William G. Dever is recognized as the doyen of North American archaeologist-historians who work in the field of the ancient Levant. He is best known as the director of excavations at the site of Gezer but has worked at numerous other sites, and his many students have led dozens of other expeditions. He has been editor of the Bulletin of the American Schools of Oriental Research, was for many years professor in the influential archaeology program at the University of Arizona, and now in retirement continues actively to write and publish. In this volume, 46 of his colleagues and students contribute essays in his honor, reflecting the broad scope of his interests, particularly in terms of the historical implications of archaeology.

Image-based research methods, such as arts-based research, can fill the absence of the voice of impoverished, under-privileged populations. In What We See and What We Say, Ephrat Huss argues that images are deep and universally psycho-neurological constructs through which people process their experiences. The theoretical model demonstrated in this book demonstrates that images can be used to enable three different levels of communication: with self, with others similar to oneself, and with others who differ in terms of culture and power. Dr. Huss centers her argument on a case study of impoverished Bedouin women's groups in Israel who used art as self-expression, and includes many additional examples such as unemployed women and teenage girls in slums, women who have undergone sexual abuse, and the experiences of illegal immigrants. Ultimately, the author points to how the inherent structural characteristics of images help to intensify the voices of marginalized groups in research, therapy, empowerment, and social action.

An essential insight into this central figure in the modern history of Israel and Zionism. This important new study explores the years that built up to the Six Day War and details the crucial issues and events the world is still grappling with today. This book traces Daniel Ben-Gurion's waning years in Israeli politics. After his resignation from the office of prime minister in 1963, the 'Old Man' soon lost faith in his self-chosen successor, Levi Eshkol, and ceaselessly tried to undermine the latter's premiership, eventually forming a breakaway party. The events leading up to the Six-Day War in June 1967 caught Ben-Gurion by surprise. During the weeks-long 'waiting period' prior to the outbreak of hostilities, he paid little attention to daily security issues. But when war did erupt, he displayed one of his key leadership skills – the ability to formulate an accurate, independent situation assessment. It will be of interest to scholars working in Israeli politics and history, this is a lucid, thoroughly researched account of the sunset years of the driving force behind the Israeli nation-state.

The rapid increase in the demand for international tourism has led a growing number of people to seek holidays and travel experiences in both developed and developing countries. Yet little interest has been shown in the interface between tourism and health, *Health and the International Tourist*, first published in 1996, examines key relationships between travel, tourism and health. Particular attention is given to the behaviour and lifestyle of tourists and approaches to reducing the health risks associated with international travel and tourism. This was the first book to address tourist health in an interdisciplinary manner, with contributions

from professionals in medicine, health promotion, the travel and tourism industry and tourism researchers. It will provide a sound basis for further research and the development of health promotion strategies, and will be of interest to students of health and tourism.

In this illustrated book, some of Israel's foremost archaeologists present a survey of early life in the land of the Bible, from the Neolithic era (eighth millennium BC) to the fall of Jerusalem and the destruction of the First Temple in 586 BC. Each chapter covers a particular era and includes a bibliography.

Surviving the Holocaust is a compelling sociological account of two brothers who survived the Holocaust in Nazi-occupied Poland. One brother, the author's father, endured several concentration camps, including the infamous camp at Auschwitz, as well as a horrific winter death march; while the other brother, the author's uncle, survived outside the camps by passing as a Catholic among anti-Semitic Poles, including a group of anti-Nazi Polish Partisans, eventually becoming an officer in the Soviet army. As an exemplary "theorized life history," Surviving the Holocaust applies concepts from life course theory to interpret the trajectories of the brothers' lives, enhancing this approach with insights from agency-structure and collective memory theory. Challenging the conventional wisdom that survival was simply a matter of luck, it highlights the prewar experiences, agentive decision-making and risk-taking, and collective networks that helped the brothers elude the death grip of the Nazi regime. Surviving the Holocaust also shows how one family's memory of the Holocaust is commingled with the memories of larger collectivities, including nations-states and their institutions, and how the memories of individual survivors are infused with collective symbolic meaning.

