The Bible's story of creation in Genesis names Adam as the first human in history. His story with Eve in the Garden of Eden is widely known-but what if he actually played a larger part in the story of humanity? In *The Gospel of Adam*, David L. Bishop takes well-known stories and characters from history and presents them through the eyes of Adam, as though he were living throughout all time on a mission to restore fallen humanity to a place worthy of returning to perfection. Following Adam through his profound interactions with Noah, King David, Jesus of Nazareth, and even Adolf Hitler, this book shows how Adam struggles not only with his mission to help humanity but also his own internal doubts as a man of faith. In the vein of works like *The Da Vinci Code* and *The Last Templar*, Bishop's *The Gospel of Adam* weaves history, philosophy, religion, and politics throughout a thought-provoking first-person narrative that both challenges and inspires the reader to consider what it really means to be human.

Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of The Daily Show's most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. "Blimp, blip, blimp, bloop. Suzy gripped her sheets tightly. Was that noise coming from under her bed?" *Helps Children Banish Bedtime Fears* So begins Suzy's adventure where she meets Karrit, another child, and one that lives far under her bed. The two children banish their bedtime fears and become best friends by treating each other the way that they want to be treated. *A Fear of Monsters is Common* A fear of monsters under the bed is common with children of all ages, starting with a vague sense of the unknown with younger toddlers and graduating to perhaps a more solid image in the minds of older children. *The Monster on Top of the Bed* flips the idea around, like the famous Disney Movie *Monsters Inc.*, and bases the story on the concept that it's the monsters that are actually afraid of the children. *The Children Model The Golden Rule* In this beautifully illustrated book we meet two children--Suzy and Karrit, and we discover that sometimes things are not always what they seem and when the monster fears the child, we come to see a different perspective on misunderstandings and ignorance. We also discover that it is easy to misinterpret the meanings of words and actions, when Karrit explains to Suzy that certain things she says and does,

frightens him. Although the words, "The Golden Rule" never appear in the book, the way the two children treat each other as though they would like to be treated enable the two of them to work together to work out their differences. A friendship forms, and a new light is shed upon them both when they realize that maybe they aren't so different from each other after all. A Mantra that Banishes Nighttime Fears When things get scary, both children use Grandmom's mantra, which is highly effective in banishing monsters, "You're welcome to stay until I say, 'Nay!' Then it's time to go, and you can't say, 'no.'" This is an empowering bedtime story. The multimedia edition contains a link to an .mp4 file that features the same audio tracks in the CD version. Children can listen to the story being read by four narrators who read the story in English, Spanish and Italian. There are page turning sounds to let the child know when to turn the page. There are slight differences between the words in CD version and the Kindle version. Children like the challenge of finding the differences. In addition to reading the story, the multimedia kindle edition also contains bonus material, including an interview with the illustrator, and other stories and poems

In this beautiful and richly illustrated book, the acclaimed author of *Blue and Black* presents a fascinating and revealing history of the color green in European societies from prehistoric times to today. Examining the evolving place of green in art, clothes, literature, religion, science, and everyday life, Michel Pastoureau traces how culture has profoundly changed the perception and meaning of the color over millennia—and how we misread cultural, social, and art history when we assume that colors have always signified what they do today. Filled with entertaining and enlightening anecdotes, *Green* shows that the color has been ambivalent: a symbol of life, luck, and hope, but also disorder, greed, poison, and the devil. Chemically unstable, green pigments were long difficult to produce and even harder to fix. Not surprisingly, the color has been associated with all that is changeable and fleeting:

childhood, love, and money. Only in the Romantic period did green definitively become the color of nature. Pastoureau also explains why the color was connected with the Roman emperor Nero, how it became the color of Islam, why Goethe believed it was the color of the middle class, why some nineteenth-century scholars speculated that the ancient Greeks couldn't see green, and how the color was denigrated by Kandinsky and the Bauhaus. More broadly, Green demonstrates that the history of the color is, to a large degree, one of dramatic reversal: long absent, ignored, or rejected, green today has become a ubiquitous and soothing presence as the symbol of environmental causes and the mission to save the planet. With its striking design and compelling text, Green will delight anyone who is interested in history, culture, art, fashion, or media.

