

Betting On Africa Pwc

The history of British gambling is a history that stretches back nearly one thousand years, reaching into some of the nation's most fabled periods. It's now an industry worth billions of pounds. Investigative journalist and Guardian correspondent Rob Davies surveys the development of the gambling industry to explain how the Britain became one of the largest gambling markets in the world. From the turn to deregulation under the Blair administration and the resultant explosion of gambling advertising to predatory targeting and industry lobbying in the halls of power, Davies uncovers the sinister inner workings of one of the country's most nefarious industries. Exploring the fate of gambling in the UK and the uncertain future of the thousands of victims who have been all but abandoned along the way, Jackpot is a stark and vital investigation that forces us to confront deeply disturbing truths about modern British society.

A collection of 15 academic articles addressing issues around integrated resort casinos and the implications for economic growth and social impacts. The articles focus primarily on a case study of Slovenia.

This book is open access under a CC BY 4.0 license. Presenting rigorous and original research, this volume offers key insights into the historical, cultural, social, economic and political forces at play in the creation of world-class ICT innovations in Kenya. Following the arrival of fiber-optic cables in 2009, Digital Kenya examines why the initial entrepreneurial spirit and digital revolution has begun to falter despite support from motivated entrepreneurs, international investors, policy experts and others. Written by engaged scholars and professionals in the field, the book offers 15 eye-opening chapters and 14 one-on-one conversations with entrepreneurs and investors to ask why establishing ICT start-ups on a continental and global scale remains a challenge on the "Silicon Savannah". The authors present evidence-based recommendations to help Kenya to continue producing globally impactful ICT innovations that improve the lives of those still waiting on the side-lines, and to inspire other nations to do the same.

This book introduces the essentials of management as they apply within the contemporary work environment. Particular attention is paid to cultural diversity, the global economy, ethical behavior and social responsibility, and the use of technology.

Sixteenth in a series of annual reports comparing business regulation in 190 economies, Doing Business 2019 measures aspects of regulation affecting areas of everyday business activity.

Fit for Growth A Guide to Strategic Cost Cutting, Restructuring, and Renewal John Wiley & Sons

Internet gambling is one of the fastest growing forms of gambling. Global Internet gambling expenditure is predicted to reach US\$33.6 billion in 2011. This is higher than worldwide movie box office revenues and represents 9% of the international gambling market. The rapid increase in expenditure of 354% since 2003 has occurred despite Internet gambling being prohibited in several key markets, including the US and China. It also suggests that current regulation may be somewhat outdated and ineffective as more and more people turn to this mode of gambling. Internet gambling is highly accessible with over 2,400 sites available 24/7 through computers, mobile phones, wireless devices and even interactive televisions. Gamblers can now play casino games, bingo, cards and poker, bet on races, sports and even celebrity weddings using over 199 means of electronic payments without leaving the house. Increasing international jurisdictions are legalizing Internet gambling and the constant accessibility of online gambling has critical social implications. Gambling operators are using aggressive advertising campaigns to move into new markets. Internet gambling appears to be particularly appealing to youth, who are gambling online at substantially higher rates than adults. Furthermore, Internet gambling appears to be related to problem gambling, with rates of problem gambling three to four times higher among Internet than non-Internet gamblers, indicating that it may have a substantial social cost. The anonymity of online sports betting poses a significant threat to the integrity of sport at all levels with increasing allegations of match-fixing and cheating. Estimates suggested that 50% of all bets on the 2010 FIFA World Cup were placed online, worth an estimated £500 million. These figures represent a 700% rise in online betting since the 2006 tournament and included many new players that opened online accounts. It is essential that appropriate responses are made by governments, industry professionals and the public in response to Internet gambling. This book will provide a comprehensive and up-to-date overview of Internet gambling, including the social impact and regulatory options. A global outline will include the characteristics and features of the many forms of Internet gambling, including the current market, and participation, and differences between Internet and non-Internet gambling. Specific regional considerations will be explored including regulatory responses and options. Importantly, the social consequences and costs of Internet gambling will be examined, including the impact of online gambling on sports, youth and problem gambling. Strategies for prevention and responsible gambling will be considered as well as expected trends.

