This volume explores the various strategies of construing appropriate pasts in scholarship, literature, art, architecture and literature, in order to create "national", regional or local identities, in late medieval and early modern Europe.

In *Paper Cadavers*, an inside account of the astonishing discovery and rescue of Guatemala's secret police archives, Kirsten Weld probes the politics of memory, the wages of the Cold War, and the stakes of historical knowledge production. After Guatemala's bloody thirty-six years of civil war (1960–1996), silence and impunity reigned. That is, until 2005, when human rights investigators stumbled on the archives of the country's National Police, which, at 75 million pages, proved to be the largest trove of secret state records ever found in Latin America. The unearthing of the archives renewed fierce debates about history, memory, and justice. In *Paper Cadavers*, Weld explores Guatemala's struggles to manage this avalanche of evidence of past war crimes, providing a firsthand look at how postwar justice activists worked to reconfigure terror archives into implements of social change. Tracing the history of the police files as they were transformed from weapons of counterinsurgency into tools for post-conflict reckoning, Weld sheds light on the country's fraught transition from war to an uneasy peace, reflecting on how societies forget and remember political violence. Since the 1990s, critics and curators have broadly accepted the notion

that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as "social practice." Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

As the visual representation of an essentially oral text, Sylvia Huot points out, the medieval illuminated manuscript has a theatrical, performative quality. She perceives the tension between implied oral performance and real visual artifact as a fundamental aspect of thirteenth- and fourteenth-century poetics. In this generously illustrated volume, Huot examines manuscript texts both from the performance-oriented lyric tradition of chanson courtoise, or courtly love lyric, and from the self-consciously literary tradition of Old French narrative poetry. She demonstrates that the evolution of the lyrical romance and dit, narrative poems which incorporate thematic and rhetorical elements of the lyric, was responsible for a progressive redefinition of lyric poetry as a written medium and the emergence of an explicitly written literary tradition uniting lyric and narrative poetics. Huot first investigates the nature of the vernacular book in the thirteenth and fourteenth centuries, analyzing organization, page layout, rubrication, and

illumination in a series of manuscripts. She then describes the relationship between poetics and manuscript format in specific texts, including works by widely read medieval authors such as Guillaume de Lorris, Jean de Meun, and Guillaume de Machaut, as well as by lesser-known writers including Nicole de Margival and Watriquet de Couvin. Huot focuses on the writers' characteristic modifications of lyric poetics; their use of writing and performance as theme; their treatment of the poet as singer or writer; and of the lady as implied reader or listener; and the ways in which these features of the text were elaborated by scribes and illuminators. Her readings reveal how medieval poets and book-makers conceived their common project, and how they distinguished their respective roles. The Familiar Enemy examines the linguistic, literary, and cultural identities of England and France during the Hundred Years War. It explores works by Deschamps, Charles d'Orléans, and Gower, as well as Chaucer who, the book argues, must be resituated within the context of the multilingual cultural geography of medieval Europe.

Candide by Voltaire from Coterie Classics All Coterie Classics have been formatted for ereaders and devices and include a bonus link to the free audio book. "Do you believe," said Candide, 'that men have always massacred each other as they do to-day, that they have always been liars, cheats, traitors, ingrates, brigands, idiots, thieves, scoundrels, gluttons, drunkards, misers, envious, ambitious, bloody-minded, calumniators, debauchees, fanatics, hypocrites, and fools?' Do you believe,' said Martin, 'that hawks have always eaten pigeons when they have found them?' — Voltaire, Candide Candide is a young man who is raised in wealth to be an optimist but when he is forced to make his own way in the world, his assumptions and outlook are challenged.

Finally in paperback: the New York Times bestseller by the acclaimed, bestselling author of Start With Why and Together is Better. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millenials in the workplace" (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort--even their own survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking.

This book investigates French impersonals as a functional category. Any structure whose agent is defocused and whose predicate describes a situation stable enough to be generally available should be considered impersonal. In

addition to *il impersonals*, the category also includes demonstrative (*ce/ça*), middle (*se*), and indefinite (*on*) structures. These different forms belong to the same functional category because they systematically code general and predictable events that cannot be imputed to a specific cause. Because generality and predictability are gradual notions, impersonals can only be identified within the context of specific constructional islands which therefore constitute the organizing principle of the French impersonal category. Conducted in *Cognitive Grammar*, the analysis follows the functional tradition in expanding the scope of French impersonals beyond *il* constructions, but also proposes a way of precisely delineating the category. This book will be of interest to anyone interested in impersonal constructions and French linguistics.

