be effectively selected, used and maintained. These

# Download Ebook Basic Building And Construction

assessments of materials degradation require that methods be available to aid prediction of service life. The objectives of building materials science are a) to characterize and categorize materials, b) to predict, preferably in a mathematical sense,

continued progress  
has been made  
towards objective (a),  
but little progress has  
been made towards  
objectives (b) and (c).  
Of these, the  
mathematical  
prediction of service  
life appears to be of  
greater importance,  
because, if general  
approaches or models

having application to  
a wide range of  
building and  
construction materials  
can be identified,  
then the  
categorization,  
selection, use and  
improvement of  
materials can proceed  
in a systematic  
manner. Researchers  
in advanced
