

Bcom 4th Semester Question Papers

The present edition of the book has been thoroughly revised and enlarged. Salient Features of the Book: The legal position as amended 2020 is given. The law stated in the book is on the basis of the Income Tax Act, 1961 and the Income Tax Rules, 1962 as amended up to June 2020. A simplified, systematic approach to the understanding of a complex subject written in a unique, simple and easy to understand language. Each topic, after a theoretical exposition, is followed by illustrations to facilitate the students to master the practical application of Corporate Tax Law. The book is useful for students of all professional examinations like M.B.A., C.A., C.S., ICWA, and M.Com. and the persons who are interested in Tax Planning. The book has been written for 'Business Laws' Paper of the B. Com. (Hons.), Semester-I, Examination of the University of Delhi in accordance with its semester based syllabus. Its contents have been largely extracted from the author's reputed title Business Law which has gained a tremendous readership over the years. This book presents the subject matter tailor-made as per the revised course structure of the University to enable the students to possess a textbook that caters to their needs in full. The book has been organized into four parts, namely, Law of Contract, Law of Sale of Goods, Law of Limited Liability Partnership, and Law of Information Technology. KEY FEATURES • Quotes Indian and English cases at appropriate places with a view to ensure necessary authenticity and clarity on the subject. • Includes text questions and practical problems with hints and solutions in each chapter to enable students to evaluate their understanding of the subject • Explains complicated provisions in easily comprehensible language with the help of illustrations and analogies

1. Evolution of Management Accounting, 2. Financial Statement, 3. Analysis and Interpretation of Financial Statements, 4. Ratio Analysis, 5. Cash-Flow Statement, 6. Cash-Flow Statement (As per Accounting Standard-3), 7. Break-Even-Point or Cost Volume Profit Analysis, 8. Inflation Accounting or Price Level Changes.

The charm of Mathematical Physics resides in the conceptual difficulty of understanding why the language of Mathematics is so appropriate to formulate the laws of Physics and to make precise predictions. Citing Eugene Wigner, this "unreasonable appropriateness of Mathematics in the Natural Sciences" emerged soon at the beginning of the scientific thought and was splendidly depicted by the words of Galileo: "The grand book, the Universe, is written in the language of Mathematics." In this marriage, what Bertrand Russell called the supreme beauty, cold and austere, of Mathematics complements the supreme beauty, warm and engaging, of Physics. This book, which consists of nine articles, gives a flavor of these beauties and covers an ample range of mathematical subjects that play a relevant role in the study of physics and engineering. This range includes the study of free probability measures associated with p-adic number fields, non-commutative measures of quantum discord, non-linear Schrödinger equation analysis, spectral operators related to holomorphic extensions of series expansions, Gibbs phenomenon, deformed wave equation analysis, and optimization methods in the numerical study of material properties.

Financial Accounting provides a comprehensive coverage to course requirements of students appearing in the paper Financial Accounting at BCom, BCom (Hons) examinations of different Indian universities and Foundation Examination (NS) of the Institute of Company Secretaries of India. The book is divided into four sections: Section I explains the fundamental principles necessary for understanding the subject. It covers the entire accounting cycle—from recording of financial transactions to the preparation of final accounts. Section II deals with accounting problems related to certain specific types of business transactions. Section III deals with partnership accounts. Section IV provides suggested answers to recent examinations' questions.

Commercial Law has been written principally for students taking an elective in commercial law on the Legal Practice Course. It covers all the core areas of general commercial practice, including agency and distribution agreements; sale and supply of goods and services; international sales contracts; credit and security; bills of exchange; competition law; intellectual property law and commercial contracts including specimen sets of terms of sale and purchase. Diagrams and examples ensure that the practical aspects of the subject area are emphasized, while the detailed coverage gives students a good introduction to the practitioner style texts they will use once in practice. This text offers an excellent bridge between the notes, exercises and case studies provided by lecturers, giving students a well-rounded view of commercial law.

Cost Accounting: Principles & Practice, 3rd Edition

Silence! the Court is in Session

Modern Poetry

Agro-ecological Regions of India

Consumer Behavior 2014

This book has been written specifically for the students of BCom (Hons) of the University of Delhi in accordance with its prescribed syllabus and that of School of Open Learning. Its basic features are the same as the mother book Cost Accounting—Principles and Practice, which is a UGC recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been organized on 'first things first' basis to sustain the interest of the

students. Every discussion involving conceptual difficulties is immediately followed by a numerical example.