The Story of Palestine's Stonemasons and the Building of Israel "They demolish our houses while we build theirs." This is how a Palestinian stonemason, in line at a checkpoint outside a Jerusalem suburb, described his life to Andrew Ross. Palestinian "stone men," utilizing some of the best quality dolomitic limestone deposits in the world and drawing on generations of artisanal knowledge, have built almost every state in the Middle East except their own. Today the business of quarrying, cutting, fabrication, and dressing is Palestine's largest employer and generator of revenue, supplying the construction industry in Israel, along with other Middle East countries and even more overseas. Drawing on hundreds of interviews in Palestine and Israel, Ross's engrossing, surprising, and gracefully written story of this fascinating, ancient trade shows how the stones of Palestine, and Palestinian labor, have been used to build out the state of Israel--in the process, constructing "facts on the ground"--even while the industry is central to Palestinians' own efforts to erect bulwarks against the Occupation. For decades, the hands that built Israel's houses, schools, offices, bridges, and even its separation barriers have been Palestinian. Looking at the Palestine-Israel conflict in a new light, this book asks how this record of achievement and labor can be recognized.

By looking at history and geography it is clear that many end-time passages from the Old Testament prophecies have been fulfilled. Applying the same process to the familiar New Testament end-time passages, Butler shows that most of these prophecies have also been fulfilled.

This fascinating urban anthropological analysis of Sarajevo and its cultural complexities examines contemporary issues of social divisiveness, pluralism, and intergroup dynamics in the context of national identity and state formation. Rather than seeing Bosnia-Herzegovina as a volatile postsocialist society, the book presents its capital city as a vibrant yet wounded center of multicultural diversity, where citizens live in mutual recognition of difference while asserting a lifestyle that transcends boundaries of ethnicity and religion. It further illuminates how Sarajevans negotiate group identity in the tumultuous context of history, authoritarian rule, and interactions with the built environment and one another. As she navigates the city, Fran Markowitz shares narratives of local citizenry played out against the larger dramas of nation and state building. She shows how Sarajevans' national identities have been forged in the crucible of power, culture, language, and politics. Sarajevo: A Bosnian Kaleidoscope acknowledges this Central European city's dramatic survival from the ravages of civil war as it advances into the present-day global arena.

How a controversial biblical tale of conquest and genocide became a founding story of modern Israel No biblical text has been more central to the politics of modern Israel than the book of Joshua. Named after a military leader who became the successor to Moses, it depicts the march of the ancient Israelites into Canaan, describing how they subjugated and massacred the indigenous peoples. The Joshua Generation examines the book's centrality to the Israeli occupation today, revealing why nationalist longing and social reality

are tragically out of sync in the Promised Land. Though the book of Joshua was largely ignored and reviled by diaspora Jews, the leaders of modern Israel have invoked it to promote national cohesion. Critics of occupation, meanwhile, have denounced it as a book that celebrates genocide. Rachel Havrelock looks at the composition of Joshua, showing how it reflected the fractious nature of ancient Israelite society and a desire to unify the populace under a strong monarchy. She describes how David Ben-Gurion, Israel's first prime minister, convened a study group at his home in the late 1950s, where generals, politicians, and professors reformulated the story of Israel's founding in the language of Joshua. Havrelock traces how Ben-Gurion used a brutal tale of conquest to unite an immigrant population of Jews of different ethnicities and backgrounds, casting modern Israelis and Palestinians as latter-day Israelites and Canaanites. Providing an alternative reading of Joshua, *The Joshua Generation* finds evidence of a decentralized society composed of tribes, clans, and woman-run households, one with relevance to today when diverse peoples share the dwindling resources of a scarred land.

