The author attempts to spell out the Islamic principles on which business enterprise should be based specially in the area of partnership. He displays a strikingly acute awareness of Islamic laws on the subject, matched by an equally striking awareness of the forms of business organization in vogue in the contemporary world. The work represents a serious scholarly effort to sort out complicated questions such as those mentioned above, to enunciate Islamic principles relative to business enterprise, and to apply them in the changed context of present-day business.

STRATEGIC MANAGEMENT explores how firms build, extend, organize, and sustain a competitive advantage, focusing on five key themes: distinctive competence, quality, globalization, change, and ethics. This text takes an applications-oriented approach in which a company's strategic position or dilemma is dissected and analyzed in such a way that all key concepts and ideas are brought to light. Filled with current real-world applications, this book also includes mini-cases within each chapter.

250 years ago, Ascalon burned . . . Desperate to defend his land from advancing hordes of bestial charr, King Adelbern summoned the all-powerful Foefire to repel the invaders. But magic can be a double-edged sword—the Foefire burned both charr and human alike. While the charr corpses smoldered, the slain Ascalonians arose again, transformed by their king's rage into ghostly protectors and charged with guarding the realm . . . forever. The once mighty kingdom became a haunted shadow of its former glory. Centuries later, the descendants of Ascalon, exiled to the nation of Kryta, are besieged on all sides. To save humankind, Queen Jennah seeks to negotiate a treaty with the hated charr. But one obstacle remains. The charr legions won't sign the truce until their most prized possession, the Claw of the Khan-Ur, is returned from the ruins of fallen Ascalon. Now a mismatched band of adventurers, each plagued by ghosts of their own, sets forth into a haunted, war-torn land to retrieve the Claw. Without the artifact, there is no hope for peace between human and charr—but the undead king who rules Ascalon won't give it up easily, and not everyone wants peace!

Shayla Monroe fled her hometown of Helena, South Carolina, after a shocking situation broke the heart of the only guy she'd ever loved. Years later, after losing her job in Atlanta with her name once again shrouded in scandal, she has nowhere to go but home. Now a devastatingly handsome and well-respected man, Devin Jones became a successful doctor as a way to forget Shayla's betrayal. When she returns as infamously as she left, he plans to put aside old feelings and treat her as any other person in town. But after looking into her soft brown eyes, the feelings he thought long dead quickly rush to the surface. Ignoring rumors, disapproval from family and friends, and promises to avoid each other, the two become friends . . . then lovers. Devin wants all or nothing, but Shayla, haunted by her past, is afraid their relationship will damage what's left of her reputation. Can two broken hearts survive the fight against past and present demons to heal and find love?

Between the tenth and sixteenth centuries Central Asia was one of the most prestigious cultural areas of the entire Muslim world, playing a pivotal role in the Silk Road trade. Throughout that history, and up to the present, Tajiks, Uzbeks, Kazakhs, Kyrgyz, Turkmen and other Muslim peoples of Central Asia have developed their own unique understanding and practice of Islam which has shaped their national identity and particular social and political evolution. These special characteristics of Central Asian Islam ensured its survival during seventy years of Soviet atheist rule, while in the post-Soviet period Islam has been integrated into nation-building projects in constitutionally secular Uzbekistan, Kazakhstan, Tajikistan, Kyrgyzstan and Turkmenistan. This absorbing history is traced in this fascinating study which shows how, from the seventh century to the present day, the region's people have negotiated their distinctively Central Asian Islamic identity in the face of enduring external Islamic and non-Islamic dominations, ethnic nationalisms and, more recently, global transnational Islamic influences.

Mirroring the expansion of wealth in the Middle East and Asia and a surge in Islamic self-identity, Islamic banking practices have either become the law of the land or coexist and compete with Western practices in at least six countries. A growing number of institutions and mutual funds (akin to Western "socially responsible" funds) have established Islamic investment and other practices to cater to this burgeoning market. Because of its prevalence, practitioners in every banking-related area must familiarize themselves with current Islamic finance practices in order to do business with Muslim clients and to engage in cross-border financing. Injunctions from the "Qur'an and the sayings of Prophet Muhammed have generated a web of interrelated norms which prohibit Islamic financiers from engaging in transactions that involve interest "(riba) and speculation "(gharar). "Islamic Law and Finance describes the dynamic set of Islamically-sanctioned ways financiers can transact business.

