

Bill Gross On Investing

There are questions that the Mueller report couldn't -- or wouldn't -- answer. What instigated the Russia investigation? Did President Trump's meddling incriminate him? There's no mystery to what Trump thinks. He claims that the Deep State, a cabal of career bureaucrats, is concerned only with protecting its own power and undermining the democratic process. Conversely, James Comey has defended the FBI as incorruptible apolitical public servants who work tirelessly to uphold the rule of law. James B. Stewart sifts these conflicting accounts to present a clear-eyed view of what happened inside the FBI in the lead-up to the 2016 election, drawing on scores of interviews with key FBI, Department of Justice, and White House officials and voluminous transcripts, notes, and internal reports. This is the saga of the FBI's simultaneous investigations of both Hillary Clinton and Donald Trump. Stewart shows what was set in motion when Trump fired Comey, triggering the appointment of Robert Mueller as an independent special counsel and causing the FBI to open a formal investigation into the president himself. This unprecedented event joined in ongoing combat the presidency and the Federal Bureau of Investigation. There is no room for compromise, but plenty for collateral damage. Deep State goes beyond the limits of the legally constrained Mueller report, showing how the president's obsession with the idea of a conspiracy against him is still upending lives and sending shockwaves through both the FBI and the Department of Justice.

"Most books on entrepreneurship focus on strategic issues like product/market fit, deciding what market to be in, or what business to buy, how to get traction with customers, etc. Examples include bestselling perennials such as *The Lean Startup*, *Art of the Start*, *Zero to One*, *Startup Owner's Manual*, et al *Simple Startup*, covers a completely different part of the process: the concrete details of business launch, growth, and management. Most best-sellers that promise to tell people how to start a business do so very briefly, and quickly end up recommending that readers seek guidance from lawyers, accountants, and other paid advisors. *Simple Startup* gives readers the detailed insights they need to understand exactly what they need from each of these professional counselors, to ask the smart questions that will help them get their money's worth, and to make intelligent decisions independent of their advisors' recommendations. *Simple Startup* is aimed at those who want to make it really big, not just the home-based artisans, daycare providers, or dry cleaning stores. These are innovators and visionaries who have the passion, drive, and creativity to launch a great company, but who need a nuts-and-bolts guide to the hundreds of complex challenges that derail many a business on the journey from their first business card to a successful company sale or IPO"--

A Dozen Lessons for Entrepreneurs shows how the insights of leading venture capitalists can teach readers to create a unique approach to building a successful business. Through profiles and interviews of figures such as Bill Gurley of Benchmark Capital, Marc Andreessen and Ben Horowitz of Andreessen Horowitz, and Jenny Lee of GGV Capital, Tren Griffin draws out the fundamental lessons from their ideas and experiences. Entrepreneurs should learn from past successes but also be prepared to break new ground. While there are best practices, there is no single recipe they should follow. By better understanding the views and experiences of a wide range of successful venture capitalists and entrepreneurs, readers can discern which of many possible paths will lead to success. With insight and verve, Griffin argues that innovation and best practices are discovered by the experimentation of entrepreneurs as they establish the evolutionary fitness of their business. The products and services created through this experimentation that have greater fitness survive, and less-fit products and services die. Entrepreneurs have always experimented when creating or altering a business. What is different today is the existence of modern tools and systems that allow experiments to be conducted more cheaply and rapidly than ever before. Griffin shows that listening to what the best venture capitalists have to say is invaluable for entrepreneurs. Their experiences, if studied carefully, teach bedrock methods and guiding principles for approaching business.

The investing strategy that famously generates higher returns with substantially reduced risk--presented by the investor who invented it "A treasure of well researched momentum-driven investing processes." Gregory L. Morris, Chief Technical Analyst and Chairman, Investment Committee of Stadion Money Management, LLC, and author of *Investing with the Trend Dual Momentum Investing* details the author ' s own momentum investing method that combines U.S. stock, world stock, and aggregate bond indices--a formula proven to dramatically increase profits while lowering risk. Antonacci reveals how momentum investors could have achieved long-run returns nearly twice as high as the stock market over the past 40 years, while avoiding or minimizing bear market losses--and he provides the information and insight investors need to achieve such success going forward. His methodology is designed to pick up on major changes in relative strength and market trend. Gary Antonacci has over 30 years experience as an investment professional focusing on under exploited investment opportunities. In 1990, he founded Portfolio Management Consultants, which advises private and institutional investors on asset allocation, portfolio optimization, and advanced momentum strategies. He writes and runs the popular blog and website optimalmomentum.com. Antonacci earned his MBA at Harvard.