Taking the terrorist attacks of 9/11 as their starting point, five new essays look at how Jewish culture has changed over the past two decades. Covering music (Vanessa Paloma Elbaz), art (Monica Bohm Duchon), literature (Bryan Cheyette), theatre (Judi Herman) and film (Nathan Abrams), the essays explore the role of confidence in the cultural output of minority communities, and ask whether the trends identified look set to continue over the coming years. Commissioned to mark the twentieth anniversary of Jewish Renaissance magazine, the book includes a foreword by Howard Jacobson and is interspersed with a selection of the best articles from the magazine's archive, including pieces by the director Mike Leigh, author Linda Grant and sociologist Keith Kahn-Harris.

Evangelicals Encounter Judaism In The New Millennium

Predictions for a New Millennium

Age of Confidence: The New Jewish Culture Wave

There is an old Jewish adage that pretty much sums up Israel's experience among the nations for the last 2,000 years. "Scratch a gentile," the saying goes, "and you're sure to find an anti-Semite." That notion is given credence by the fact that the first two millennia of the Jewish-Christian encounter culminated in the systematic slaughter of six-million Jews in the heart of Christendom. But Dr. Paul R. Carlson, author of Christianity After Auschwitz, is cautiously optimistic that the dawn of this new millennium may lead to Jewish-Christian amity as the Church faces up to its past sins and seeks to work with the Synagogue against those demonic forces which threaten civilization itself. However, as Carlson illustrates, the genocidal germ that gave birth to Hitler's criminal regime still flourishes among countless Christians, many of whom would passionately deny they harbor any anti-Semitic notions or sentiments. While the book is addressed primarily to Carlson's fellow evangelicals, both Jews and Christians will discover that it provides the general reader with an overview of those critical issues which scholars alone have in the past wrestled with in the post-Holocaust Jewish-Christian encounter. At the outset, Carlson is quick to concede that the late Rabbi Joseph B. Soloveitchik, a scion of the great Chechnowa Rebbe, was certainly correct when he insisted that "Christians have never tried to penetrate the soul of the Jews. "They have read the Bible but neglected the oral tradition by which we interpret it," he noted. "This makes a different Bible altogether. For example, says Rav Soloveitchik: "To equate Judaism with legalism the way Christian theologians are prone to do is like equating mathematics with a compilation of mathematical equations." By the same token, old stereotypes die hard. "The Jew has been pictured as the arch-capitalist and the arch-Bolshevik and chastised for being both, whipsawed by contending forces," says Nathan C. Belth. "The Soviet authorities [saw] Jews as a threat to the state, and Alexander Solzhenitsyn, who castigate[d] Soviet terror, sees Jews as libertarians who brought on socialism, after, of course, rejecting Christ." Since time-immemorial, anti-Semites have also portrayed the Jew as the greedy, shady businessman or banker. But they conveniently forget stories such as that of Haym Salomon [1740-1785], the Jewish broker whose financial aid staved off starvation and desertion among American troops during our War for Independence. At one critical point, Robert Morris, the American financier and statesman, sent a messenger to alert Haym Salomon of the plight of the cash-strapped Colonial forces. The man brought the news to Salomon while he was attending Yom Kippur services at Mikveh Israel Synagogue in Philadelphia. The congregation was shocked at the intrusion on the holiest day of the Jewish year; but Haym Salomon quietly informed the messenger: "Tell Mr. Morris our country's appeal will not be in vain." But that old canard about Jews and their money remains grist for the anti-Semite's mill. By the same token, Jews have not been entirely blameless when it comes to their own stereotypes of Christians, particularly evangelicals. Nathan Perlmutter confessed as much during his tenure as national director of the Anti-Defamation League (ADL) of B'nai B'rith. "Our image of the fundamentalist and the evangelical is a kind of collage assembled out of bits and pieces from Theodore Dreiser, Sinclair Lewis and Erskine Caldwell . . .," he admitted. "Even after all this time memories of the great swarm of sex-ridden, Bible-thumping caricatures continue to exert a pervasive power." But evangelicals would be among the first to admit that Jews have come a long way since the days of the infamous Toledot Yeshu, or Life of Jesus, which depicted the Galilean in scandalous terms. Indeed, the Israeli author Shalom Ben-Chorin is representative of those Jewish intellectuals who now believe that "it is time for Jesus to come home again." Meanwhile, few Christians realize just how vulnerable many Jews feel in what they perceive to be "Christian America." That perception is heightened by the 1992 American Jewish Year Book finding that "roughly 12 percent of Americans of Jewish heritage are now Christians." "There is another way of looking at what I have called a disaster in the making," says former US Assistant Secretary of State Elliott Abrams, author of Faith or Fear: How Jews Can Survive in a Christian America "Of the 6.8 million people who are Jews or of Jewish descent, 1.1 million say they have no religion and 1.3 million have joined another religion, adding up to 2.4 million," Abrams observes. "This means that one-third of the people in America of Jewish ethnic origin no longer report Judaism as their current religion (Abrams italics). Such statistics illustrate why Jewish leaders unanimously condemn those Christian missionary agencies which

