mobile devices, and architecture. When designers and artists learn the basics of writing software, they develop a new form of literacy that enables them to create new media for the present, and to imagine future media that are beyond the capacities of current software tools. This book introduces this new literacy by teaching computer programming within the context of the visual arts. It offers a comprehensive reference and text for Processing (www.processing.org), an open-source programming language that can be used by students, artists, designers, architects, researchers, and anyone who wants to program images, animation, and interactivity. Written by Processing's cofounders, the book offers a definitive reference for students and professionals. Tutorial chapters make up the bulk of the book; advanced professional projects from such domains as animation, performance, and installation are

discussed in interviews with their creators. This second edition has been thoroughly updated. It is the first book to offer in-depth coverage of Processing 2.0 and 3.0, and all examples have been updated for the new syntax. Every chapter has been revised, and new chapters introduce new ways to work with data and geometry. New “synthesis” chapters offer discussion and worked examples of such topics as sketching with code, modularity, and algorithms. New interviews have been added that cover a wider range of projects. “Extension” chapters are now offered online so they can be updated to keep pace with technological developments in such fields as computer vision and electronics. Interviews SUE.C, Larry Cuba, Mark Hansen, Lynn Hershman Leeson, Jürg Lehni, LettError, Golan Levin and Zachary Lieberman, Benjamin Maus, Manfred Mohr, Ash Nehru, Josh On, Bob Sabiston, Jennifer

Framed by historic developments—from the Open Admissions movement of the 1960s and 1970s to the attacks on remediation that intensified in the 1990s and beyond—BASIC WRITING traces the arc of these large social and cultural forces as they have shaped and reshaped the field. GEORGE OTTE and REBECCA WILLIAMS MLYNARCZYK balance fidelity to the past with present relevance, local concerns with (presumptively) global knowledge, personal

judgment with (apparent) objectivity. BASIC WRITING circles back on the same general story, looking for different themes or seeing the same themes from different perspectives. What emerges is a gestalt of Basic Writing that will give readers interested in its history, self-definition, pedagogy, or research a sense of the important trends and patterns. Otte and Mlynarczyk make research trajectories clear without oversimplifying them or denying the undeniable blurring, dissensus, and differential development that characterizes

the field. GEORGE OTTE is a member of the doctoral faculty at the CUNY Graduate Center in the PhD Programs in English, Urban Education, and Interactive Technology and Pedagogy. He served as coeditor of the JOURNAL OF BASIC WRITING from 1996 to 2002. He is the coauthor with Nondita Mason of WRITERS' ROLES: ENACTMENTS OF THE PROCESS (Harcourt, 1994) and, with Linda Palumbo, of CASTS OF THOUGHT: WRITING IN AND AGAINST TRADITION (Macmillan, 1990). REBECCA WILLIAMS MLYNARCZYK has

taught basic writing at the City University of New York since 1974. She is currently professor of English at the CUNY Graduate Center and Kingsborough Community College, where she codirects the ESL program. She is the author of CONVERSATIONS OF THE MIND: THE USES OF JOURNAL WRITING FOR SECOND-LANGUAGE LEARNERS (Erlbaum) and the coauthor, with Steven Haber, of IN OUR OWN WORDS: STUDENT WRITERS AT WORK (Cambridge). She has served as coeditor of the JOURNAL OF BASIC

WRITING since 2003.

New York Times bestselling authors and creators of the mega-popular YouTube series Game Master Network Matt and Rebecca Zamolo return with a brand-new adventure about everyone's favorite mystery-solving team. Rebecca Zamolo has managed to foil the Game Master's plans before, but this time the Game Master has snake-napped Nacho, her good friend Miguel's pet. No way is Becca going to let the Game Master get away with this dastardly plan. But when the clues lead Becca and her new

"Chapter Goals" and "Chapter Goals Revisited" are two new features in this revision. Each chapter starts with a list of goals that allows students to see what is ahead. The chapter concludes with a repetition of that list with summary information added. General ChemistryNow

is correlated to this list. New to this edition are dozens of "Active Figures" to help students visualize chemistry in action. These animated versions of text art help students master key concepts from the book. "Active Figures" can be used as demonstrations in the classroom and each figure is paired with a guided exploration and exercise to ensure students understand the concept being illustrated. In-text worked "Examples" follow a four-part structure: "Problem" statement, "Strategy" for approaching the problem, fully worked "Solution," and, where

appropriate, a "Comment" on the problem and solution. Through this approach, students learn how to approach a problem rather than merely learning to memorize problem types and memorized solution approaches. Exercises appear throughout the text so students can check their comprehension of the material. Answers are in an appendix. "Problem-Solving Tips" provide readers tips for determining how to approach and solve problems. "Chemical Perspectives" are essays that bring relevance and perspective to a study of

chemistry. In order to put chemistry in its historical context, "Historical Perspective" essays describe the people who were key to developing the concepts of the chapter. "A Closer Look" essays describe ideas that form the background to material under discussion or provide another dimension of the subject. - Publisher.

Soaring Streaks is a collection of poems on various subjects that mankind can easily relate to. Simple things around us are given a thought and well expressed through different angles. These common thoughts

would have crossed through our minds sometime or the other. Hence, as we are taken through the lines of these poems, we affirmatively enjoy and experience the flow of thought. Through Soaring Streaks, the poet intends to spread the delight of poetry writing. The influences of these poems are more on a personal level and can strengthen the emotional quotient to make humanity more humane. If this collection of poems can enthuse the readers to enjoy the magnificence of poetry, that will be considered as the success of Soaring

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. dream to experience the real Australian outback. When the opportunity comes up to join her boyfriend Brad on remote property Rosalee Station, she jumps at the chance. But within days of arriving, her relationship is in tatters, and the reality of outback life is fast losing its appeal. Determined to prove herself, Sarah stays on, earning the admiration of Matt, the station owners' son. Beneath the wide outback skies, the pair are irresistibly drawn to each other, until a stolen kiss leads to disaster. Sarah leaves Rosalee, convinced she'll never see Matt again - but will fate find a way to intercede?