World Investment Report 2020

In 1998, after thirteen years of providing investment advice for Smith Barney, Bill Schultheis wrote a simple book for people who felt overwhelmed by the stock market. He had discovered that when you simplify your investment decisions, you end up getting better returns. As a bonus, you gain more time for family, friends, and other pursuits. *The Coffeehouse Investor* explains why we should stop thinking about top-rated stocks and mutual funds, shifts in interest rates, and predictions for the economy. Stop trying to beat the stock market average, which few " experts " ever do. Instead, just remember three simple principles: Don ' t put all your eggs in one basket. There ' s no such thing as a free lunch. And save for a rainy day. By focusing more on your passions and creativity and less on the daily ups and downs, you will actually build more wealth—and improve the quality of your life at the same time.

One of today's best money managers heralds the onset of a new financial era, in which the rules for investors will be dramatically different. With wit and humor, Gross details recommended strategies, revealing where the markets are headed--and how to ride them to success.

The ASEAN+3 Bond Market Guide series provides country-specific information on the investment climate, rules, laws, opportunities, and characteristics of local bond markets in Asia and the Pacific. It aims to help bond market issuers, investors, and financial intermediaries understand the local context and encourage greater participation in the region's rapidly developing bond markets. This edition focuses on the Inter-Bank Bond Market in the People's Republic of China, which is one of the country's most important bond markets and one of only two that are accessible to foreign investment.

Building a Winning Culture for Long-Term Success

Here at last are the hard-to-find answers to the dizzying array of financial questions plaguing those who are age fifty and older. The financial world is more complex than ever, and people are struggling to make sense of it all. If you're like most people moving into the phase of life where protecting—as well as growing-- assets is paramount, you're faced with a number of financial puzzles. Maybe you're struggling to get your kids through college without drawing down your life's savings. Perhaps you sense your nest egg is at risk and want to move into safer investments. Maybe you're contemplating downsizing to a smaller home, but aren't sure of the financial implications. Possibly, medical expenses have become a bigger drain than you expected and you need help assessing options. Perhaps you'll shortly be eligible for social security but want to optimize when and how to take it. Whatever your specific financial issue, one thing is certain—your range of choices is vast. As the financial world becomes increasingly complex, what you need is deeply researched advice from professionals whose credentials are impeccable and who prize clarity and straightforwardness over financial mumbo-jumbo. Carrie Schwab-Pomerantz and the Schwab team have been helping clients tackle their toughest money issues for decades. Through Carrie's popular "Ask Carrie" columns, her leadership of the Charles Schwab Foundation, and her work across party lines through two White House administrations and with the President's Advisory Council on Financial Capability, she has become one of America's most trusted sources for financial advice. Here, Carrie will not only answer all the questions that keep you up at night, she'll provide answers to many questions you haven't considered but should.

From the "guru to Wall Street's gurus" comes the fundamental techniques of value investing and their applications Bruce Greenwald is one of the leading authorities on value investing. Some of the savviest people on Wall Street have taken his Columbia Business School executive education course on the subject. Now this dynamic and popular teacher, with some colleagues, reveals the fundamental principles of value investing, the one investment technique that has proven itself consistently over time. After covering general techniques of value investing, the book proceeds to illustrate their applications through profiles of Warren Buffett, Michael Price, Mario Gabellio, and other successful value investors. A number of case studies highlight the techniques in practice. Bruce C. N. Greenwald (New York, NY) is the Robert Heilbrunn Professor of Finance and Asset Management at Columbia University. Judd Kahn, PhD (New York, NY), is a member of Morningside Value Investors. Paul D. Sonkin (New York, NY) is the investment manager of the Hummingbird Value Fund. Michael van Biema (New York, NY) is an Assistant Professor at the Graduate School of Business, Columbia University. Learn where the markets are headed--and how to ride them to success. Global changes point toward a dramatically different next decade in the realm of finance. As the bull markets of the last twenty years fade away, new investment tools and strategies are necessary. In this book, William Gross, one of today's most respected money managers who has built his fame on tracking economic trends, prepares readers for a completely new approach to investing. He emphasizes bonds, the right kinds of stocks, and a globalized investment portfolio for this new era in investment. In an accessible style, Gross intermingles discussions of investment with humor, wit, and personal anecdotes. William H. Gross (Laguna Beach, California) is the founder, managing director, and CEO of Pacific Investment Management Company, which manages over \$90 billion in assets for both institutional investors and individuals.