specifically target Jews for conversion. They have been particularly incensed by one recent evangelical effort, known as Peace 2000, which aimed to convert every Jew in Israel to Christianity by the dawn of the new millennium. "Centuries of martyrdom are the price which the Jewish people has paid for survival," says Brandeis scholar Marshall Sklare. "And the apostate, at one stroke, makes a mockery of Jewish history. "But if the convert is contemptible in Jewish eyes," Sklare adds, "the missionary — all the more, the missionary of Jewish descent -- is seen as pernicious, for he forces the Jew to relive the history of his martyrdom, all the while pressing the claim that in approaching the Jew he does so out of love. "What kind of love is it, Jews wonder, that would deprive a man of his heritage," Sklare asks. "Furthermore, given the history of Christian treatment of the Jews, would it not seem time at last to recognize that the Jew has paid his dues and earned the right to be protected from obliteration by Christian love as well as destruction by Christian hate?" The distinguished Rabbi Abraham Joshua Heschel was even more pointed about the matter. "I had rather enter Auschwitz," he once remarked, "than be an object of conversion." All of this leads to the opening chapter of Christianity After Auschwitz, which introduces Christians to Emil Fackenheim's "Eleventh Commandment" — or 614th Mitzvoth — which decrees that Jews are not permitted to grant Hitler any posthumous victories through intermarriage, assimilation, or conversion to a faith not their own. In a word, they are commanded to remain Jews. By the same token, Jewish scholars are quick to recognize that any "open and honest" dialogue will at some point involve a frank discussion of the similarities and differences between the Jewish and Christian perception[s] of the Messianic hope. With that understanding, the second chapter deals with the remarkable career of the late Rabbi Menachem Mendel Schneerson, the seventh and last Grand Rebbe of the Chabad Lubavitch Hasidim. Many of his talmidim, or disciples, believe he will ultimately be revealed as King-Messiah. His life and work are considered within the context of that of Jesus of Nazareth, as well as those of several pseudo-messiahs who have troubled Israel down through the centuries The author then makes it clear that Jesus himsel

This new book by historian David Ohana analyzes Zionism and the Israeli state as a theological ideology. The book pursues this provocative end by showing the dialectical tension between Judaism and Zionism. How has Zionism molded perceptions and images that were formed in the Jewish past, and to what extent were these Jewish themes reflected, modified, and crystallized in the national culture of the State of Israel? Nationalizing Judaism covers constituent topics such as Messianism, Utopianism, territorialism, collective memory, and political myths along with the critics that threatened to undermine Zionist appropriations and constructs. Thus, in addition to the 1942 "Million Plan" and territorial redemptionist views, the book discusses fundamental critiques of Messianism penned by the historians Gershom Scholem and Jacob Talmon and de-territorial perceptions of the Levant by the writer and the essayist Jacqueline Kahanoff. Nationalizing Judiasm closes with the nationalization of the desert, the vision of David Ben-Gurion ("the old man") who proclaimed statehood in 1948, as shown by his funeral and the symbolic memory of his grave. In its attempt to acquire historical legitimation Zionism appropriated themes and myths from the Jewish past, yet these appropriations were differentiated as they had selectively culled elements that suited the national ethos. The book opens with Ben-Gurion's messianic vision and comes full circle with his death in 1973.

