customize their diet
to lose weight and
improve health.

There are certain
things we take as
universal truths
when it comes to
dieting and health:
kale is good; ice
cream is bad. Until
now. When Drs.
Segal and Elinav
published their
groundbreaking

research on personalized nutrition, it created a media frenzy. They had proved that individuals react differently to the same foods—a food that might be healthy for one person is unhealthy for another. In one stroke, they made all universal diet

The Personalized
Diet helps readers
understand the
fascinating science
behind their work,
gives them the tools
to create an

(based on their
reactions to favorite
foods) and puts
them on the path to