Praise For Investment Secrets From PIMCO's Bill Gross "No investor is held in higher regard by his peers than Bill Gross. His understanding of the markets and his insights on how to profit from them are unparalleled. Now, Tim Middleton takes you into Gross's world for an insider's view on how the world of finance really works. If this book were a bond, it would be AAA rated with a double-digit yield." -DON PHILLIPS, Managing Director, Morningstar, Inc. "The secret to investment success is discipline. In bonds, nobody has displayed better discipline than Bill Gross. And nobody has done a better job of explaining Gross's methods, and instructing private investors how they can exploit his approach, than Tim Middleton." -JON MARKMAN, Columnist, CNBC on MSN Money "Warren Buffett, John Neff, Bill Miller, Peter Lynch--the stock market has always had dominant personalities whose long-term success becomes legend. In the bond market, that dominant personality is Gross." -FORTUNE "Bill Gross is the Emeril Lagasse of bond managers." -FORBES "If you want to get a stock mutual fund manager steamed, ask why his fund can't beat bond guru Bill Gross." -USA TODAY

"Out of the Box is part memoir and part investment strategy guide. Throughout his career, author Mark Grant has often taken a contrarian view. Rather than working on Wall Street or at the Chicago Mercantile Exchange, he's spent his time elsewhere on Main Street. He's very critical of all the "noise" in the markets which he feels leads investors to make poor choices in their holdings. He offers important rules preserving capital and making long-term profits."--

The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term

structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

The Perfect gift for teachers, students, Kids, or Anyone who loves unicorns, Horses, Or Mythical Creatures!

This volume provides the definitive treatment of fortune's formula or the Kelly capital growth criterion as it is often called. The strategy is to maximize long run wealth of the investor by maximizing the period by period expected utility of wealth with a logarithmic utility function. Mathematical theorems show that only the log utility function maximizes asymptotic long run wealth and minimizes the expected time to arbitrary large goals. In general, the strategy is risky in the short term but as the number of bets increase, the Kelly bettor's wealth tends to be much larger than those with essentially different strategies. So most of the time, the Kelly bettor will have much more wealth than these other bettors but the Kelly strategy can lead to considerable losses a small percent of the time. There are ways to reduce this risk at the cost of lower expected final wealth using fractional Kelly strategies that blend the Kelly suggested wager with cash. The various classic reprinted papers and the new ones written specifically for this volume cover various aspects of the theory and practice of dynamic investing. Good and bad properties are discussed, as are fixed-mix and volatility induced growth strategies. The relationships with utility theory and the use of these ideas by great investors are featured.

The Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States Including Dissenting Views

