The ICD-10-CM Coding Handbook is the only guide published in collaboration with the Central Office of the American Hospital Association. The Central Office is the official industry body that prepares the AHA Coding Clinic. The Handbook helps coders understand the principles behind the classification system so they can apply the official coding advice found in the Coding Manual. Academic and in-service instructors can easily arrange course outlines and study exercises around Handbook chapters to train new and

fully updated to reflect new codes and coding guidelines. In addition to fully updated content, the new edition has new content on anatomy and physiology, expanded discussion of the use of the medical record in coding, streamlined coding tools, and improved examples. Become prepared for a career in medical coding with *Mastering Medical Coding, 4th Edition*. Emphasis on physician documentation prepares students to locate and determine the actual "diagnosis?" and "procedure?" from documentation. Coding reference tools, in an improved and streamlined form for the 4th edition, encompass important chapter content. Coding concepts are built upon basic ICD-9-CM and CPT concepts rather than a body system perspective for greater ease and productivity from students.

records management around the world has been on what data to get, and not on how to get it. The more efficient health information systems of today, however, are interested in what data to get, how to get it, and how to synthesize these data into an understanding of the patient's total situation. Disease classification and coding is the principal tool used by medical records personnel to accomplish this, and is, therefore a skill, which
