

Berlin Spandau In Times Of Change

This anniversary study presents a readable, informative account of the development and current structure of Berlin. Migration has, across time, contributed to the development and reshaping of societies and urban spaces. Today, migration movements have become a global phenomenon, where the number of countries affected--socially, economically and culturally--by migration is continually increasing. As in past times, the reasons why people move are varied and often intertwined. Sometimes it is about people fleeing poverty, war, ethnic conflicts, environmental disasters or different forms of persecution--for example religious. However, people also move for other reasons, such as work and studies in other countries, or out of curiosity and a sense of adventure. International migration and mobility have implications for many sectors in society, including the museum sector. To be in tune with the times and relevant to all citizens, the museum sector needs, more than ever, to address issues that transcend national borders. As important educational institutions often visited by, amongst others, schoolchildren, museums have the potential to affect our notions of the world. By making museums places for exploring and learning about both the past and the present of issues such as migration, mobility, transnational connections and human rights, they not only become more relevant as cultural institutions, but may also facilitate positive changes in how people relate to each other in the wider society--thereby ultimately contributing to society's sustainable development. This book seeks to contribute to the discussion about how museums can improve their engagement in issues of migration and becoming more inclusive. The book provides both relevant theoretical reflections and new and innovative empirical examples on museums' engagement in migration from several parts of the world. Several distinguished scholars and curators discuss and reflect on museums' perspectives, collecting practices, collaborations, and representations of migration.

Beginning with the serpent in the Garden of Eden and ending with O.J. Simpson, author George Anastaplo offers an exploration of justice and the rule of law through well-known trials both ancient and modern, real and fictional. On Trial is a detailed and fascinating discussion of legal reason, moral judgment, political life, and the events that give them meaning.

'Tony Le Tissier is arguably the finest English-language historian of the Battle of Berlin' defenceWeb The Battle of Berlin was a battle on an unprecedented scale. The Soviets massed 1.6 million troops for Operation Berlin, and Marshal Zhukov in the centre had half of them, but his initial attack floundered, lasting four days instead of one. It was so costly that he had to revise his plans for taking the city, and to revise them yet again when Stalin allowed his rival, Marshal Koniev, to intervene. The battle thus became a contest for the prize of the Reichstag. Meanwhile, Hitler and his courtiers sought to continue the struggle in the totally unrealistic atmosphere that prevailed in his bunker, while soldiers and civilians alike suffered and perished unheeded all around them. In The Battle of Berlin 1945, Tony Le Tissier brings us the definitive history of the last great battle of the Second World War – a fight to the death in the smouldering ruins of the capital of Hitler's Third Reich.

Time Out Berlin helps travelers get the best out of the ever-changing German capital, giving them the inside track on local culture plus hundreds of independent venue reviews. Besides the coverage of visitor essentials, the guide explores detailed coverage of the cultural and historical sites, and the town's legendary nightlife. This ninth edition covers all aspects of life in the capital city, from festivals and nightlife to avant-garde arts. The home of over 150 museums and 50 theaters, Berlin attracts tourists all year long. The chaotic post-reunification a decade ago, gave rise to a vibrant subculture, as artists and bohemians flooded into the city from around Germany and the world. In the melting pot, fashion, photography, architecture, product design, music, parties all benefitted and continue to thrive.

When the Allies occupied Germany at the end of the Second World War, there were two million men present to witness the devastating end of the Third Reich. Few of them could have imagined just how long this occupation was going to last - right up to the fall of the Berlin Wall in 1989 and well into its aftermath. Today some 17,000 British troops remain in Germany. But over the past four and a half decades, tens of thousands of British men and women have alived and worked in British Zone as members of the British Army of the Rhine (BAOR) some for