Forecast geopolitics and markets with this clear and insightful resource Geopolitical Alpha - An Investment Framework for Predicting the Future provides readers with an original and compelling approach to forecasting the future and beating the markets while doing so. Persuasively written by author, investment strategist, and geopolitical analyst Marko Papic, the book applies a novel framework for making sense of the cacophony of geopolitical risks with the eye towards generating investment-relevant insights. Geopolitical Alpha posits that investors should ignore the media-hyped narratives, insights from "smoke-filled rooms," and most of their political consultants and, instead, focus exclusively on the measurable, material constraints facing policymakers. In the tug-of-war between policymaker preferences and their constraints, the latter always win out in the end. Papic uses a wealth of examples from the past decade to illustrate how one can use his constraint-framework to generate Geopolitical Alpha. In the process, the book discusses: What paradigm shifts will drive investment returns over the next decade Why investment and corporate professionals can no longer treat geopolitics as an exogenous risk How to ignore the media and focus on what drives market narratives that generate returns Perfect for investors, C-suite executives, and investment professionals, Geopolitical Alpha belongs on the shelf of anyone interested in the intersection of geopolitics, economics, and finance. Financial market behavior and key trading strategies—illuminated by interviews with top hedge fund experts Efficiently Inefficient describes the key trading strategies used by hedge funds and demystifies the secret world of active investing. Leading financial economist Lasse Heje Pedersen combines the latest research with real-world examples to show how certain tactics make money—and why they sometimes don't. He explores equity strategies, macro strategies, and arbitrage strategies, and fundamental tools for portfolio choice, risk management, equity valuation, and yield curve trading. The book also features interviews with leading hedge fund managers: Lee Ainslie, Cliff Asness, Jim Chanos, Ken Griffin, David Harding, John Paulson, Myron Scholes, and George Soros. Efficiently Inefficient reveals how financial markets really work.

The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud

Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film In Debt We Trust warned of the economic meltdown in 2006. He has since written three books on the subject including Plunder: Investigating Our Economic Calamity (Cosimo Books, 2008), and The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail (Disinfo Books, 2011), a companion to his latest film Plunder The Crime Of Our Time. He can be reached online at www.newsdissector.com.

This authoritative and accessible investment classic promises rare insight into what it really takes to run money in a top-performing investment fund. Anthony Bolton, the UK's most successful stock market investor, tells the story of his contrarian approach to managing money. He provides invaluable lessons on the factors that really matter in picking a stock: the need to identify good managers, how to run a portfolio, the importance of value investing, reading charts and how to trade successfully. It's not easy to continually buy low and sell high. This book gives clear directions for doing well in the stock market, and doing well consistently. Investing Against the Tide shows you how to make the right decisions at the right time. Anthony Bolton is considered the UK's most successful stock market investor and fund manager. Over twenty five years he delivered a market-beating return of 20% in his Fidelity Special Situations Fund. How did he do it, and what can you learn from him? In Investing Against the Tide, Anthony Bolton tells the story of his contrarian approach to managing money. He provides invaluable lessons on the factors that really matter when investing: how to pick a stock, the need to identify good managers, how to run a portfolio, the importance of value investing, reading charts and how to trade successfully. In this account of financial accomplishment, Bolton reveals the secrets of his success. It's not easy constantly to buy low and sell high and this book gives clear directions for doing well in the stock market, and doing well consistently. Chapter by chapter Investing Against the Tide shows you how to make the right decisions at the right time and featured key lessons show you how you really can learn from a life running money. Investing Against the Tide is an authoritative guide for investment professionals, offering them a rare insight into what it really takes to run money in a top-performing fund, as well as providing amateur investors the chance to learn the stock-picking strategies from a leading money-manager. About the author Anthony Bolton left Cambridge University with a degree in engineering to begin a career in the City. He started as a graduate trainee working for Keyser Ullmann in 1971 before taking up a full time position as an assistant in their investment department. In 1976 he moved to Schlesingers where he became, for the first time, an investment manager. In 1979, aged 29, he was recruited by Fidelity, the international fund management group, as one of its first London-based investment managers, a move that proved to be the launch of a long and successful career. In surveys of professional investors, he is regularly voted the fund manager most respected by his peers. He retired from full-time investment management at the end of 2007, but continues to work at Fidelity as a mentor of the analysts and younger fund managers as well as being involved in overseeing Fidelity's investment process. His hobby is composing classical music. Anthony Bolton is married with three children and lives in West Sussex.

As an original innovator of the portable alpha concept, PIMCO has been managing an increasing number of different portable alpha strategies for investors since 1986. And now, with Portable Alpha Theory and Practice, the PIMCO team shares their extensive experiences with you. Filled with in-depth insights and expert guidance, this reliable resource provides an informative look at portable alpha and key related concepts, as well as detailed discussion on the many ways it can be applied in real-world situations.