Theory and Practice in Mediterranean Archaeology: Old World and New World Perspectives brings together leading scholars from the Old World and the Americas to discuss some of the most pressing issues facing archaeology today. These topics include archaeology and text, the future of large-scale archaeological fieldwork at individual sites, interpretation and preservation of archaeological sites and landscapes, past trajectories and new approaches to regional survey, and debates surrounding landscape and settlement archaeology. Essays by Old World archaeologists provide an overview of these themes, as well as a history of research over the last hundred years. These scholars review the major successes and shortcomings of that work, identifying critical issues that determine and define the field. These essays serve as a springboard for discussion and response by archaeologists working in the Americas and in other parts of the world. The combination of an Old World focus with responses from New World archaeologists provides a uniquely broad assessment of contemporary archaeological theory, methods, and practice throughout the world.

Technology is not value-free; nor does it exist in a vacuum. It needs a social basis - technology is affected by society and influences it. Technology, Values, and Society illustrates this using an examination of cross-cultural case studies representing simple, intermediate, and complex societies. Certain forms of technology exist when conducive values and structures sustain them. However, this relationship is not one-way.

Technological changes do precipitate social and value changes. It is impossible to sustain egalitarian values in a society involving technology based on hierarchical relationships. Understanding this connection is vital if we are to keep some control over the way in which technology affects us. This revised edition brings the topic to life for both faculty and students.

This book is an in-depth portret of investment opportunity in the Middle East as it stands today. For each of sixteen countries, the author provides in-depth analysis of current economic, political, and business issues, with detailed attention to legislation in such vital areas as currency and banking, intellectual property rights,

investment incentives, trade regulation, business form and structures, taxation, and the laws applicable to labor and environmental issues, as well as a description of relevant judicial procedures. The Middle East in the New Millennium represents the clearest indication we have yet of the prospects for crystallization of this region and the likely pace and aspect of economic liberalization.

This collection of essays presents a synthesis of current research on the Oxus Civilization, which rose and developed at the turn of the 3rd to 2nd millennia BC in Central Asia. First discovered in the 1970s, the Oxus Civilization, or the Bactria-Margiana Archaeological Complex (BMAC), has engendered many different interpretations, which are explored in this volume by an international group of archaeologists and researchers. Contributors cover all aspects of this fascinating Bronze Age culture: architecture; material culture; grave goods; religion; migrations; and trade and interactions with neighboring civilizations, from Mesopotamia to the Indus, and the Gulf to the northern steppes. Chapters also examine the Oxus Civilization's roots in previous local cultures, explore its environmental and chronological context, or the possibly coveted metal sources, and look into the reasons for its decline. The World of the Oxus Civilization offers a broad and fascinating examination of this society, and provides an invaluable updated resource for anyone working on the culture, history, and archaeology of this region and on the multiple interactions at work at that time in the ancient Near East.

Is there life for the family in the 21st century? Pessimists view the traditional two-parent nuclear family as a relic of the past, attributing their gloomy outlook to increased demands from the workplace, rampant technological advancement, and the pursuit of personal achievement at the expense of interpersonal needs and values. Optimists, on the other hand, claim that increasing alienation and emphasis on the occupational sphere necessitate a sense of family, community, and belonging as a haven from work-related stress. This volume addresses these and related issues such as the interplay of personal versus interpersonal factors in family development, the role of the extended family, and the interface between work, community and family. The contents of this book--scholarly contributions from a unique interdisciplinary rostrum of behavioral scientists in such diverse fields as psychology, sociology, anthropology, social work, industrial management, and demography--represent the latest developments in research, theory, and practice in family studies. The reader is presented with theoretical formulations, empirical findings, and applied interventions regarding family life in different parts of the world. A systems perspective is adopted as the family is examined at its interface with individuals, community, society, and culture, with the interdependence of these different levels emphasized. In addition, an attempt is made to integrate the work of theoreticians, researchers, and practitioners in understanding the evolving family. Dreman provides a survey of family life in the international arena and finds a surprising consensus between the different disciplinary perspectives and the respective geographical arenas. He discusses life-span issues in relation to all levels of family life including the impact of increased longevity and decreased fertility in relation to topics such as individual development, parent-child and couple relationships, the workplace, and the community. This book also highlights the interplay of biological and interpersonal dynamics as in the case of spousal depression.