A monumental exploration of soccer and society in our time—by its preeminent historian. The Age of Football proves that whether you call it football or soccer, you can't

*make sense of the modern world without understanding its most popular sport. With breathtaking scope and an unparalleled knowledge of the game, David Goldblatt—author of the best-selling *The Ball Is Round*—charts soccer's global cultural ascent, economic transformation, and deep politicization.*

This book provides an in-depth analysis of the unique structure of the Nigerian popular music industry. It explores the dissonance between copyright's thematic support for creative autonomy and the practical ways in which the law allows singer-songwriters' (performing authors') creative autonomy to be subverted in their contractual relationships with record labels. The book establishes the concept of creative autonomy for performing authors as a key criterion for sustainable economic development, and makes innovative legal and policy recommendations to help stakeholders preserve it.

This open access book presents a picture of the current energy challenges on the African continent (and the Sub-Saharan region in particular) and proposes pathways to an accelerated energy transition. Starting with an analysis of the status quo and the outlook for Africa's energy demand and energy access, it provides an account of the available resources, including hydrocarbons and renewable energy resources, which are playing an increasingly crucial role. It then moves on to analyze the level of investment required to scale-up Africa's energy systems, shedding light on the key barriers and elaborating on potential solutions. It also provides a suggestion for improving the effectiveness of EU–Africa cooperation. While mainly intended for policymakers and academics, this book also speaks to a broader audience interested in gaining an overview of the challenges and opportunities of the African energy sector today and in the future.

"Overview of property tax systems across Africa. Reviews of salient features for 29 countries and four regions (Anglophone, Francophone, Lusophone, North African countries). Chapters offer in-depth discussion of key policy issues (tax base, exemptions and other relief, and tax rate), administrative issues (valuation and assessment, billing, collection, enforcement), and the future of the property tax in Africa"--Provided by publisher.

**Gambling Debt* is a game-changing contribution to the discussion of economic crises and neoliberal financial systems and strategies. Iceland's 2008 financial collapse was the first case in a series of meltdowns, a warning of danger in the global order. This full-scale anthropology of financialization and the economic crisis broadly discusses this momentous bubble and burst and places it in theoretical, anthropological, and global historical context through descriptions of the complex developments leading to it and the larger social and cultural implications and consequences. Chapters from anthropologists, sociologists, historians, economists, and key local participants focus on the neoliberal policies—mainly the privatization of banks and fishery resources—that concentrated wealth among a select few, skewed the distribution of capital in a way that Iceland had never experienced before, and plunged the country into a full-scale economic crisis. *Gambling Debt* significantly raises the level of understanding and debate on the issues relevant to financial crises, painting a portrait*

of the meltdown from many points of view—from bankers to schoolchildren, from fishers in coastal villages to the urban poor and immigrants, and from artists to philosophers and other intellectuals. This book is for anyone interested in financial troubles and neoliberal politics as well as students and scholars of anthropology, sociology, economics, philosophy, political science, business, and ethics. Publication supported in part by the National Science Foundation.

Governance in Sport: Analysis and Application With Web Resource examines governance within sport organizations. Learn legal foundations and agency functions at multiple levels, and examine industry sectors, including sport wagering and esports. The web resource includes 12 in-depth, modern case studies. **A practical approach to business transformation Fit for Growth*** is a unique approach to business transformation that explicitly connects growth strategy with cost management and organization restructuring. Drawing on 70-plus years of strategy consulting experience and in-depth research, the experts at PwC's Strategy& lay out a winning framework that helps CEOs and senior executives transform their organizations for sustainable, profitable growth. This approach gives structure to strategy while promoting lasting change. Examples from Strategy&'s hundreds of clients illustrate successful transformation on the ground, and illuminate how senior and middle managers are able to take ownership and even thrive during difficult periods of transition. Throughout the Fit for Growth process, the focus is on maintaining consistent high-value performance while enabling fundamental change. Strategy& has helped major clients around the globe achieve significant and sustained results with its research-backed approach to restructuring and cost reduction. This book provides practical guidance for leveraging that expertise to make the choices that allow companies to: Achieve growth while reducing costs Manage transformation and transition productively Create lasting competitive advantage Deliver reliable, high-value performance Sustainable success is founded on efficiency and high performance. Companies are always looking to do more with less, but their efforts often work against them in the long run. Total business transformation requires total buy-in, and it entails a series of decisions that must not be made lightly. The Fit for Growth approach provides a clear strategy and practical framework for growth-oriented change, with expert guidance on getting it right. *Fit for Growth is a registered service mark of PwC Strategy& Inc. in the United States This volume presents the reader with a comprehensive account of the development of shale oil and gas reserves globally. This study provides a comparative perspective that enables readers to situate the unique US experience in a broader global context and appreciate the limitations of reproducing it elsewhere in the immediate future.