relatively short periods, many for much longer. Long enough, though, for the experience to have a profound effect on their lives and on their attitudes. THE LONG PATROL reveals what life has been like in the British Zone for those men and women and their families. As the post war worlds of Britain and Germany had little in common, they had to find their own identity, often suspended between the two. And what did the Germans make of the British? How did they react when whole streets, sometimes whole districts, were requisitioned and occupied? What were the psychological effects of a foreign army taking over the barracks of what had been, until so recently, the homes of the warriors of the 1,000 Year Reich? Eventually the British became more and more insulated against the culture around them, building their own camps, their own cinemas. In major centres like Berlin they lived a separate life whilst all around them Germany got on with the massive task of reconstruction. In the background there lurked the ever-present spectre of a possible Third World War. Based largely on interviews and information culled from personal diaries and letters. THE LONG PATROL is primarily an oral history of the British in Germany. It also analyses and interprets experiences in an attempt to begin to make sense of an unusual, and still significant, part of British history in the twentieth century. Funny, tragic, bizarre and poignant in equal parts, THE LONG PATROL is an important contribution to the social history of post-war Britain and Germany.

Spandau Guard

RAF Bomber Command Prisoners-of-War in Germany 1939 - 1945

At the Nuremberg War Crimes Tribunal, Albert Speer, Hitler's one-time number two, persuaded the judges that he 'knew nothing' of the Holocaust and related atrocities. Narrowly escaping execution, he was sentenced to twenty years in Spandau Prison, Berlin. In 1961, the newly commissioned author, as the British Army Spandau Guard Commander, was befriended by Speer, who taught him German. Adrian Greaves' record of his conversations with Speer over a three year period make for fascinating reading. While the top Nazi admitted to Greaves his secret part in war crimes, after his 1966 release he determinedly denied any wrongdoing and became an intriguing and popular figure at home and abroad. Following Speer's death in 1981 evidence emerged of his complicity in Hitler's and the Nazi's atrocities. In this uniquely revealing book the author skilfully blends his own personal experiences and relationship with Speer with a succinct history of the Nazi movement and the horrors of the 1930s and 1940s. In so doing new light is thrown on the character of one of the 20th century's most notorious characters.

If any city in the world can be called 'unique' it is Berlin. The Wall may have come down more than a decade ago, but the capital of re-united Germany remains one of the most fascinating and rapidly changing urban areas in Europe. With the help of local journalists, writers and experts, the Time Out Berlin Guide takes you beneath the skin of the city.

Winner of the National Jewish Book Award: "This valuable resource covers an aspect of the Holocaust rarely addressed and never in such detail." —Library Journal This is the first volume in a monumental seven-volume encyclopedia, reflecting years of work by the Jack, Joseph, and Morton Mandel Center for Advanced Holocaust Studies at the United States Holocaust Memorial Museum, which will describe the universe of camps and ghettos—many thousands more than previously known—that the Nazis and their allies operated, from Norway to North Africa and from France to Russia. For the first time, a single reference work will provide detailed information on each individual site. This first volume covers three groups of camps: the early camps that the Nazis established in the first year of Hitler's rule, the major SS concentration camps with their constellations of subcamps, and the special camps for Polish and German children and adolescents. Overview essays provide context for each category, while each camp entry provides basic information about the site's purpose; prisoners; guards; working and living conditions; and key events in the camp's history. Material from personal testimonies helps convey the character of the site, while source citations provide a path to additional information.

The title itself refers to the footprints taken by an expat family across the world. the foot prints refer to the literally as well as to the figuratively. the stories sometimes tell about family life. Sometimes the stories tell of discoveries welcome and unwelcome, and sometimes the stories tell of adventures unforeseen. the stories may make some uncomfortable, but perhaps each story's atmosphere will make another expat' family nod their head in recognition. the book tells of good times and not so good times; it also tells about different cultures and past history. It is stories of love, laughter, anger, loyalty, and betrayal. It is an emotional journey that spans over thirty years.

This proceedings volume consists of papers presented at the Seventh International Workshop on Computer-Aided Scheduling of Public Transport, which was held at the Massachusetts Institute of Technology from August 5 to 8, 1997. In the tradition of alternating Workshops between North America and Europe - Chicago (1975), Leeds (1980), Montreal (1983), Hamburg (1986), Montreal (1990), and Lisbon (1993), Cambridge (Massachusetts, USA) was selected for the Workshop in 1997. As in earlier workshops, the central theme dealt with vehicle and crew scheduling problems and the development of software systems incorporating operations research techniques for operational planning in public transport. However, following the trend that started in Hamburg in 1987, the scope of this Workshop was broadened to include topics in related fields. Two trends underlie this. First, the recognition that the core scheduling issues in public transport have important common elements with other application areas in which extensive work is also underway, and that it is vital to learn from these other initiatives. Second, while scheduling is indeed

a core problem in public transport planning, and has shown the first and greatest benefits from computer application, it is intimately related to the preceding tasks in the planning hierarchy, such as service design, and the following tasks such as operations control and public information.