SELECTED AS A 2008 BEST BUSINESS BOOK OF THE YEAR BY THE ECONOMIST "ONE OF THE SMARTEST INVESTORS ON THE PLANET."--MONEY MAGAZINE "This book is an essential read for those who wish to understand the modern world of investing." --Alan Greenspan Winner of the 2008 Financial Times and Goldman Sachs Business Book of the Year Award When Markets Collide is a timely alert to the fundamental changes taking place in today's global economic and financial systems--and a call to action for investors who may fall victim to misinterpreting important signals. While some have tended to view asset class mispricings as mere "noise," this compelling book shows why they are important signals of opportunities and risks that will shape the market for years to come. One of today's most respected names in finance, Mohamed El-Erian puts recent events in their proper

context, giving you the tools that can help you interpret the markets, benefit from global economic change, and navigate the risks. The world economy is in the midst of a series of hand-offs. Global growth is now being heavily influenced by nations that previously had little or no systemic influence. Former debtor nations are building unforeseen wealth and, thus, enjoying unprecedented influence and facing unusual challenges. And new derivative products have changed the behavior of many market segments and players. Yet, despite all these changes, the system's infrastructure is yet to be upgraded to reflect the realities of today's and tomorrow's world. El-Erian investigates the underlying drivers of global change to shed light on how you should: Think about the new opportunities and risks Construct an appropriately diversified and internationalized portfolio Protect your portfolio against new sources of systemic risk Best think about the impact of central banks and financial policies around the world Offering up predictions of future developments, El-Erian directs his focus to help you capitalize on the new financial landscape, while limiting exposure to new risk configurations. When Markets Collide is a unique collection of books for investors and policy makers around the world. In addition to providing a thorough analysis and clear perspective of recent events, it lays down a detailed map for navigating your way through an otherwise perplexing new economic landscape.

What the Rich Invest in, That the Poor and Middle Class Do Not!

From the host of NPR's Planet Money, the deeply-investigated story of how one visionary, ruthless investor changed American finance forever. Before Bill Gross was known among investors as the Bond King, he was a gambler. In 1966, a fresh college grad, he went to Vegas armed with his net worth (\$200) and a knack for counting cards. \$10,000 and countless casino bans later, he was hooked: so he enrolled in business school. The Bond King is the story of how that whiz kid made American finance his casino. Over the course of decades, Bill Gross turned the sleepy bond market into a destabilized game of high risk, high reward; founded Pimco, one of today's most powerful, secretive, and cutthroat investment firms; helped to reshape our financial system in the aftermath of the Great Recession—to his own advantage; and gained legions of admirers, and enemies, along the way. Like every American antihero, his ambition would also be his undoing. To understand the winners and losers of today's money game, journalist Mary Childs argues, is to understand the bond market—and to understand the bond market is to understand the Bond King.

A major revision of the author's investment classic introduces managers to important new findings in psychology to demonstrate why most investment strategies are flawed, outlining atypical strategies based on the author's "efficient market theory" designed to prevent over- and under-valuations while crash-proofing a portfolio. 40,000 first printing.

Profiles of 150 successful fund managers, traders, analysts, economists, and investment experts offer advice, techniques, and ideas to increase returns and control risks in investing. Some of the areas of specialty discussed include international markets and capital flows, company valuation, liquidi

A comprehensive guide to best practices within the investment industry Investment Leadership provides readers with the tools to understand the leadership factors that contribute to sustainable growth; diagnose their firm's culture and understand why it is important; and replicate best practices from leading firms. With the help of diagnostic tools, practical advice from industry leaders, and real-life case studies, this book sets out to explain what is wrong with the status quo and reveal the secrets of long-term success in the investment industry. James W. Ware, CFA, currently works as a consultant to money managers. He is the coauthor of The Leadership Genius of George W. Bush (0-471-42006-9). Beth Michaels has worked with many organizations, including Chevrolet Motors and the McDonald's Corporation. Dale Primer has worked with business executives from more than 700 individual businesses in over eighty-five separate industries.