Today's unprecedented pace of change leaves many people wondering what new technologies are doing to our lives. Has social media robbed us of our privacy and fed us with false information? Are the decisions about our health, security and finances made by computer programs inexplicable and biased? Will these algorithms become so complex that we can no longer control them? Are robots going to take our jobs? Can we provide housing for our ever-growing urban populations? And has our demand for energy driven the Earth's climate to the edge of catastrophe? John Browne argues that we need not and must not put the brakes on technological advance. Civilization is founded on engineering innovation; all progress stems from the human urge to make things and to shape the world around us, resulting in greater freedom, health and wealth for all. Drawing on history, his own experiences and conversations with many of today's great innovators, he uncovers the basis for all progress and its consequences, both good and bad. He argues compellingly that the same spark that triggers each innovation can be used to counter its negative consequences. Make, Think, Imagine provides an eloquent blueprint for how we can keep moving towards a brighter future.

Thrust of this book is to acquaint the reader with the obstacles overcome by a state whose past standing throughout the South and some of the northern sites had deteriorated from having over 40 SCV camps and 4 MOSB chapters to, by 1978, five camps and no active MOSB chapters. Under the leadership of Commander KH Bailey, his top adjutant Ray Hendrix and other carefully chosen staff members and some new camp commanders, the number of SCV Camps increased by 1986 to over 500 members in eleven camps. The MOSB chapters increased from 0 to 3. This increase in strength would have meant little in itself but what did these hardworking Tarheels accomplish during these nine years, 1977-1986? They hosted the first National SCV-MOSB Convention in NC in 1979, fifty years since the previous one in Charlotte in 1929! Long overdue was a monument to the Tarheels killed at the Battle of Bentonville in 1865. There were monuments to ALL Confederates killed and another one for the Texas killed. We "resurgents" built such a memorial. Read on for further outstanding contributions by these talented, hard charging Tarheels.

Islamic Law and Finance

A Translation Of Al Hidayah Fi Sharh Bidayat Al Mubtadi - Volume 1: A Classical Manual of Hanafi Law

The Hidayah has dominated the field of Islamic jurisprudence since the day it was written over 800 years ago. It has been the primary text used by Muslims jurist to issue authentic and reliable rulings on Islamic law according to the school of Imam Abu Hanifa (d 150H/767CE). The Hidayah

commands such an authoritative position amongst the doctors of law that the knowledge of a scholar who has not read it is not considered reliable. It has been a standard text in the curricula of Islamic law schools since the 12th century. It was first translated into English by Charles Hamilton in 1791. Around 70 huge commentaries, some spread over more than a dozen volumes have been written on it. The number of explanatory glosses is in thousands. Comprehensive in content and conveniently organized, with the publication of this all previous works that discussed Islamic jurisprudence according to the Hanafi law become outmoded and soon fell into disuse. If revealed books are not taken into account, never has a book received so much attention as the Hidayah. This landmark publication of the Hidayah not only has been translated in its entirety for the first time but has been done so from Arabic, the language in which it was written. The author, Shaykh Al Islam, Burhan Al-Din Marghanani (d 593 AH/ 1197 CE) was considered to be the leading jurist of the Muslim world in his times. "The hidayah is justly celebrated as the most practical and useful summary compilation of Hanafi jurisprudence. It has been a standard text in the curricula of Islamic law schools since the 12th century. It was first translated by Charles Hamilton in 1791. A new translation into modern English has been long overdue. This translation by Imran Ahsan Khan Nyazee is both precise and straight forward. With his knowledge of Islamic law and jurisprudence combined with his command of both the Arabic and English languages, he has conveyed the meaning of the original with great clarity. The hidayah is a dense work, intended for use in teaching Hanafi fiqh - it is a work that needs explication if its arguments are to be understood fully. This the translator has provided through this valuable notes" Dr Mohammad Akram Nadwi, research fellow, Oxford centre for Islamic studies, Oxford

This book discusses the bioremediation of both solid and liquid waste, including regional solutions for India as well as globally relevant applications. The topics covered include pollutant reduction through composting, solutions for petroleum refinery waste, use of microorganisms in the bioremediation of industrial waste and toxicity reduction, microbial fuel cells, and microbial depolymerisation. The book also explores the biosorption of metals and the bioremediation of leachates, especially with regard to soil and groundwater remediation. It is a valuable resource for researchers, professionals, and policy makers alike.