From Berlin to Berkeley is an intellectual portrait of one of America's leading social scientists, Reinhard Bendix, and his father, Ludwig Bendix. It is a story of cultural identity and assimilation, of survivors from a course of events that destroyed millions of lives. Reinhard Bendix offers a profound and moving account of his father's life as a lawyer and critic of the German judicial system, his break with Judaism and identification with German culture, and his emigration to Palestine during Hitler's regime. Bendix then examines the relationship with his father and details his youth in Germany, his emigration to America, and his early career as a scholar.

After World War II Berlin became one of the playgrounds of the Cold War; the Berlin Wall made the division between East and West, between 'capitalism' and 'communism' in 1961 highly visible, though it did remove Berlin from front-line politics. East and West Berlin had turned into shop-windows of ideologies – West Berlin representing the lure of a market economy, East Berlin the promise of socialism. It is, then, fitting that the fall of the Wall in 1989 awarded Berlin such a prominent role. It was here that the development after Reunification of East and West became a closely observed event – and, well beyond Germany, Berlin appeared to represent fundamental developments throughout Europe at the time. Today, Berlin is the capital of reunified Germany and therefore one of the key political players in the European Union (EU) and it's now a desirable destination for young entrepreneurs. The Historical Dictionary of Berlin contains a chronology, an introduction, and an extensive bibliography. The dictionary section has more than 300 cross-referenced entries on important personalities, places, institutions, and events. This book is an excellent resource for students, researchers, and anyone wanting to know more about Berlin.

SPANDAU GUARD is set during December 1979 at the notorious Spandau Prison in West Berlin, Germany. Spandau Prison is home to the last of the Spandau 7; the seven convicted World War II war criminals (Konstantin von Neurath, Erich Raeder, Karl Dönitz, Walther Funk, Albert Speer, Baldur von Schirach, and Rudolf Hess) that were sentenced to spend between 10 years to life at the prison. December is also the month the United States Army in Berlin is in charge of guarding the prison. A very interesting changeover with the Soviets sets the basis for a story that reaches back to the early days of the Third Reich. U.S. Army Infantryman Alfredo Ledesma along with his fellow soldiers, struggle through the 31-day rotation of boredom, cold Berlin nights, and the holiday season they can only see and enjoy from afar. As the month of Spandau Guard duty progresses, some strange things start to happen until they come to a head on Christmas Eve.

Cable-nets, membrane roofs, and unique bridges are among the structures designed by Schlaich and his partners.

The unexpected arrival of Soviet troops at the end of January 1945 at the ancient fortress and garrison town of Kstrin came as a tremendous shock to the German High Command - the Soviets were now only 50 miles from Berlin itself. The Red Army needed the vital road and rail bridges passing through Kstrin for their forthcoming assault on the capital, but flooding and their own high command's strategic blunders resulted in a sixty-day siege by two Soviet armies which totally destroyed the town. The delay in the Soviet advance also gave the Germans time to consolidate the defenses shielding Berlin west of the Oder River. Despite Hitler's orders to fight on to the last bullet, the Kstrin garrison commander and 1,000 of the defenders managed a dramatic breakout to the German lines. The protracted siege had an appalling human cost - about 5,000 Germans were killed, 9,000 wounded and 6,000 captured, and the Russians lost 5,000 killed and 15,000 wounded. Tony Le Tissier, in this graphic and painstakingly researched account, has recorded events in extraordinary detail, using the vivid eyewitness testimony of survivors to bring the story of the siege to life.

A Sea of Love presents 95 letters exchanged between the famous Berlin born scholar Francis Lieber and his wife Mathilde who in 1839-1845 lived separated by the Atlantic, in Columbia/SC and Hamburg. Their writings reflect general notions and ideas shared by well-educated citizens of an Atlantic Republic of Letters connected by culture, interests, and emotions.