»» Updated SPRING 2019! Always The Newest Social Media Strategy ««Struggling with social media marketing for business? No likes, comments and clicks, no matter what you try? Feeling overwhelmed or just don't even know where to begin? This book will help. This Journal is filled with Inspirational Quotes. Perfect gift for any sister young or old, or big or little. An Inspiring and empowering Journal. This Journal is filled with inspirational quotes on every page. Convenient size of 6 x 9 inches on Glossy finish. This Journal has 100 lined pages for you to write down your thoughts and notes.

This book is useful for IGNOU BCA & MCA students. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU MCS-024: Introduction to Database Management Systems Notes. Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. It comprises of details about: • Introduction to object oriented software engineering • Advanced Structured Modeling • Object Oriented Concepts and Project Management • Object oriented design and testing • Advanced topic in S/W engineering • Multiple Choice Questions

Thirty-four years have elapsed since the publication of the late Professor P. Maheshwari's text, An Introduction to the Embryology of Angiosperms, a work which for many years served as an invaluable guide for students and a rich source book for research workers. Various texts dealing with sections of the broad spectrum of topics encompassed by Maheshwari in his book have appeared in the interim, but a compendious modern work dealing with the whole field has been lacking. This present volume splendidly meets the need, and it is altogether fitting that Professor B. M. Iohri, long an associate and close colleague of Professor Maheshwari and himself a prolific contributor to the subject, should have undertaken the task of editing it. When Maheshwari wrote, it was still feasible for one author to handle the subject, but today even someone with his fine breadth of vision and depth of understanding could not, alone, do it justice. So the effort has to be a collaborative one; and Professor Iohri's achievement has been to bring together a team of authoritative collaborators, assign them their responsibilities, and put them to work to produce a text as integrated in its treatment as the diversity of the subject would allow. The product vividly illustrates the advances that have been made in the study of angiosperm reproductive systems in the last 30 years, and the book is surely destined to become the new standard for student and researcher alike.

CORPORATE ACCOUNTING

Anthology of Modern & Contemporary Poetry. Ideal for courses in Modern World Poetry, American Literature and American Studies, Anthology of Modern Poetry introduces students our diverse poetic heritage.

Year after year, this book has immensely helped students in their comprehension of the subject and score good marks in examinations. It has been written specifically for the prescribed syllabus of Cost Accounting Paper of BCom (Hons) Semester IV of the University of Delhi and of School of Open Learning. Its basic features are the same as the mother book Cost Accounting—Principles and Practice, which is a UGC-recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been organized on 'first things first' basis to sustain the interest of the students. Every discussion involving conceptual difficulties is immediately followed by a numerical example.

Ressentiment—the hateful desire for revenge—plays a pivotal role in Nietzsche's On the Genealogy of Morals. Ressentiment explains the formation of bad conscience, guilt, asceticism, and, most importantly, it motivates the "slave revolt" that gives rise to Western morality's values. Ressentiment, however, has not enjoyed a thorough treatment in the secondary literature. This book brings it sharply into focus and provides the first detailed examination of Nietzsche's psychology of resentment. Unlike other books on the Genealogy, it uses resentment as a key to the Genealogy and focuses on the intriguing relationship between resentment and justice. It shows how resentment, despite its blindness to justice, gives rise to moral justice—the central target of Nietzsche's critique. This critique notwithstanding, the Genealogy shows Nietzsche's enduring commitment to the virtue of non-moral justice: a commitment that grounds his provocative view that moral justice spells the 'end of justice'. The result provides a novel view of Nietzsche's moral psychology in the Genealogy, his critique of morality, and his views on justice.