Breakthrough strategies for emulating or competing with your newest and toughest threat: innovative companies in emerging-market nations Western organizations are quickly losing influence to emerging market multinationals, as evidenced by such developments as Tata Motors's acquisitions of Land Rover and Jaguar; Lenovo's purchase of IBM's ThinkPad business; HTC's stature as the fourth largest global smartphone manufacturer; Haier's 5% global appliance market share; and LG, Samsung, and Hyundai rise in the automobile, appliance, and consumer electronics market. To help you compete, *The New Emerging Market Multinationals* outlines the disruptive strategies deployed by emerging-market multinationals (EMNCs) and provides breakthrough strategies for following in their footsteps or beating them at their own game. How to Keep What's Good, Fix What's Wrong, and Unlock Great Performance

'The first person to live to 150 has already been born.'— Aubrey de Grey, Biomedical Gerontologist The number of people living into their late nineties and early hundreds is growing by the day. The notion that you have to retire at 65 is becoming outdated and, more importantly, impractical and even financially hazardous. However, the question remains: How do you provide for yourself should you live to a ripe old age, as is very likely? Irrespective of where you currently are in life – starting out in your career, approaching retirement or already retired – living longer fundamentally challenges the traditional mindset of a retirement date being a line drawn in the sand. *To 100 & Beyond* provides sound, tried-and-tested advice on how to approach living a longer, financially secure life, including how to invest wisely, generate alternative income streams, handle your tax affairs and plan your estate. Practical, real-life examples make this book an easy-to-understand, highly accessible tool that can help you to achieve financial freedom so

that you, too, can live your best life now, into retirement and beyond.

Trade and transport corridors are fundamental to the overland movement of international trade, particularly for landlocked countries. This book provides tools and techniques for the design of trade and transport corridor projects. It is meant for task managers, policy makers, and corridor service providers.

The desire exists within Governments to provide for those who are on the fringes of society. Therefore, indigenous approaches seem relevant in the redistribution of resources among citizens. This book is therefore not only essential, but also timely. Indigenous Social Security Systems in Southern and West Africa (ISSS) contributes to human service literature for Africa, Southern Africa and West Africa in particular. The richness of the book lies within the variety of contributions that encourage its origin. The book's value is extensive and captures many essential and current topics that have an appeal to academicians, policy-makers, analysts and practitioners in the field of social welfare and social security. Ultimately, the book serves as a pragmatic and expedient tool for human service practitioners and any enthusiast of social security systems.