In 1937, Canadian Prime Minister Mackenzie King travelled to Nazi Germany in an attempt to prevent a war that, to many observers, seemed inevitable. The men King communed with, including Adolf Hitler, had assured him of the Nazi regime's peaceful intentions, and King not only found their pledges sincere, but even hoped for personal friendships with many of the regime officials. Four Days in Hitler's Germany is a clearly written and engaging story that addresses how King truly believed that any threat to peace would come only from those individuals who intended to thwart the Nazi agenda, which as King saw it, was concerned primarily with justifiable German territorial and diplomatic readjustments. Mackenzie King was certainly not alone in misreading the omens in the 1930s, but it would be difficult to find a democratic leader who missed the mark by a wider margin. This book seeks to explain the sources and outcomes of King's misperceptions and diplomatic failures, and follows him as he returns to Germany to tour the appalling aftermath of the very war he had tried to prevent.

A Novel

Cities are built over the remnants of their past buried beneath their present. We build on what has been built before, whether over foundations formalising previous permanency or over the temporal occupations of ground. But what happens when you shift a city - when you dislodge its occupation of ground towards a new ground, bury it and forget it? Focusing on Berlin's destruction during World War II and its reconstruction after the end of the war, this book offers a rethinking of how the practices of destruction and burial combine to reform the city through geography and how burying a city is intricately tied to forgetting destruction, ruination and trauma. Created from 25 million cubic meters of rubble produced during World War II, Teufelsberg (Devil's Mountain) is the exemplar of the destroyed city. Its critical journey is chronicled in combination with Berlin's seven other rubble hills, and their connections to constructing forgetting through burial. Furthermore, the book investigates Berlin's sublime relation to Albert Speer's urban vision to rival the ancient cities of Rome and Athens through their now shared geographies of seven hills. Finally, there is a central focus on the role of the citizens who cleared Berlin's streets of rubble, and the subsequent human relationships between people and ruins. This book is valuable reading for those interested in Architectural Theory, Urban Geography, Modern History and Urban Design.

This extensive book is divided into two parts. The first, which has eighteen chapters, deals with German POW camps as they were opened, in chronological order and to which the Bomber Command POWs were sent. Each chapter includes anecdotes and stories of the men in the camps - capture, escape, illness, and murder - and illustrates the awfulness of captivity even in German hands. Roughly one in every twenty captured airmen never returned home. The first part also covers subjects such as how the POWs were repatriated during the war; how they returned at war's end; the RAF traitors; the war crimes; and the vital importance of the Red Cross. The style is part reference, part gripping narrative, and the book will correct many historical inaccuracies, and includes previously unpublished photographs. The second part comprises an annotated list of ALL 10,995 RAF Bomber Command airmen who were taken prisoner, together with an extended introduction. The two parts together are the fruit of exhaustive research and provide an important contribution to our knowledge of the war and a unique reference work not only for the serious RAF historian but for the ex-POWs themselves and their families and anyone with an interest in the RAF in general and captivity in particular.

Describes in detail Soviet-German activities on the Oder River barely 40 miles from Berlin from the end of January 1945 to the culmination of the four-day breakthrough battle that decided the fate of the German capital.

This edited collection brings together academics, artists and members of civil society organizations to engage in a discussion about the ideas of living with others, through concepts such as cosmopolitanism, solidarity, and conviviality, and the practices of doing so. In recent years, right wing and populist movements have emerged and strengthened across Europe and North America, rejecting the value of cultural, ethnic and religious plurality. Governments in Europe and North America are weakening their commitment to the international refugee regime, erecting new barriers to entry. Even as governments fail to accommodate growing pluralism, however, civil society initiatives have emerged with the aim of welcoming newcomers, such as migrants and refugees, and finding alternative ways of living together in diverse societies. Motivated by a desire to show solidarity, these initiatives demonstrate enormous creativity in fostering pluralism in an environment that has largely become hostile to the arrival of newcomers. The contributions gathered here seek to explore such initiatives and the important work that they do in fostering ways of living together with others from diverse cultural and religious backgrounds. In focusing conceptually and empirically on discussions and examples of civil society initiatives, this book interrogates why, how and under what circumstances are some communities more welcoming than others.
