World War Terminus had left the Earth devastated. Through its ruins, bounty hunter Rick Deckard stalked, in search of the renegade replicants who were his prey. When he wasn't retiring them with his laser weapon, he dreamed of owning a live animal -- the ultimate status symbol in a world all but bereft of animal life. Then Rick got his chance: the assignment to kill six Nexus-6 targets, for a huge reward. But in Deckard's world things were never that simple, and his assignment quickly turned into a nightmare kaleidoscope of subterfuge and deceit -- and the threat of death for the hunter rather than the hunted... This book of essays looks at the multitude of texts and influences which converge in Ridley Scott's film Blade Runner, especially the film's relationship to its source novel, Philip K. Dick's Do Androids Dream of Electric Sheep? The film's implications as a thought experiment provide a starting point for important thinking about the moral issues implicit in a hypertechnological society. Yet its importance in the history of

science fiction and science fiction film rests equally on its mythically and psychologically resonant creation of compelling characters and an exciting story within a credible science fiction setting. These essays consider political, moral and technological issues raised by the film, as well as literary, filmic, technical and aesthetic questions. Contributors discuss the film's psychological and mythic patterns, important political issues and the roots of the film in Paradise Lost, Frankenstein, detective fiction, and previous science fiction cinema.

Rick Deckard has sold his story to a young Turk film director, and shooting is scheduled at an orbital station off planet. Watching his past hunt for the replicants being repeated on the set is doing weird things to his mind. As soon as filming is over he is going straight back to Mars where he has been living incognito with Sarah Tyrell. But before corporate loyalists determined to resurrect the vanquished company. Since its release in 1982, Ridley Scott's Blade Runner, based on Philip K. Dick's novel Do Androids Dream of Electric Sheep?, has remained a cult classic through its depiction of a futuristic

Los Angeles; its complex, enigmatic plot; and its underlying questions about the nature of human identity. The Blade Runner Experience: The Legacy of a Science Fiction Classic examines the film in a broad context, examining its relationship to the original novel, the PC game, the series of sequels, and the many films influenced by its style and themes. It investigates Blade Runner online fandom and asks how the film's future city compares to the present-day Los Angeles, and it revisits the film to pose surprising new questions about its characters and their world.

the man she accuses of a heinous crime In the midst of the devastating Hundred Years' War between France and England, Jean de Carrouges, a Norman knight fresh from combat in Scotland, returns home to yet another deadly threat. His wife, Marguerite, has accused squire Jacques Le Gris of rape. A deadlocked court decrees a trial by combat between the two men that will also leave Marguerite's fate in the balance. For if her husband loses the duel, she will be put to death as a false accuser. While enemy troops pillage the land, and rebellion and plague threaten the lives of all, Carrouges and Le Gris meet in full armor on a walled field in Paris. What follows is the final duel ever authorized by the Parlement of Paris, a fierce fight with lance, sword, and dagger before a massive crowd that includes the teenage King Charles VI, during which both combatants are wounded—but only one fatally. Based on extensive research in Normandy and Paris, *The Last Duel* brings to life a colorful, turbulent age and three unforgettable characters caught in a fatal triangle of crime, scandal, and revenge. *The Last Duel* is at once a moving human drama, a captivating true crime story, and an engrossing work of historical intrigue with themes that echo powerfully centuries later.

The Cyborg Hero in American Film

Seminar paper from the year 2006 in the subject American Studies - Literature, grade: 1,00, Catholic University Eichstätt-Ingolstadt (Sprach- und Literaturwissenschaftliche Fakultät), course: Novel and Film, 10 entries in the bibliography, language: English, abstract: "Do Androids Dream of Electric Sheep?" is one out of at least six novels by Philip K. Dick that deal substantially with the questions surrounding androids. It is exactly the distortion between the real as the jumping-off point cited above and the hypothetical, unreal, fictional which creates a critical comment on the world the present reader lives in. The special focus on humanlike androids in "Do Androids Dream of Electric Sheep"

implies a particular philosophical issue. Of course, the somewhat murky, obscure and intransparent depiction of androids involves the problem of man-machine relationships, which can to a certain extent be equated with human-android relationships. But Dick goes a step further, pointing out the differences as well as the parallels between both the android and the human being, using ambiguous descriptions and playing with the reader's sympathy for both sides. One could even argue that Dick tried to create a kind of meeting halfway between man and android. Certainly, Dick himself faces difficulties when trying to define the android as "a thing somehow generated to deceive us in a cruel way, to cause us to think it to be one of ourselves." This description meets exactly to core of our analysis, which deals with the impact and the effects created by this somewhat ambiguous representation of human and android life.

