For MBA level Marketing Management and/or Marketing Strategy courses, or a capstone undergraduate marketing course. Strategic, applied, and performance-oriented. While most textbooks in this area stress concepts and theory, Market-Based Management, 4e, incorporates a more strategic and applied approach. External performance metrics of a business are emphasized and actual measurement tools are provided. Its streamlined organization makes it ideal for courses in which outside cases and readings will be assigned.

Opening with the provocative query "what might an anthropology of the secular look like?" this book explores the concepts, practices, and political formations of secularism, with emphasis on the major historical shifts that have shaped secular sensibilities and attitudes in the modern West and the Middle East. Talal Asad proceeds to dismantle commonly held assumptions about the secular and the terrain it allegedly covers. He argues that while anthropologists have oriented themselves to the study of the "strangeness of the non-European world" and to what are seen as non-rational dimensions of social life (things like myth, taboo, and religion), the modern and the secular have not been adequately examined. The conclusion is that the secular cannot be viewed as a successor to religion, or be seen as on the side of the rational. It is a category with a multi-layered history, related to major premises of modernity, democracy, and the concept of human rights. This book will appeal to anthropologists, historians, religious studies scholars, as well as scholars working on modernity.

Contains the most extensive coverage of digital integrated circuits available in a single source.

Provides complete qualitative descriptions of circuit operation followed by in-depth analytical analyses and spice simulations. The circuit families described in detail are transistor-transistor logic (TTL, STTL, and ASTTL), emitter-coupled logic (ECL), NMOS logic, CMOS logic, dynamic CMOS, BiCMOS structures and various GASFET technologies. In addition to detailed presentation of the basic inverter circuits for each digital logic family, complete details of other logic circuits for these families are presented.

How can opportunities for teaching and learning be improved to ensure that many more people participate, gain qualifications and obtain decent jobs? Will government policies enable us to achieve these goals? What new ideas do we need to ensure a more inclusive, equitable and efficient learning system? These are some of the main concerns which underlie this thought-provoking book coming from a major research project looking at how policies affect learners, tutors, managers and institutional leaders in Further Education Colleges, Adult and Community Learning centres and in Work Based Learning sites. Post compulsory education in the UK has been constantly restructured by the New Labour government and has been subject to considerable policy turbulence over the last few years. This book attempts to understand this important but poorly understood sector by both talking to students and front-line staff and by interviewing the officials responsible for managing post-compulsory education and lifelong learning. By examining the sector simultaneously from the 'bottom up' and from 'top down', the authors show how recent policy is affecting three disadvantaged groups - 16-19 year olds who have fared poorly in official tests at school; unemployed adults learning basic skills; and employees at work learning basic skills. The authors conclude that there are serious failings and suggest principles and features of a more equitable and effective learning system.

This edition of the Reader's Companion accompanies Skills Matter: Additional Results from the Survey of Adult Skills that reports the results from the 39 countries and regions that participated in the 3 rounds of data collection in the first cycle of PIAAC, with a particular focus on the 6 countries that participated in the third round of the study (Ecuador, Hungary, Kazakhstan, Mexico, Peru and the United States). It describes the design and methodology of the survey and its relationship to other international assessments of young students and adults. The Survey of Adult Skills, a product of the OECD Programme for the International Assessment of Adult Competencies (PIAAC), was designed to provide insights into the availability of some key skills in society and how they are used at work and at home. The first survey of its kind, it directly measures proficiency in several information-processing skills - namely literacy, numeracy and problem solving in technology-rich environments. For Year 2

The General Aptitude and Abilities Series provides functional, intensive test practice and drill in the basic skills and areas common to many civil service, general aptitude or achievement examinations necessary for entrance into schools or occupations. The Mechanical Aptitude Passbook(R) prepares you by sharpening the skills and abilities necessary to succeed in a wide range of mechanical-related occupations. It includes supplementary text on machines and provides hundreds of multiple-choice questions that include, but are not limited to: use and knowledge of tools and machinery; basic geometry and mathematics; mechanical comprehension; and more.

High Challenge, Low Threat is Mary Myatt's smart and thoughtful exploration of all the things that wise leaders do. Informed through thousands of conversations over a 20-year period in education, Mary shows the lessons that school management teams can learn from leaders in a wide range of other sectors and points to the conditions which these leaders create to allow colleagues to engage with difficult issues enthusiastically and wholeheartedly. This book makes the case that any leadership role is concerned primarily with the relationships between individuals. It is the quality of these, whatever the size of the organisation, which make the difference between organisations which thrive, and those which stagnate. This is not to argue for soft, easy and comfortable options. Instead it considers how top leaders manage to walk the line between the impossible and the possible, between the undoable and the doable, and to create conditions for productive work which transcend the difficulties which come towards us every day. Instead of dodging them, they embrace them. And by navigating high challenge, low threat, they show how others how to do the same.
