Slaughter argues that international law shares with the modern novel a particular conception of the human individual.

The Bildungsroman, the novel of coming of age, fills out this image,

involving structures of the head and neck frequently impact the most fundamental aspects of human existence, namely, those functions related to voice and speech production, eating, and

Online Library Baxi Luna Comfort 3 User Manual

swallowing.

Abnormalities in voice production, and in some instances its complete loss, are common following treatment for laryngeal (voice box) cancer.

Similarly, speech, eating,

may be

dramatically

those where oral

Consequently,
the range and
degree of
deficits that
may be
experienced
secondary to the
treatment of
head and neck
cancer (HNCA)
are often
substantial.
This need is
further

Online Library

Baxi Luna

reinforced by the Centers for Disease Control and Prevention who have estimated that the number of individuals who will be newly diagnosed with HNCa will now double every 10 years. This estimate becomes

critical given

are essential components of all effective rehabilitation programs.

Comprehensive HNCa rehabilitation ultimately seeks to restore multiple areas of functioning in the context of the disabling

effects of treatment. In this regard, rehabilitation often focuses on restoration of function while reducing the impact of residual treatment-related deficits on the individual's overall

Regardless of
the treatment
method(s)
pursued for HNCa
(e.g., surgery,
radiotherapy,
chemoradiation,

or combined methods), additional problems beyond those associated with voice, speech, eating and swallowing frequently exist. For example, post-treatment changes in areas such as

alterations and associated disfigurement, and deficits in body image are common. Those treated for HNCa also may experience significant pain, depression, stigma and subsequent

Online Library Baxi Luna Comfort 3 User Manual

social
isolation.

Concerns of this type have led clinicians and researchers to describe HNCa as the most emotionally traumatic form of cancer. It is, therefore, essential that clinicians

actively seek to
identify,

address a range
of physical,

problems.

Efforts that systematically consider this range of post-treatment sequelae are seen as critical to any effort directed toward enhanced rehabilitation outcomes.

Current

Contemporary
surgical

resources that address these issues and many other concerns and the resultant social implications of HNCa and its treatment can serve to establish a comprehensive framework for clinical care.

Online Library
Baxi Luna
Comfort 3 User

Consequently,
providing a
highly
specialized and
comprehensive
educational
resource
specific to HNCa
rehabilitation
is currently
needed. The
proposed edited
book is designed
to address this

void in a single authoritative resource that is also accessible to the clinical readership.

Integral to this proposed book is information that guides clinical approaches to HNCa

rehabilitation, in addition to

emphasis on the
direct impact of
changes in
voice, speech,

and the impact

We live in interesting times in which life as we know it is being threatened by manmade changes to the atmosphere in which we live. On the global scale, concern is focused on climate change due to greenhouse gas emissions, and on a national scale,

atmospheric pollution produced by combustion processes is of concern. A possible approach is through the development of new ideas and innovative processes to the current practices. Among the available options, multi-generation processes such as the trigeneration cycle, battery storage system,

solar power plants and heat pumps have been widely studied, as they potentially allow for greater efficiency, lower costs, and reduced emissions. On the other hand, some researchers had been working to increase the potential of energy generation process through heat recovery under the steam