An Investment Framework for Nutrition: Reaching the Global Targets for Stunting, Anemia, Breastfeeding, and Wasting estimates the costs, impacts, and financing scenarios to achieve the World Health Assembly global nutrition targets for stunting, anemia in women, exclusive breastfeeding and the scaling up of the treatment of severe wasting among young children. To reach these four targets, the world needs US\$70 billion over 10 years to invest in high-impact nutrition-specific interventions. This investment would have enormous benefits: 65 million cases of stunting and 265 million cases of anemia in women would be prevented in 2025 as compared with the 2015 baseline. In addition, at least 91 million more children would be treated for severe wasting and 105 million additional babies would be exclusively breastfed during the first six months of life over 10 years. Altogether, achieving these targets would avert at least 3.7 million child deaths. Every dollar invested in this package of interventions would yield between US\$4 and US\$35 in economic returns, making investing in early nutrition one of the best value-for-money development actions. Although some of the targets—especially those for reducing stunting in children and anemia in women—are ambitious and will require concerted efforts in financing, scale-up, and sustained commitment, recent experience from several countries suggests

that meeting these targets is feasible. These investments in the critical 1000-day window of early childhood are inalienable and portable and will pay lifelong dividends—not only for children directly affected but also for us all in the form of more robust societies—that will drive future economies.

Wouldn't you like to sit in a room and ask the following people for their investment advice? -John C. Bogle (Founder, Vanguard Group) -Warren Buffett (CEO of Berkshire Hathaway) -Bill Gross (Founder and CIO, PIMCO) -Susan Ivey (CEO, ReynoldsAmerican Inc.) -A.G. Lafley (Chairman, Procter & Gamble) -Georgette Mosbacher (CEO, Borghese Cosmetics) -John Myers (CEO, GE Asset Management) -Suze Orman (bestselling author) -Steve Forbes (President, Forbes magazine) These and dozens of other investment professionals offer their personal secrets of success when it comes to making money. And along the way, they provide their own insights on whether you should diversify your portfolio (or put your cash somewhere else), whether you should pick your own stocks (or let a pro do it for you), if investing in real estate is really the answer to great wealth, if saving a few pennies here and there really do add up, and much, much more. The book is edited by Claman to be extremely accessible to all investors, regardless of their financial background.

The Acquirer's Multiple: How the Billionaire Contrarians of Deep Value Beat the Market is an easy-to-read account of deep value investing. The book shows how investors Warren Buffett, Carl Icahn, David Einhorn and Dan Loeb got started and how they do it. Carlisle combines engaging stories with research and data to show how you can do it too. Written by an active value investor, The Acquirer's Multiple provides an insider's view on deep value investing. The Acquirer's Multiple covers: How the billionaire contrarians invest How Warren Buffett got started The history of activist hedge funds How to Beat the Little Book That Beats the Market A simple way to value stocks: The Acquirer's Multiple The secret to beating the market How Carl Icahn got started How David Einhorn and Dan Loeb got started The 9 rules of deep value The Acquirer's Multiple: How the Billionaire Contrarians of Deep Value Beat the Market provides a simple summary of the way deep value investors find stocks that beat the market.

25 Steps to a Scalable, High-Growth Business

It's All about Glitter

NEW YORK TIMES BESTSELLER Shortlisted for the Financial Times/McKinsey Business Book of the Year Award The unbelievable story of a secretive mathematician who pioneered the era of the algorithm—and made \$23 billion doing it. Jim Simons is the greatest money maker in modern financial history. No other investor—Warren Buffett, Peter Lynch, Ray Dalio, Steve Cohen, or George Soros—can touch his record. Since 1988, Renaissance's signature Medallion fund has generated average annual returns of 66 percent. The firm has earned profits of more than \$100 billion; Simons is worth twenty-three billion dollars. Drawing on unprecedented access to Simons and dozens of current and former employees, Zuckerman, a veteran Wall Street Journal investigative reporter, tells the gripping story of how a world-class mathematician and former code breaker mastered the market. Simons pioneered a data-driven, algorithmic approach that's sweeping the world. As Renaissance became a market force, its executives began influencing the world beyond finance. Simons became a major figure in scientific research, education, and liberal politics. Senior executive Robert Mercer is more responsible than anyone else for the Trump presidency, placing Steve Bannon in the campaign and funding Trump's victorious 2016 effort. Mercer also impacted the campaign behind Brexit. The Man Who Solved the Market is a portrait of a modern-day Midas who remade markets in his own image, but failed to anticipate how his success would impact his firm and his country. It's also a story of what Simons's revolution means for the rest of us.

