T Bone Burnett is a unique, astonishingly prolific music producer, singer-songwriter, guitarist, and soundtrack visionary. Renowned as a studio maven with a Midas touch, Burnett is known for lifting artists to their greatest heights,

as he did with *Raising Sand*, the multiple Grammy Award-winning album by Robert Plant and Alison Krauss, as well as acclaimed albums by Los Lobos, the Wallflowers, B. B. King, and Elvis Costello. Burnett virtually invented "Americana" with his hugely successful roots-based soundtrack for the Coen Brothers film, *O Brother, Where Art Thou?* Outspoken in his contempt for the entertainment industry, Burnett has nevertheless received many of its highest honors, including Grammy Awards and an Academy Award. T Bone Burnett offers the first critical appreciation of Burnett's wide-ranging contributions to American music, his passionate advocacy for analog sound, and the striking contradictions that define his maverick artistry. Lloyd Sachs highlights all the important aspects of Burnett's musical pursuits, from his early days as a member of Bob Dylan's Rolling Thunder Revue and his collaboration with the playwright Sam Shepard to the music he recently composed for the TV shows *Nashville* and *True Detective* and his production of the all-star album *Lost on the River: The New Basement Tapes*. Sachs also underscores Burnett's brilliance as a singer-songwriter in his own right. Going well beyond the labels "legendary" or "visionary" that usually accompany his name, T Bone Burnett reveals how this consummate music maker has exerted a powerful influence on American music and culture across four decades.

From Tokyo to Helsinki, Manhattan to Manila, Howard Rheingold takes us on a journey around the world for a preview of the next technological shift—a shift he predicts will be as dramatic as the widespread adoption of the PC in the 1980s and the Internet in the 1990s. The coming wave, says Rheingold, is the result of super-efficient mobile communications—cellular phones, personal digital assistants, and wireless-paging and Internet-access devices that will allow us to

connect with anyone, anywhere, anytime. From the amusing ("Lovegetty" devices in Japan that light up when a person with the right date-potential characteristics appears in the vicinity) to the extraordinary (the overthrow of a repressive regime in the Philippines by political activists who mobilized by forwarding text messages via cell phones), Rheingold gives examples of the fundamentally new ways in which people are already engaging in group or collective action. He also considers the dark side of this phenomenon, such as the coordination of terrorist cells, threats to privacy, and the ability to incite violent behavior. Applying insights from sociology, artificial intelligence, engineering, and anthropology, Rheingold offers a penetrating perspective on the brave new convergence of pop culture, cutting-edge technology, and social activism. At the same time, he reminds us that, as with other technological revolutions, the real impact of mobile communications will come not from the technology itself but from how people use it, resist it, adapt to it, and ultimately use it to transform themselves, their communities, and their institutions.

Palm insider Andrea Butter and New York Times columnist David Pogue -- with full, exclusive cooperation of the company's founders and more than fifty key Palm and Handspring executives -- tell the riveting tale of the start of an industry constantly in the headlines. What went so wrong? Losing the Signal is a riveting story of a company that toppled global giants before succumbing to the ruthlessly competitive forces of Silicon Valley. This is not a conventional tale of modern business failure by fraud and greed. The rise and fall of BlackBerry reveals the dangerous speed at which innovators race along the information superhighway. With unprecedented access to key players, senior executives, directors and competitors, Losing the Signal unveils the remarkable rise of a company that started above a bagel store in Ontario. At the heart of the story is an unlikely partnership between a visionary engineer, Mike Lazaridis, and an abrasive Harvard Business school grad, Jim Balsillie. Together, they engineered a pioneering pocket email device that became the tool of choice for presidents and CEOs. The partnership enjoyed only a brief moment on top of the world, however. At the very moment BlackBerry was ranked the world's fastest growing company internal feuds and chaotic growth crippled the company as it faced its gravest test: Apple and Google's entry in to mobile phones. Expertly told by acclaimed journalists, Jacquie McNish and Sean Silcoff, this is an entertaining, whirlwind narrative that goes behind the scenes to reveal one of the most compelling business stories of the new century.
