*In this text "students will see God's power and glory in creation as they learn about cellular biology, genetics, taxonomy, microbiology, botany, zoology, and human anatomy. When studying topics such as Creation and evolution, human cloning, abortion, and stem cell research, students are pointed to Scripture as the ultimate authority and are encouraged to develop a biblical perspective about these topics" --*

*This unique book bridges the gap between evidence-based research and clinical practice. Edited by Kari Bo who has done pioneering research in this area, each chapter focuses on the evidence, from basic studies (theories or rationales for the treatment) and RCTs (appraisal of effectiveness), to the implications of these for clinical practice, and finally in recommendations on how to start, continue and progress treatment.*

Biomarkers offer the potential to increase the precision of diagnosis, prognosis, and surveillance of urological malignancies. This issue presents the cutting-edge advances of biomarker technology to urologic oncology.

**Pediatric Urology: Evidence for Optimal Patient Management** provides pediatric urologists the information needed for state-of-the-art patient care.