The current dynamics of world economy show remarkable changes in the socio-economics of credit provision and entrepreneurship. If the emergence of the sharing economy is fostering innovative models of collaborative agency, networking and venture business, economic actors are also looking for a more sustainable development, able to foster profitability as well as community welfare. This book investigates Islamic social finance as a paramount example of this economy under change, where the balance between economic efficiency and social impact is contributing to the transformation of the market from an exchange- to a community-oriented institution. The collected essays analyse the social dimension of entrepreneurship from an Islamic perspective, highlighting the extent to which the rationales of "sharing," distribution and cooperation, affect the conceptualization of the market in Islam as a place of "shared prosperity." Moving from the conceptual "roots" of this paradigm to its operative "branches," the contributing authors also connect the most recent trends in the financial market to Shari'ah-based strategies for community welfare, hence exploring the applications of Islamic social finance from the sharing economy, FinTech and crowdfunding to microcredit, waqf, zakat, sukuk and green investments. An illuminating reference for researchers, practitioners and policy-makers dealing with the challenges of a global market where not only is diversity being perceived as a value to be fostered, but also as an important opportunity for a more inclusive economy for everybody.

Entrepreneurs drive the future, and the last several decades have been a thrilling ride of astounding, far-reaching innovation. Behind this transformative progress are also the venture capitalists - who are at once the investors, coaches and allies of the entrepreneurs. William H. Draper III knows this story first-hand, because as a venture capitalist, he helped write it. For

more than 40 years, Bill Draper has worked with top entrepreneurs in fabled Silicon Valley, where today's vision is made into tomorrow's reality. The Startup Game is the first up-close look at how the relationship between venture capitalists and entrepreneurs is critical to enhancing the success of any economy. From a venture capitalist who saw the potential of Skype, Apollo Computer, Hotmail, OpenTable, and many other companies, come firsthand stories of success. In these pages, Draper explores how to evaluate innovative ideas and the entrepreneurs behind those ideas, and he shares lessons from Yahoo, Zappos, Baidu, Tesla Motors, Activision, Measurex, and more. Also, in revealing his on-the-ground account of how Deng Xiaoping brought China roaring into the modern world and how Manmohan Singh unlocked the creative genius of Indian entrepreneurs, Draper stresses the essential value of farsighted political leadership in creating opportunity. The author also discusses his efforts to bring best practices of the venture capitalist/entrepreneur partnership to the social sector. Written in an engaging narrative, and incorporating many of the author's personal experiences, this book provides a much-needed look at how the world of venture capital and entrepreneurship works.

Inside the Partnership between Venture Capitalists and Entrepreneurs

Harvard University Professor David C. McClelland is chiefly known for his work on achievement motivation, but his research interests extended to personality and consciousness. He pioneered workplace motivational thinking, developing achievement-based motivational theory and models, and promoted improvements in employee assessment methods, advocating competency-based assessments and tests, arguing them to be better than traditional IQ and personality-based tests. His ideas have since been widely adopted in many organisations, and relate closely to the theory of Frederick Herzberg. He is most noted for describing three types of motivational need, which he identified in this book, The Achieving Society: 1. achievement motivation (n-ach), 2. authority/power motivation (n-pow), 3. affiliation motivation (n-affil). First published in 1961, his classic book provides a factual basis for evaluating economic, historical, and sociological theories that explain the rise and fall of civilizations.

Forced labor is a serious & pervasive problem in the U.S. At any given time 10,000 or more people work as forced laborers in cities & towns across the country, & it is likely that the actual number is much higher, possibly tens of thousands. Because forced labor is hidden, inhumane, widespread, & criminal, sustained & coordinated efforts by U.S. law enforce., social service providers, & the general public are needed to expose & eradicate this illicit trade. This report documents the nature & scope of forced labor in the U.S. from Jan. 1998 to Dec. 2003. It is the first study to examine the numbers, demographic characteristics, & origins of victims & perpetrators of forced labor in the U.S. & the adequacy of the U.S. response to this growing problem. economic activities.