Discover Profit Opportunities in Today's Bond Market! "Tony Crescenzi knows bonds and his book proves it." Bill Gross, Managing Director, Pacific Investment Management Company In 2002, Anthony Crescenzi opened the door to an innovative new style of investing with his publication of The Strategic Bond Investor. The book instantly became the go-to guide for investors seeking an aggressive yet risk-conscious path to profit. Now, Crescenzi provides a completely updated edition of his popular bond book to address the realities of the post-credit-crisis economy—and to help you take total advantage of everything bonds have to offer. More relevant now than ever, The Strategic Bond Investor provides a sorely needed alternative to the stock market game—where the rewards for taking risks have been less than desirable. The bond market tends to be relatively safe and accessible, but it can also be vibrant and highly profitable if you approach it the right way. Crescenzi offers a fully rounded education on the subject to help better prepare you to make profitable decisions every time. The Strategic Bond Investor demystifies bonds and the bond market with clear descriptions of: Different bond types, including U.S. Treasuries, corporate bonds, and municipal bonds Bond market risks—and how to mitigate them The powerful role of the Federal Reserve and the art of Fed watching How to read the bond market's "crystal ball"—the yield curve The five tenets of successful interest-rate forecasting Techniques for forecasting market behavior How to use credit ratings to your advantage The best bond investing strategies This comprehensive, up-to-the-minute guide provides straightforward techniques for cashing in on the unlimited potential of bond investing—whether your interests are long or short term. Now is not the time to play games with your financial future. Learn the secret to investing profitably in the bond market while offsetting portfolio risks with The Strategic Bond Investor.

NEW YORK TIMES BESTSELLER □ A roadmap to what lies ahead and the decisions we must make now to stave off the next global economic and financial crisis, from one of the world's most influential economic thinkers and the author of When Markets Collide □ Updated, with a new chapter and author's note "The one economic book you must read now . . . If you want to understand [our] bifurcated world and where it's headed, there is no better interpreter than Mohamed El-Erian."—Time Our current economic path is coming to an end. The signposts are all around us: sluggish growth, rising inequality, stubbornly high pockets of unemployment, and jittery financial markets, to name a few. Soon we will reach a fork in the road: One path leads to renewed growth, prosperity, and financial stability, the other to recession and market disorder. In The Only Game in Town, El-Erian casts his gaze toward the future of the global economy and markets, outlining the choices we face both individually and collectively in an era of economic uncertainty and financial insecurity. Beginning with their response to the 2008 global crisis, El-Erian explains how and why our central banks became the critical policy actors—and, most important, why they cannot continue in this role alone. They saved the financial system from collapse in 2008 and a multiyear economic depression, but lack the tools to enable a return to high inclusive growth and durable financial stability. The time has come for a policy handoff, from a prolonged period of monetary policy experimentation to a

strategy that better targets what ails economies and distorts the financial sector—before we stumble into another crisis. The future, critically, is not predestined. It is up to us to decide where we will go from here as households, investors, companies, and governments. Using a mix of insights from economics, finance, and behavioral science, this book gives us the tools we need to properly understand this turning point, prepare for it, and come out of it stronger. A comprehensive, controversial look at the realities of our global economy and markets, *The Only Game in Town* is required reading for investors, policymakers, and anyone interested in the future.

The Psychological Edge

From the host of NPR's *Planet Money*, the deeply-investigated story of how one visionary, dogged investor changed American finance forever. Before Bill Gross was known among investors as the Bond King, he was a gambler. In 1966, a fresh college grad, he went to Vegas armed with his net worth (\$200) and a knack for counting cards. \$10,000 and countless casino bans later, he was hooked: so he enrolled in business school. *The Bond King* is the story of how that whiz kid made American finance his casino. Over the course of decades, Bill Gross turned the sleepy bond market into a destabilized game of high risk, high reward; founded Pimco, one of today's most powerful, secretive, and cutthroat investment firms; helped to reshape our financial system in the aftermath of the Great Recession—to his own advantage; and gained legions of admirers, and enemies, along the way. Like every American antihero, his ambition would also be his undoing. To understand the winners and losers of today's money game, journalist Mary Childs argues, is to understand the bond market—and to understand the bond market is to understand the Bond King.