In 2006, hedge fund manager John Paulson realized something few others suspected--that the housing market and the value of subprime mortgages were grossly inflated and headed for a major fall. Paulson's background was in mergers and acquisitions, however, and he knew little about real estate or how to wager against housing. He had spent a career as an also-ran on Wall Street. But Paulson was convinced this was his chance to make his mark. He just wasn't sure how to do it. Colleagues at investment banks scoffed at him and investors dismissed him. Even pros skeptical about housing shied away from the complicated derivative investments that Paulson was just learning about. But Paulson and a handful of renegade investors such as Jeffrey Greene and Michael Burry began to bet heavily against risky mortgages and precarious financial companies. Timing is everything, though. Initially, Paulson and the others lost tens of millions of dollars as real estate and stocks continued to soar. Rather than back down, however, Paulson redoubled his bets, putting his hedge fund and his reputation on the line. In the summer of 2007, the markets began to implode, bringing Paulson early profits, but also sparking efforts to rescue real estate and derail him. By year's end, though, John Paulson had pulled off the greatest trade in financial history, earning more than \$15 billion for his firm--a figure that dwarfed George Soros's billion-dollar currency trade in 1992. Paulson made billions more in 2008 by transforming his gutsy move. Some of the underdog investors who attempted the daring trade also reaped fortunes. But others who got the timing wrong met devastating failure, discovering that being early and right wasn't nearly enough. Written by the prizewinning reporter who broke the story in The Wall Street Journal, The Greatest Trade Ever is a superbly written, fast-paced, behind-the-scenes narrative of how a contrarian foresaw an escalating financial crisis--that outwitted Chuck Prince, Stanley O'Neal, Richard Fuld, and Wall Street's titans--to make financial history.

Detect fraud faster—no matter how well hidden—with IDEA automation Fraud and Fraud Detection takes an advanced approach to fraud management, providing step-by-step guidance on automating CaseWare's IDEA software. The book begins by reviewing the major types of fraud, then details the specific computerized tests that can detect them. Readers will learn to use complex data analysis automation scripts, allowing easier and more sensitive detection of anomalies that require further review. The companion website provides access to a demo version of IDEA, along with sample scripts to immediately test the procedures from the book. Business systems' electronic databases have grown tremendously with the rise of big data, and will continue to increase at significant rates. Fraud is hidden in these enormous datasets, but Fraud and Fraud Detection helps readers gain the data analytics skills that can bring these anomalies to light. Step-by-step instruction and practical advice that will enhance the audit and investigation process. Readers will learn to: Understand the different areas of fraud and their specific detection methods Identify anomalies and risk areas using complex step-by-step plan for detecting fraud through data analytics Utilize IDEA software to automate detection and identification procedures The delineation of detection techniques for each type of fraud is useful for students and new fraud prevention professionals, and the step-by-step guidance to automation and complex analytics will prove useful for even experienced examiners. With datasets growing in size and speed and sensitivity of detection helps fraud professionals stay ahead of the game. Fraud and Fraud Detection is a guide to more efficient, more effective fraud identification.

International Sport Business: Current Issues, Future Directions offers a contemporary and forward-looking survey of the global sport industry, introducing the key themes, trends and critical issues in sport business making and strategy in sport business in the coming decade and beyond. Against a background of globalisation, disruption and social change, the book explores key influences on the development of the sport industry. It examines themes such as governance, the social role of sport, value chains and innovation, the increasing importance of data, digital technology and leadership. Every chapter includes commentaries, examples of best practice and interviews with leading sport business professionals, encouraging the reader to reflect on the factors that determine success in international sport business ahead, imagining potential scenarios for the future of sport. Thought-provoking, underpinned by research evidence and intended to generate debate and discussion, this is the perfect foundation for a business course, and an essential guide to the future for sport business practitioners and policy-makers. An accompanying eResource provides reflective questions for each chapter.

The experience economy is a fourth economic field different from commodities, goods and services. Experiences are an economic value added to a product or identical with the product. When you spend time enjoying a series of memorable events that a company stages to engage the customer in a personal way. The experience dimension has moved into a predominant place since the 1990s and digital economy. In developed countries, people get richer and more individualized and having met all basic material needs, they focus increasingly on personal development and self realization.

based products increases, such as tourism and sports as well as film, music and other contents of media and interactive technologies. Furthermore, the demand for experience values is extended dimension of modern societies, such as the design of houses, furniture, clothes, cars, computers, etc. This is not a completely new story. Commercial entertainment and design has been around for universal values of love, sex, belief, family and the meaning of life have always been vital to human beings. What is new is the fact that capitalism is invading more and more fields of experiences extension of life proportions. In all developed countries and increasingly on a global scale, a series of expanding industries have emerged to supply the market with experience-oriented goods. In the development of markets and industries is covered from tourism, to media and entertainment, and from design to sex, including leading companies and trends in all industries involved.