In 1437, after years of regency, the pious and gentle Henry VI, the Lamb, comes of age and accedes to the English throne. His poor health and frailty of mind render him a weakling king - Henry depends on his closest men, Spymaster Derry Brewer and William de la Pole, Duke of Suffolk, to run his kingdom. Yet there are those, such as the Plantagenet Richard, Duke of York, who believe England must be led by a strong king if she is to survive. With England's territories in France under threat, and rumours of revolt at home, fears grow that Henry and his advisers will see the country slide into ruin. With a secret deal struck for Henry to marry a young French noblewoman, Margaret of Anjou, those fears become all too real. As storm clouds gather over England, King Henry and his supporters find themselves besieged abroad and at home. Who, or what can save the kingdom before it is too late?

Digital Democracy considers how technological developments might combine with underlying social, economic and political conditions to produce new vehicles for democratic practice. The growth of new Information and Communication Technologies (ICTs) such as the Internet, alongside growing concerns about the failure of advanced societies to live up to the democratic idea, has produced much interest in the prospects for a digital democracy. This book will provide invaluable reading for those studying social policy, politics and sociology as well as for policy analysts, social scientists and computer scientists.

Numerology is the belief that numbers have power over events. It is a descendent of number mysticism, the belief the contemplation of numbers can give mystical and non-rational insights into life, the universe, and everything. Twenty-five hundred years ago, Pythagoras originated number mysticism, crediting certain numbers with characteristics, though numerology is a more recent invention that allots numbers, hence, characteristics to individuals. Underwood Dudley outlines here the history of number mysticism and numerology and gives many examples, including biorhythms, Bible-numberists, pyram.

It is said that the COVID-19 pandemic has turned back the poverty clock. As such, there is a need to have social mechanisms put in place to provide relief to those who are affected in this regard. Islamic social finance consists of tools and institutions that could be used to alleviate poverty. This book explores the impact of COVID-19 on Islamic finance to better understand the effectiveness of Islamic social finance in helping those who have been affected by poverty overnight due to the halt in all major economic activities in the context of the pandemic. Since the struggle against poverty in each country will be different, the book attempts to shed light on the experiences of different countries by presenting successful models of Islamic social finance. The book first looks at poverty and COVID-19 before delving into the role of Islamic social financial institutions and how they have risen against COVID-19. The book concludes by examining the impact of COVID-19 on Islamic microfinance. This book is the first of its kind on the subject of COVID-19, and it intends to bridge the gap in the literature.

Beat The Status Quo! Those who wish to improve are willing to make changes, others are dreamers. As Henry Ford so aptly put it: "If you always do what you've always done, you'll always get what you've always got." While this does not mean you have been unsuccessful, aspirations to move to a higher standard will require changes. What changes can a book like this offer? Beat The Curve is a compilation of authors who have outperformed the status quo. Their fields are different and their approaches are varied. Their ability and passion for their work, coupled with their perseverance, have allowed these Celebrity Experts(r) to soar to a higher level. While they have developed their successes in different ways, there are the common threads throughout. Why not be guided by a mountain climber who has been to the top before? To quote the Chinese philosopher, Confucius: Success depends upon previous preparation, and without such preparation there is sure to be failure. With the expert help available in the pages of this book, you will not only learn from their successes and their failures, but you will now have their guidance to help Beat The Curve.

Bukan mudah, tapi ia tidak mustahil. Sesiapa sahaja mampu bebas daripada hutang jika ada ilmu, kesedaran dan keazaman yang kuat. Kebanyakan mereka yang mengadu masalah kewangan, bukan disebabkan gaji yang diterimanya tak cukup, tetapi disebabkan masalah hutang yang dibuatnya sendiri. Bukan tak boleh berhutang, namun biarlah berhutang pada perkara yang benar-benar perlu, dan berhutanglah secara bijak (yang menjadikan kita lebih kaya). Beban kewangan terbesar bagi kebanyakan rakyat Malaysia ialah ansuran pinjaman membeli kereta, pinjaman peribadi, kad kredit dan hutang membeli rumah kediaman 'impian' yang mana jika tiada pun kita masih boleh hidup. Ia tidak seperti kos keperluan asas untuk hidup seperti makanan, pakaian dan tempat tinggal. Jadi sesiapa yang dapat bebas daripada hutang-hutang ini, kita terlepas daripada bebanan kewangan terbesar. Seterusnya kita bolehlah fokus mengumpul harta dan mengembangkan kekayaan.