In this futuristic screenplay vision of a strife-and-disease-plagued America in 1999, Burroughs finds the cure for a decaying civilization in the medicine practiced by underground physicians and surgeons. These heroic healers, in turn, are aided by 'blade runners,' teenagers who smuggle banned surgical instruments past the watchful eyes of fascistic police. The novel-cum-screenplay follows one of these runners during the course of a race riot and the transfer of instruments between embattled doctors. Above the drama in the streets of New

York is a world 'taken over by hang-glider and autogyro gangs, mountaineers and steeplejacks. A sky boy steps off his penthouse into a parachute on guide wires that drop him to a street-level landing ... Meanwhile, released animals and reptiles from the zoo and freed fish from the aquarium have control of the rovers and subways. The prose flashes with Burrough's own brand of outrageousness and fantasy.

The cyborg is the hero of an increasingly popular genre of American film. Drawing from representative films such as "Jaws", "The Deer Hunter" and "The Manchurian Candidate" the authors track the narrative's thread from the hunter to his technological nemesis.

An exploration of the emergence of a new psychedelic spirituality in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson. A study of the spiritual provocations to be found in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson, High Weirdness charts the emergence of a new psychedelic spirituality that arose from the American counterculture of the 1970s. These three authors changed the way millions of readers thought, dreamed, and experienced reality—but how did their writings reflect, as well as shape, the seismic cultural shifts taking place in America? In High Weirdness, Erik Davis—America's leading scholar of high strangeness—examines the published and unpublished writings of these vital, iconoclastic thinkers, as well as their own life-changing mystical experiences. Davis explores the complex

lattice of the strange that flowed through America's West Coast at a time of radical technological, political, and social upheaval to present a new theory of the weird as a viable mode for a renewed engagement with reality.

Science Fiction Analysis: Philip K. Dick's "Do Androids Dream of Electric Sheep?"

A True Story of Crime, Scandal, and Trial by Combat

A masterpiece ahead of its time, a prescient rendering of a dark future, and the inspiration for the blockbuster film Blade Runner By 2021, the World War has killed millions, driving entire species into extinction and sending mankind off-planet. Those who remain covet any living creature, and for people who can't afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep. They've even built humans. Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial humans can wreak, the government bans them from Earth. Driven into hiding, unauthorized androids live among human beings, undetected. Rick Deckard, an officially sanctioned bounty hunter, is commissioned to find rogue androids and "retire" them. But when cornered, androids fight back—with lethal force. Praise for Philip K. Selected Stories of Philip K. Dick contains twenty-one of Dick's most dazzling and resonant stories, which span his entire career and show a world-class writer working at the peak of his powers. In "The Days of Perky Pat," people spend their time playing with dolls who manage to live an idyllic life no longer available to the Earth's real inhabitants. "Adjustment Team" looks at the fate of a man who by mistake has stepped out of his own time. In "Autofac," one community must battle benign machines to take back control of their lives. And in "I Hope I Shall Arrive Soon," we follow the story of one man whose very reality may be nothing more than a nightmare. The collection also includes such classic stories as "The Minority Report," the basis for the Steven Spielberg movie, and "We Can Remember It for You Wholesale," the basis for the film Total Recall. With an introduction by Jonathan Lethem, Selected Stories of Philip K. Dick is a

magnificent distillation of one of American literature's most searching imaginations.

The 1992 release of the "Director's Cut" only confirmed what the international film cognoscenti have know all along: Ridley Scott's Blade Runner, based on Philip K. Dick's brilliant and troubling SF novel Do Androids Dream of Electric Sheep, still rules as the most visually dense, thematically challenging, and influential SF film ever made. Future Noir is the story of that triumph. The making of Blade Runner was a seven-year odyssey that would test the stamina and the imagination of writers, producers, special effects wizards, and the most innovative art directors and set designers in the industry. A fascinating look at the ever-shifting interface between commerce and the art that is modern Hollywood, Future Noir is the intense, intimate, anything-but-glamorous inside account of how the work of SF's most uncompromising author was transformed into a critical sensation, a commercial success, and a cult classic.

In 1982 the brilliant science fiction movie Blade Runner was released, and a phenomenon was born. Set in the steel-and-microchip jungle of twenty-first century Los Angeles, this masterpiece re-created our vision of the future, telling the story of Rick Deckard, a 'blade runner' who tracks down and executes renegade androids. Now, for the millions of fans of the movie, as well as those coming to the saga for the first time, K. W. Jeter's stylish and sophisticated new novel reenters that seedy, high-tech world and opens a new chapter of thrilling, nonstop, futuristic suspense. This time Deckard himself becomes both hunter and hunted in a race to prove his own humanity by tracking down the most elusive and dangerous android of all . . .