The Third Edition of this text, which is a thoroughly revised and enlarged version of Prof. V.K. Goyal's book, Corporate Accounting, Second Edition, gives a clear analysis of the fundamental concepts of corporate accounting. Accounting for various types of companies comes under the sphere of corporate accounting. This book primarily deals with the preparation and presentation of accounts strictly in accordance with the provisions of the Indian Company Law. Organized into 11 chapters, this book, at the outset, presents provisions of the Indian Companies Act, 1956, SEBI's guidelines, and different types of shares and modes for issue of shares. Then it goes on to give a detailed discussion on the conditions for redemption of preference shares with their sources and conversion of preference shares into equity shares. Besides, this text covers, in detail, topics such as different modes of issue and redemption of debentures, internal and external construction of companies, preparation of cash flow statement and its classification as well as the distinction between cash flow statement and fund flow statement. Finally, the book elaborates on several methods of analysis of financial statements and advantages and limitations of ratio analysis. This well-organized and student-friendly book is intended as a text for undergraduate students of commerce (B.Com. Programme/B.Com. Pass) in universities across India. In addition, it would be useful for professional courses such as CA, ICWA and CS. Key Features Covers concepts and principles of corporate accounting in a comprehensive manner. Includes 300 worked-out examples to illustrate the concepts discussed. Provides 250 unsolved problems in a graded manner for the benefit of students.

The second edition of Comparative Anatomy and Histology is aimed at the new rodent investigator as well as medical and veterinary pathologists who need to expand their knowledge base into comparative anatomy and histology. It guides the reader through normal mouse and rat anatomy and histology using direct comparison to the human. The side by side comparison of mouse, rat, and human tissues highlight the unique biology of the rodents, which has great impact on the validation of rodent models of human disease. Offers the only comprehensive source for comparing mouse, rat, and human anatomy and histology through over 1500 full-color images, in one reference work Enables human and veterinary pathologists to examine tissue samples with greater accuracy and confidence Teaches biomedical researchers to examine the histologic changes in their model rodents Experts from both human and veterinary fields take readers through each organ system in a side-by-side comparative approach to anatomy and histology - human Netter anatomy images along with Netter-style rodent images

This book is useful for IGNOU BCA & MCA students. A perusal of past questions papers gives an idea of the type of questions asked, the paper pattern and so on, it is for this benefit, we provide these IGNOU MCS-011: Problem Solving and Programming Notes. Students are advised to refer these solutions in conjunction with their reference books. It will help you to improve your exam preparations. This book covers Problem Solving with Computers: Algorithms, and Flowcharts. Data types, constants, variables, operators, data input and output, assignment statements, conditional statements, string and character handling, data validation examples. Iteration, arrays, strings processing, defining function, types of functions, function prototype, passing parameters, recursion. Storage class specifiers, pre-processor, header files and standard functions. Pointers: Definition and uses of pointers, pointer arithmetic, pointers and array, pointers and functions, pointer to pointer. Structures, union, pointers to structures, user-defined data types, enumeration. Data files: Opening, closing, creating, processing and unformatted data files. Introduction to Dynamic Memory Allocation, command line arguments, systems calls. Published by MeetCoogole

For the successful development of a market economy, it is necessary that the needs and demands of specific groups of consumers become the main reference point for the production and sale of goods. Effective work in the domestic and foreign markets requires knowledge and consideration of objective market laws, the ability to organize the regular receipt and operational use of market information, as well as increasing the competitiveness of their products, etc. The study of the disciplines "marketing", "fundamentals of marketing" is aimed at the formation of a wide-profile specialist who is able to independently make managerial decisions on the analysis of the market environment, planning, generalize economic phenomena, and develop ways to improve the efficiency of enterprises in a market economy.

Consumer Behavior 2014 assesses how consumer spending is distributed and behaviors that affect spending. This handbook includes presents dozens of surveys analyzing consumer spending characteristics, behavioral responses, and preferences. Easy-to-read summaries of current research and other information useful for retailers, marketers, advertisers, and business consultants are presented. While there are other publications focusing on general consumer behavioral topics, Consumer Behavior 2014 is the only resource that integrates the full spectrum of applied consumer psychology, demographics, and purchasing influences with major consumer surveys. (Annual)

Financial Accounting for BBA has been written to meet the requirements of undergraduate students, particularly at the BBA level. This book covers the syllabi of major universities across the country, providing basic knowledge of accounting principles and practices in a systematic manner. The topics have been dealt with in a lucid manner to enable better understanding, especially for those students who do not have an accounting background. The text is examination-oriented and is supplemented with relevant solved illustrations for all the topics.
