This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata and formal power series). As evident from the articles references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A.

Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Over the past two decades, the Chinese conceptual artist, activist, and exile Ai Weiwei has created art that addresses complex and sensitive themes of political, ethical, and social urgency. His artworks, which call upon both Western and Chinese cultural traditions, are deeply engaged with the history of art, drawing particularly on conceptualism and minimalism.

Informed by the readymade--central to the work of Marcel Duchamp and Andy Warhol--his work questions the status of the work of art itself, blurring the lines between art and non-art, invention and appropriation, structure and openness, even fiction and fact. From the start of his multifaceted career in the late 1970s, Ai has envisioned artistic practice as a deeply human, moral, and political endeavor. This volume--a hybrid between a scholarly study and an exhibition catalog--presents the artist's work in dialogue with theoretical texts by the Italian philosopher Giorgio Agamben and the German-Jewish philosopher Hannah Arendt alongside interpretive essays that illuminate the artist's work on human rights, his engagement with historical Chinese artifacts, and his critical consideration of the effects of globalization. The book includes a new essay on human rights by Ai Weiwei and an interview in which he discusses his artwork and activism. It also features installation photographs of the corresponding exhibition. By exploring Ai Weiwei's artistic practice in dialogue with philosophies, theories, and concepts that connect human life and political power, this publication offers new insights into one of the most important artists working today.
