6400 in 2012. This explosion is a response to the needs of a world in which borders are being traversed with ever greater ease and children increasingly need to be prepared for the global opportunities that await them. In this book, international school specialists reflect on where the movement has come from, how it

traditions. But
when Dalton

turned to
scientific

research to make
the big
decisions. In
Parentology,
Conley
hilariously
reports the
results of those
experiments,
from bribing his
kids to do math

teaching them

engagement with
kids will
produce solid
and happy ones.
Ultimately these
experiments are
very loving, and
the outcomes are
redemptive—even
when Conley's

him the limits
of his
profession.
