conference started from the observation that in the 21st century, the era of high technology, without new approaches in research, we cannot speak of a harmonious society. The theme of the conference, proposing a new approach related to Industry 4.0, was the development of a new generation of smart factories based on the manufacturing and assembly process digitalization, related to advanced manufacturing technology, lean manufacturing, sustainable manufacturing, additive manufacturing, and manufacturing tools and equipment. The conference slogan was “ Europe ’ s future is digital: a broad vision of the Industry 4.0 concept beyond direct manufacturing in the company ” .

This book presents a comprehensive study of all important aspects of tribology. It covers issues and their remedies

adopted by researchers working on automobile systems. The book is broadly divided in to three sections, viz. (i) new materials for automotive applications, (ii) new lubricants for automotive applications, and (iii) impact of surface morphologies for automotive applications. The rationale for this division is to provide a comprehensive and categorical review of the developments in automotive tribology. The book covers tribological

aspects of engines, and also discusses influence of new materials, such as natural fibers, metal foam materials, natural fiber reinforced polymer composites, carbon fiber/silicon nitride polymer composites and aluminium matrix composites. The book also looks at grease lubrication, effectiveness and sustainability of solid/liquid additives in lubrication, and usage of biolubricants. In the last section the book focuses on brake pad materials,

shot peening method, surface texturing, magnetic rheological fluid for smart automobile brake and clutch systems, and application of tribology in automobile systems. This book will be of interest to students, researchers, and professionals from the automotive industry. "Is it possible to eat anything you want, five days a week, and become slimmer and healthier as a result? Simple answer: yes. You just limit your calorie intake for two

nonconsecutive days each week to 500 calories for women, 600 for men. You'll lose weight quickly and effortlessly, and the joy of the FastDiet is that the side effects are all welcome. The science is easy. Intermittent fasting takes your body out of go-go mode and puts it into survival mode, causing the body to slow production of new cells and repair old ones instead. As a result, you not only lose weight but also reduce your risk of a range of diseases from

This book brings together the results of new, groundbreaking research to create a dietary program that can be incorporated into your busy daily life, featuring: Forty 500- and 600-calorie meals that are quick and easy to make 8 pages of photos that show you what a typical "fasting meal"

looks like the cutting-edge science behind the program. A calorie counter that makes dieting easy, and much more.