About the history of the color black, its various meanings and representations.

John Sutter, who left Switzerland to escape debtor's prison, came to California and built a giant land monopoly. Again, he became heavily in debt and died destitute. The entire Sacramento and San Joaquin valleys were inundated for 300 miles long and 20 miles wide by the flood of 1862. The cholera epidemic killed more than 1,000 citizens, including doctors and others who were caring for the patients. The Old City Cemetery is an exciting place. As docents are quick to remind, "People are dying to get in here." The docents know their job. It's almost as though they are trying to bring the city's cemeteries back to life. We love the epitaph on one headstone that simply reads: "See ya later."

A beautifully illustrated visual and cultural history of the color blue throughout the ages Blue has had a long and topsy-turvy history in the Western world. The ancient Greeks scorned it as ugly and barbaric, but most Americans and Europeans now cite it as their favorite color. In this fascinating history, the renowned medievalist Michel Pastoureau traces the changing meanings of blue from its rare appearance in prehistoric art to its international ubiquity today. Any history of color is, above all, a social history. Pastoureau investigates how the ever-changing role of blue in society has been reflected in manuscripts, stained glass, heraldry, clothing, paintings, and popular culture. Beginning with the almost total absence of blue from ancient Western art and language, the story moves to medieval Europe. As people began to associate blue with the Virgin Mary, the color became a powerful element in church decoration and symbolism. Blue gained new favor as a royal color in the twelfth century and became a formidable political and military force

during the French Revolution. As blue triumphed in the modern era, new shades were created and blue became the color of romance and the blues. Finally, Pastoureau follows blue into contemporary times, when military clothing gave way to the everyday uniform of blue jeans and blue became the universal and unifying color of the Earth as seen from space. Beautifully illustrated, Blue tells the intriguing story of our favorite color and the cultures that have hated it, loved it, and made it essential to some of our greatest works of art.

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR □ Discover a world of creativity and tradition in this fascinating picture book that explores the history and cultural significance of the color blue. From a critically acclaimed author and an award-winning illustrator comes a vivid, gorgeous book for readers of all ages. For centuries, blue powders and dyes were some of the most sought-after materials in the world. Ancient Afghan painters ground mass quantities of sapphire rocks to use for their paints, while snails were harvested in Eurasia for the tiny amounts of blue that their bodies would release. And then there was indigo, which was so valuable that American plantations grew it as a cash crop on the backs of African slaves. It wasn't until 1905, when Adolf von Baeyer created a chemical blue dye, that blue could be used for anything and everything--most notably that uniform of workers everywhere, blue jeans. With stunning illustrations by Caldecott Honor Artist Daniel Minter, this vibrant and fascinating picture book follows one color's journey through time and across the world, as it becomes the blue we know today.

There are many theories about what caused the Great Depression, and the truth is that there is no simple answer. Rather, a perfect storm of events came together and changed the lives of millions of people. One of the first signs of this dark period was the stock market crash in October 1929. In the aftermath, the country fell into the Great Depression, the longest and most significant economic depression since the Civil War. Through most of the 1920s, the United States economy was growing, and the stock market had reached new highs. People were making money in the stock market and having a grand time, so much so that few noticed the dark clouds forming on the horizon. By the end of the decade, industrial production had begun to decline, while unemployment was steadily rising. Stock market prices were plummeting from their peak in September 1929, and sales reached a crescendo in late October. On October 29, over sixteen million shares were traded in just one day. Billions of dollars were lost,

