Becoming a Master Student Tools, Techniques, Hints, Ideas, Illustrations, Examples, Methods, Procedures, Processes, Skills, Resources, and Suggestions for Success

Looking to jumpstart your GPA? Most college students believe that straight A's can be achieved only through cramming and painful all-nighters at the library. But Cal Newport knows that real straight-A students don't study harder—they study smarter. A breakthrough approach to acing academic assignments, from quizzes and exams to essays and papers, *How to Become a Straight-A Student* reveals for the first time the proven study secrets of real straight-A students across the country and weaves them into a simple, practical system that anyone can master. You will learn how to:

- Streamline and maximize your study time
- Conquer procrastination
- Absorb the material quickly and effectively
- Know which reading assignments are critical—and which are not
- Target the paper topics that wow professors
- Provide A+ answers on exams
- Write stellar prose without the agony

A strategic blueprint for success that promises more free time, more fun, and top-tier results, *How to Become a Straight-A Student* is the only study guide written by students for students—with the insider knowledge and real-world methods to help you master the college system and rise to the top of the class.

The Essential Guide to Becoming a Master Student

Becoming a Master Student + Mindtapv2.0, 1 Term Printed Access Card

Teach Students How to Learn

Miriam, a freshman Calculus student at Louisiana State University, made 37.5% on her first exam but

83% and 93% on the next two. Matt, a first year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Sandra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Sandra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.

Tomorrow's best physicians will be those who continually learn, adjust, and innovate as new information and best practices evolve, reflecting adaptive expertise in response to practice challenges. As the first volume in the American Medical Association's MedEd Innovation Series, The Master Adaptive Learner is an instructor-focused guide covering models for how to train and teach future clinicians who need to develop these adaptive skills and utilize them throughout their careers. Explains and clarifies the concept of a Master Adaptive Learner: a metacognitive approach to learning based on self-regulation that fosters the success and use of adaptive expertise in practice. Contains both theoretical and practical material for instructors and administrators, including guidance on how to implement a Master Adaptive Learner approach in today's institutions. Gives instructors the tools needed to empower students to become efficient and successful adaptive learners. Helps medical faculty and

instructors address gaps in physician training and prepare new doctors to practice effectively in 21st century healthcare systems. One of the American Medical Association Change MedEd initiatives and innovations, written and edited by members of the ACE (Accelerating Change in Medical Education) Consortium - a unique, innovative collaborative that allows for the sharing and dissemination of groundbreaking ideas and projects.

The Vygotskian Approach to Early Childhood Education

Becoming a Master Student: Making the Career Connection

Becoming a Master Student

From Master Student to Master Employee

Created to meet the needs of students who are bound by time constraints or location, this online course enables colleges to teach the successful strategies of the best-selling Becoming a Master Student, 9/e, in a distance learning setting. Based on Dave Ellis' founding principle that students are responsible for the quality of their education and their own success, the online course helps them acquire the tools they need to achieve their academic, personal, and career goals. Online Becoming a Master Student can be used as a web-based component for instructors seeking to incorporate more technology in the classroom, or as a stand-alone, customized Internet course. The online course emphasizes a four-step process: individual interaction with content via tests and quizzes; individual reflection/application of power processes and lesson topics through discovery and intention statements; group knowledge on topics through group discussion; and group knowledge through the shared applications of power processes to the

lesson. Each module contains a Pre-Assessment, Topic Supplemental Article, Discovery and Intention Statements, a Practice Quiz, External Links, Group Discussions, Real-World Exercises, a Power Process Case Study, Learning Reflections, and Chapter Tests. Every parent wants the best for their child. That's why they send them to college! But most parents struggle to pay for school and end up turning to student loans. That's why the majority of graduates walk away with \$35,000 in student loan debt and no clue what that debt will really cost them.¹ Student loan debt doesn't open doors for young adults—it closes them. They postpone getting married and starting a family. That debt even takes away their freedom to pursue their dreams. But there is a different way. Going to college without student loans is possible! In *Debt-Free Degree*, Anthony O'Neal teaches parents how to get their child through school without debt, even if they haven't saved for it. He also shows parents: *How to prepare their child for college *Which classes to take in high school *How and when to take the ACT and SAT *The right way to do college visits *How to choose a major A college education is supposed to prepare a graduate for their future, not rob them of their paycheck and freedom for decades. *Debt-Free Degree* shows parents how to pay cash for college and set their child up to succeed for life.

The thirteenth edition of the best-selling *BECOMING A MASTER STUDENT* continues to lead the way in meeting the changing needs of today's first-year students. Through interactive journaling, a motivational writing style, and hands-on activities that students can apply right away, this text helps students succeed in college and in life. The thirteenth edition's clean, sophisticated interior design appeals to both traditional students and adult learners. Tools like the Discovery Wheel, Discovery and Intention Journal, Power Process articles, Master Student Profiles, and the Kolb Learning Style Inventory (LSI) deepen students' knowledge of themselves and the world around them. In this latest edition, students will find even more ways to connect to the content with the new Master Students in Action feature and end-of-chapter Skills Snapshot exercise.