E-Research takes the learner through the complete research process from problem formulation, through literature review, ethics approval, quantitative and qualitative data gathering and analysis, to dissemination and publication. Written in clear, non-technical language with educational research examples, this book illustrates how each of these components of the research process changes in a Net-enabled context. Every professional is obliged to understand and, in most cases, master the use of tools of their trade-even when those tools are undergoing rapid evolution. *E-Research* is not a research methods text. Rather, it begins where standard methodology books end, by focusing on when and how to use the Internet to enhance the research process. For anyone involved in business or those who utilize the Internet as a research tool.

Eugène Charles Catalan made his famous conjecture – that 8 and 9 are the only two consecutive perfect powers of natural numbers – in 1844 in a letter to the editor of Crelle's mathematical journal. One hundred and fifty-eight years later, Preda Mihailescu proved it. Catalan's Conjecture presents this spectacular result in a way that is accessible to the advanced undergraduate. The author dissects both Mihailescu's proof and the earlier work it made use of, taking great care to select streamlined and transparent versions of the arguments and to keep the text self-contained. Only in the proof of Thaine's theorem is a little class field theory used; it is hoped that this application will motivate the interested reader to study the theory further. Beautifully clear and concise, this book will appeal not only to specialists in number theory but to anyone interested in seeing the application of the ideas of algebraic number theory to a famous mathematical problem.

In *A View from Abroad* Nicolás Bas recreates, using a bibliographical approach, the manner in which Spain was regarded in Europe in the Eighteenth century, by consulting booksellers' catalogues, private book collections and key auctions in Paris and London.

Children are inherently musical. They respond to music and learn through music. Music expresses children's identity and heritage, teaches them to belong to a culture, and develops their cognitive well-being and inner self worth. As professional instructors, childcare workers, or students looking forward to a career working with children, we should continuously search for ways to tap into children's natural reservoir of enthusiasm for singing, moving and experimenting with instruments. But how, you might ask? What music is appropriate for the children I'm working with? How can music help inspire a well-rounded child? How do I reach and teach children musically? Most importantly perhaps, how can I incorporate music into a curriculum that marginalizes the arts? This book explores a holistic, artistic, and integrated approach to understanding the developmental connections between music and children. This book guides professionals to work through music, harnessing the processes that underlie music learning, and outlining developmentally appropriate methods to understand the role of music in children's lives through play, games, creativity, and movement. Additionally, the book explores ways of applying music-making to benefit the whole child, i.e., socially, emotionally, physically, cognitively, and linguistically.

The medieval clergy, aristocracy, and commercial classes tended to regard peasants as objects of contempt and derision. In religious writings, satires, sermons, chronicles, and artistic representations peasants often appeared as dirty, foolish, dishonest, even as subhuman or bestial. Their lowliness was commonly regarded as a natural corollary of the drudgery of their agricultural toil. Yet, at the same time, the peasantry was not viewed as "other" in the manner of other condemned groups, such as Jews, lepers, Muslims, or the imagined "monstrous races" of the East. Several crucial characteristics of the peasantry rendered it less clearly alien from the elite perspective: peasants were not a minority, their work in the fields nourished all other social orders, and, most important, they were Christians. In other respects, peasants could be regarded as meritorious by virtue of their simple life, productive work, and unjust suffering at the hands of their exploitive social superiors. Their unrewarded sacrifice and piety were also sometimes thought to place them closest to God and more likely to win salvation. This book examines these conflicting images of peasants from the post-Carolingian period to the German Peasants' War. It relates the representation of peasants to debates about how society should be organized (specifically, to how human equality at Creation led to subordination), how slavery and serfdom could be assailed or defended, and how peasants themselves structured and justified their demands. Though it was argued that peasants were legitimately subjugated by reason of nature or some primordial curse (such as that of Noah against his son Ham), there was also considerable unease about how the exploitation of those who were not completely alien—who were, after all, Christians—could be explained. Laments over peasant suffering as expressed in the literature might have a stylized quality, but this book shows how they were appropriated and shaped by peasants themselves, especially in the large-scale rebellions that characterized the late Middle Ages.