The Arab region needs a new generation of policies and investments in agricultural water. Agricultural water management has always posed challenges and opportunities in the Arab world. However, accelerating drivers such as climate change, population growth, and land degradation make agricultural water management a more urgent priority than ever before. In addition, as part of the 2030 Agenda for Sustainable Development, Arab countries have committed to work towards an ambitious set of development targets, the Sustainable Development Goals (SDGs). Unless the right policies and investments are in place, it will be difficult to achieve the SDGs, including ending hunger and providing clean water and sanitation for all. This paper is part of an ongoing collaboration between the Food and Agriculture Organization of the United Nations and the International Water Management Institute to foster dialogue on agricultural water policies and investments in the context of the FAO led Regional Water Scarcity initiative. The purpose of the paper is to identify challenges and opportunities in the sector – including emerging innovations in digital agriculture, water accounting, water supply and wastewater reuse – and to lay out broad strategic directions for action.

Analysis and Application

Fit for Growth

Every company has a personality. Does yours help or hinder your results? Does it make you fit for growth? Find out by taking the quiz that's helped 50,000 people better understand their organizations at OrgDNA.com and to learn more about Organizational DNA. Just as you can understand an individual's personality, so too can you understand a company's type—what makes it tick, what's good and bad about it. Results explains why some organizations bob and weave and roll with the punches to consistently deliver on commitments and produce great results, while others can't leave their corner of the ring without tripping on their own shoelaces. Gary Neilson and Bruce Pasternack help you identify which of the seven company types you work for—and how to keep what's good and fix what's wrong. You'll feel the shock of recognition ("That's me, that's my company") as you find out whether your organization is: • Passive-Aggressive ("everyone agrees, smiles, and nods, but nothing changes"): entrenched underground resistance makes getting anything done like trying to nail Jell-O to the wall • Fits-and-Starts ("let 1,000 flowers bloom"): filled with smart people pulling in different directions • Outgrown ("the good old days meet a brave new world"): reacts slowly to market developments, since it's too hard to run new ideas up the flagpole • Overmanaged ("we're from corporate and we're here to help"): more reporting than working, as managers check on their subordinates' work so they can in turn report to their bosses • Just-in-Time ("succeeding, but by the skin of our teeth"): can turn on a dime and create real breakthroughs but also tends to burn out its best and brightest • Military Precision ("flying in formation"): executes brilliant strategies but usually does not deal well with events not in the playbook • Resilient ("as good as it gets"): flexible, forward-looking, and fun; bounces back when it hits a bump in the road and never, ever rests on its laurels For anyone who's ever said, "Wow, that's a great idea, but it'll never happen here" or "Whew, we pulled it off again, but I'm tired of all this sprinting," Results provides robust, practical ideas for becoming and remaining a resilient business. Also available as an eBook From the Hardcover edition.

Vols. for 1967-70 include as a section: Who's who of Rhodesia, Mauritius, Central and East Africa.

An all-in-one resource that helps both the music director and pastor plan the worship services for each Sunday and holy day of the year, The United Methodist Music and Worship Planner 2019-2020 is lectionary-based and places at your fingertips: Weekly pages in spiral-bound format that help you plan the entire worship year, from September through August. Eight or more suggested hymns for each service keyed to United Methodist worship resources: The United Methodist Hymnal, The Faith We Sing, Worship & Song, The United Methodist Book of Worship, and The Africana Hymnal. Complete lectionary text of the Old Testament, Psalm, Epistle, and Gospel readings using the Common English Bible translation. Reproducible worship planning forms.

Resources for holidays and special days. Suggestions for prayers, solos, anthems, visuals, and much more. Also available with NRSV texts

The International VAT/GST Guidelines present a set of internationally agreed standards and recommended approaches for the consistent application of VAT to international trade, with a particular focus on trade in services and intangibles.