with thousands of investors wiped out, and stock tickers were running hours behind because they were simply unequipped to manage this unprecedented amount of trading. The crash was not the only cause of the Great Depression, but it was certainly a symptom of a larger set of problems. Earlier in 1929, Herbert Hoover won the presidency under a wealth and prosperity platform. He made several unsuccessful attempts to prevent the economy from weakening during his administration. Despite his best efforts, banks continued to fail, and more Americans entered the ranks of unemployment. No one understood the extent of this economic downturn. But the election of 1932 brought Democrat Franklin D. Roosevelt into the White House by a landslide. Roosevelt wasted no time, proposing extensive legislation called the New Deal to create new jobs, revitalize the banks, and give hope to the American people. Some of the New Deal programs were successful, while other fell short; but by the end of the 1930s, things had finally begun to improve. However, it would take the massive spending required during World War II for the economy to return to where it was a decade before. For centuries, dyed fabrics ranked among the most expensive objects of the ancient Mediterranean world, fetching up to 20 times their weight in gold. Huge fortunes were made from and lost to them, and battles were fought over control of the industry. The few who knew the dyes' complex secrets carefully guarded the valuable knowledge. The Rarest Blue tells the amazing story of tekhelet, or hyacinth blue, the elusive sky-blue dye mentioned 50 times in the Hebrew Bible. The Minoans discovered it; the Phoenicians stole the technique; Cleopatra adored it; and Jews—obeying a Biblical commandment to affix a single thread of the radiant color to the corner of their garments—risked their lives for it. But with the fall of the Roman Empire, the technique was lost to the ages. Then, in the nineteenth century, a marine biologist saw a fisherman smearing his shirt with snail guts, marveling as the yellow stains turned sky blue. But what was the secret? At the same time, a Hasidic master obsessed with reviving the ancient tradition posited that the source wasn't a snail at all but a squid. Bitter fighting ensued until another rabbi discovered that one of them was wrong—but had an unscrupulous chemist deliberately deceived him? Baruch Sterman brilliantly recounts the complete, amazing story of this sacred dye that changed the color of

The papers of Hans Paul Caemmerer (1922-1954) are deposited in the National Archives and include considerable correspondence concerning this book about Pierre Charles L'Enfant (1754-1825). It was Caemmerer who dispelled the belief that L'Enfant was an engineer, and found that he studied in the French Royal Academy of Painting and Sculpture under his own father, an accomplished oil painter. L'Enfant's big opportunity was to fill a blank canvas, physically and ideologically, of what became the capital. L'Enfant and pace, Caemmerer's life of him, have been much cited by those who have caught a fever in terms of Washington as being of occult design. The need or desire to connect L'Enfant's original drawings for the city with Freemasonry relies on some still poorly researched history. Masonic meetings possibly took place in early Georgetown. Potomac Lodge in Georgetown has the enigmatic Bladensburg Bible that was published in Edinburgh in 1754. Stories recorded long afterwards claimed the book was used for pre Revolutionary Masonic rituals. Since Freemasonry teaches that one reason for belonging is to enable travel in foreign lands, Freemasons befriending each other in earliest Georgetown is a pleasant, but unsubstantiated conjecture.

It's called the "Gettysburg of the West," the battle for control of Glorietta

Pass, near Santa Fe. At stake is a route to Colorado's gold and San Francisco's unblockadable sea coast, two goals that would give the Confederate States a vital edge. General H.H. Sibley's Texas Confederates are opposed by a Union army under Colonel E.R.S. Canby. Before the war, Sibley and Candby were on the same side. Now there's just no winning in this bloody battle between countrymen torn apart by money, politics, and geography. History will ignore the fate of Lieutenant Franklin of New York, Captain O'Brien of the Colorado Volunteers, Jamie Russell of San Antonio, and Miss Laura Howland, recently arrived from Boston. They will be utterly changed, however, in the cauldron of battle where the fate of Glorieta Pass--and hundreds of lives--is decided.