The role of the museum is a contentious one. The last fifteen years have seen scholars point to ways in which states - particularly imperial states - use museums as sites to showcase looted treasure, to document their geographic expansion, to present the state as the guardian of the national treasure, and to educate citizens and subjects. This period has also seen a great deal of attention paid to the reshaping of national histories and values in the wake of the collapse of the Communist bloc and the emergence of the

European Union. (Re)Visualizing National History brings these two streams of scholarship together, treating the wave of monument and museum building in Europe as part of an attempt to forge consensus in politically unified, but deeply divided nations. The essays in this collection explore the ways in which museums exhibit new national values, and, equally important, how the realization of these new museums (and new exhibits in older museums) reflects the search for a new consensus among different generational groups in Europe and in North America. The approach of the volume is deliberately interdisciplinary. The contributors come from a variety of countries in Europe and North America, speaking from the perspectives of cultural studies, history, art history, anthropology, and sociology, as well as museum studies.

Turkey's involvement in the Gulf War in 1991 paved the way for the country's acceptance into the European Union. This book traces that process and in the first part looks at Turkey's foreign policy in the 1990s, considering the ability of the country to withstand the repercussions of the fall of communism. It focuses on Turkey's achievement in halting and minimising the effects of the temporary devaluation in its strategic importance that resulted from the waning of the Cold War and the disintegration of the Soviet Union, the skilful way in which Turkey avoided becoming embroiled in the ethnic upheavals in Central Asia, the Balkans and the Middle East, and the development of a continued policy of closer integration into the European and western worlds. Internal politics are the focus of the second part of the book, addressing the curbing of the Kurdish revolt, the economic gains made, and the strengthening of civil society. Nachmani goes on to analyse the prospects for Turkey in the twenty-first century, in the light of the possible integration into Europe, which may leave the country's leadership free to deal effectively with domestic issues. This book will make crucial reading for anyone studying Turkish politics, or indeed European or European Union politics.

Winner of the 2017 National Jewish Book Award/Everett Family Foundation Book of the Year, this is the definitive biography of the iron-willed leader, chain-smoking political operative, and tea-and-cake serving grandmother who became the fourth prime minister of Israel. Born in tsarist Russia in 1898. Golda Meir immigrated to America in 1906 and grew up in Milwaukee. where from the earliest years she displayed the political consciousness and organizational skills that would eventually catapult her into the inner circles of Israel's founding generation. Moving to mandatory Palestine in 1921 with her husband, the passionate socialist joined a kibbutz but soon left and was hired at a public works office by the man who would become the great love of her life. A series of public service jobs brought her to the attention of David Ben-Gurion, and her political career took off. Fund-raising in America in 1948, secretly meeting in Amman with King Abdullah right before Israel's declaration of independence, mobbed by thousands of Jews in a Moscow synagogue in 1948 as Israel's first representative to the USSR, serving as minister of labor and foreign minister in the 1950s and 1960s, Golda brought fiery oratory, plainspoken appeals, and shrewd-making to the cause to which she had dedicated her life--the welfare and security of the State of Israel and its people. As prime minister, Golda negotiated arms agreements with Richard Nixon and Henry Kissinger and had dozens of clandestine meetings with Jordan's King Hussein in the unsuccessful pursuit of a land-for-peace agreement with Israel's neighbors. But her time in office ended in tragedy, when Israel was caught off guard by Egypt and Syria's surprise attack on Yom Kippur in 1973. Resigning in the war's aftermath, Golda spent her final years keeping a hand in national affairs and bemusedly enjoying international acclaim. Francine Klagsbrun's superbly researched and masterly recounted story of Israel's founding mother gives is a Golda for the ages.
