What a Time to Be Alive

This story is based on the true experiences of Doris Roth Van Vleet during the war years between 1937 and 1947 in the Japanese occupied City of Shanghai, China. She is the narrator of this amazing story. The war between China and Japan had started and the Japanese soon occupied the territory surrounding the city of Shanghai. The United States Government moved all American citizens to the Philippine Islands until the conflict was resolved. Although the International Settlement was isolated, the Japanese made no attempt to occupy that section of the city so the family returned to their apartment. Life went on in a fairly normal manner but the war in Europe had started and the British military was leaving Shanghai to join their respective battle units, primarily in Hong Kong. Life in the city was becoming more difficult, but the United States maintained neutrality until the Fourth Marines departed on Nov.28th. On the morning of December 8, 1941 there were Japanese tanks on the streets of Shanghai. The Japanese ruled the city in a sort of benign way until the American air raid on Tokyo which triggered the Japanese military to move all Americans over the age of twelve to prison camps. Her father, older brother and sister were interned and Doris, her mother and brother were now alone. They soon realized how difficult it would be just to stay alive, but due to the tenacity and courage of Zina they managed to survive. If the war had lasted into the winter of 1945, they, and most of the people in Shanghai, would have starved to death. It was the dream of all to gain passage, a visa for Zina and move to America as quickly as possible. It took the remainder of 1945 and 1946 to meet that goal. For the first sixteen years of his life George lived in a logging camp, owned by his father, located in Northwest Oregon several miles from the town of Astoria. He graduated from Jewell Grade School with six other kids in his eighth grade class. He entered Grant High School, the largest in the state of Oregon at that time, with five hundred freshmen; it was a social shock to say the least. He still worked every summer as a logger until his enlistment in the U.S. Marines. His entire professional occupation, after military service and college, was in the timber business. His writing career began as a result of a torn Achilles tendon putting him down when he was encouraged to write short stories by his wife and a good friend. After a move to Eugene he decided to enter the creative writing school at the University of Oregon. Starting in a freshman class, at seventy nine years of age, was a real adventure. With help, support and much patience from all his family and friends he finished this book. He hopes you enjoy reading this story as much as he did writing it.

Leading philosophers and scholars speculate on what Heidegger's unfinished masterpiece might have said, why Heidegger didn't publish it, and what being actually means. Heidegger's Being and Time is one of the most influential and important books in the history of philosophy, but it was left unfinished. The parts we have of it, Divisions I and II of Part One, were meant to be merely preparatory for the unwritten Division III, which was to have formed the point of the entire book when it turned to the topic of being itself. In this book, leading Heidegger scholars and philosophers influenced by Heidegger take up the unanswered questions in Heidegger's masterpiece, speculating on what Division III would have said, and why Heidegger never published it. The contributors' task—to produce a secondary literature on a nonexistent primary work—seems one out of fiction by Borges or Umberto Eco. Why did Heidegger never complete Being and Time? Did he become dissatisfied with it? Did he judge it too subjectivistic, not historical enough, too individualistic, too existential? Was abandoning it part of Heidegger's "Kehre", his supposed turning from his early work to his later work? Might Division III have offered a bridge between the two phases, if a division exists between them? And what does being mean, after all? The contributors, in search of lost Being and Time, consider these and other topics, shedding new light on Heidegger's thought. Contributors Alain Badiou, Lee Braver, Daniel Dahlstrom, Charles Guignon, Graham Harman, Karsten Harries, Ted Kisiel, Denis McManus, Eric S. Nelson, Richard Polt, François Raffoul, Thomas Sheehan, Iain Thomson, Kate Withy, Julian Young

What a time to be alive: That and other lies in the 2016 campaign is the ugly and un-sanitised diary behind the curtain of the double dissolution election campaign.

A poll fought between two wildly ambitious men who want to win their first election, whatever it takes. Mark Di Stefano finds out what is happening behind the scenes and how the two campaigns manufacture, massage and manipulate their parties, policies and principles. What a time to be alive documents the daily ride of an historic election campaign, week by long week, taking you into the bizarre world of staged photo ops, booze-drenched regrets and dirty direct messages. The exposure of the unscripted moments with political leaders, their over-worked staff and secretive minders, shows how the sausage that is this Australian election, is made and reveals what is really inside.

Are you a Time Lord or a Time Thief? What Do You Spend Time Doing? What Would You Like To Spend Your Time Doing? Becoming a Time Lord is not just about gaining time in order to get more done; it is also about being able to slow down to do the things that you want to do in the way that you want to do them.

Essentially it is about self-mastery. If you can master time – you can be a Time Lord! Time traps work in two ways: they trap you into losing time; or they result in personal overload. Topics covered: Dividing your time Avoiding information overload Managing emails and telephone Brilliant meetings Making communication work Banish procrastination How not to get sidetracked Striking a balance How to say no Create a time control system Never lose things again Small talk costs time Travel downtime Are you a time thief? Making time for relationships Killing time The routine trap Know your body clock