A Guide to Strategic Cost Cutting, Restructuring, and Renewal

Learn about the successes of Black entrepreneurs through a collection of unique case studies Successful Black Entrepreneurs is an insightful collection of Harvard Business School case studies about Black entrepreneurs succeeding in a variety of industries and through different routes, including start-ups, franchising, and acquisitions. The book also recognizes and celebrates Black entrepreneurial excellence, as it takes the reader through the stages of entrepreneurship, including ideation, raising capital, growing the company, and taking it public. In addition to identifying the positive aspects of Black entrepreneurship, the book also uses data, research, and anecdotes to highlight the challenges faced by Black entrepreneurs, including: An inability to access capital from traditional financial institutions like banks and private equity firms The requirement to practice “ racial concealment ” in the company of White customers in order to achieve success Perfect for students, aspiring entrepreneurs, and established business leaders, Successful Black Entrepreneurs provides practical perspectives from Black entrepreneurs about what it takes to succeed in business.

For over forty years in more than sixty countries, Raymond Baker has witnessed the free-market system operating illicitly and corruptly, with devastating consequences. In Capitalism ' s Achilles Heel, Baker takes readers on a fascinating journey through the global free-market system and reveals how dirty money, poverty, and inequality are inextricably intertwined. Readers will discover how small illicit transactions lead to massive illegalities and how staggering global income disparities are worsened by the illegalities that permeate international capitalism. Drawing on his experiences, Baker shows how Western banks and businesses use secret transactions and ignore laws while handling some \$1 trillion in illicit proceeds each year. He also illustrates how businesspeople, criminals, and kleptocrats perfect the same techniques to shift funds and how these tactics negatively affect individuals, institutions, and countries.

Sport is a global phenomenon engaging billions of people and generating annual revenues of more than US\$ 145 billion. Problems in the governance of sports organisations, fixing of matches and staging of major sporting events have spurred action on many fronts. Yet attempts to stop corruption in sport are still at an early stage. The Global Corruption Report (GCR) on sport is the most comprehensive analysis of sports corruption to date. It consists of more than 60 contributions from leading experts in the fields of corruption and sport, from sports organisations, governments, multilateral institutions, sponsors, athletes, supporters, academia and the wider anti-corruption movement. This GCR provides essential analysis for understanding the corruption risks in sport, focusing on sports governance, the business of sport, planning of major events, and match-fixing. It highlights the significant work that has already been done and presents new approaches to strengthening integrity in sport. In addition to measuring transparency and accountability, the GCR gives priority to participation, from sponsors to athletes to supporters an essential to restoring trust in sport.

To Close the "Shitholes" Africa Must Change By: Osei Badu-Nkansah When the “ SHITHOLE ” incidence showed up, many of us with African roots listened carefully to the anger expressed by the media, African leaders, the Africa Union (AU), politicians in the United States from both parties, and the world at large. What ' s Up Africa received record transactions. Some of us stayed calm and began thinking about the whole incident. Then, after careful analysis, the gates opened for true self-checking—devoid of any emotions to be able to stay fair to both sides. Believe us, it was not easy to hear the negative characterization of the continent, but the Good Lord had His hands in control to calm things down and open our eyes as to allow us to turn a bad situation into a good one. The narratives in this book come out of true soul-searching, painful admissions of facts, and realistic analyses of prevailing conditions, concluding with challenging directions, so that we can turn the “ SHITHOLES ” into “ GOLD HOLES. ” Let us embrace our current situation and call a spade a spade. This is the only way we can move beyond the anger. Please, take deep breath and truthfully read on, so that you can also come to the same realization. Together we can contribute to the calling that we have so expressed in this book to save Africa from supervised impoverishment. We cannot and should not continue doing the same things over and over again. We need to open up our eyes to be able to see the truth, regardless of how painful, to get Mother Africa on the right path, so that the next generation will flourish. There will be sacrifices, some pains, and some hardships as we carefully navigate the dense cloud of issues facing Africa. But we believe that we can overcome—and we will overcome.

Understanding Regulations for Small and Medium-Size Enterprises

Doing Business 2013

Doing Business 2014: Understanding Regulations for Small and Medium-Size Enterprises assesses regulations affecting domestic firms in 189 economies and ranks the economies in 10 areas of business regulation, such as starting a business, resolving insolvency and trading across borders. This year's report data cover regulations measured from June 2012 through May 2013. The report is the 11th edition of the Doing Business series.
