This is a new release of the original 1930 edition.

Welcome to the Sixth Terrace of Dante's tower of Purgatory, serving up sins of gluttony in an eternal banquet. On this carefully curated menu you'll find children stuffing themselves to death, a forgotten saviour gorging on cheeseburgers between bareknuckle rounds on the roadhouse circuit, wealthy socialites revel in an orgiastic alien feast, and the end of days as

seen through an apocalyptic carnival of indulgence. Excessive consumption also manifests in darker hungers, for cruelty, for distraction, or possession. A pair of grifters bent on having it all chase a Scottish leprechaun across the English countryside, a newly deceased addict vies for the attention of Heavenly Higher Ups, degenerate poker players gamble with unforeseen currency, and when an old lady swallows a fly, it's just the beginning...

Featuring nine stories of grotesque appetite and glorious excess from a gory gaggle of creators, they say too much of anything is poison, yet these

decades. She argues that the feminist movement veered off course from its original aim of helping women achieve equality and ended up making enemies of men. The pendulum has swung from the reasonable middle to a place where men have been ridiculed in the public square and the importance of fatherhood has been diminished—all to the detriment of women and children, who ultimately suffer most. Exploring our burgeoning culture of permissiveness and the impact of anti-male attitudes on families and relationships, Kathleen Parker tackles some of the more taboo subjects in today's sexual politics and culture wars that will have America talking about saving the males. Bob Tasca is, quite simply, the world's most effective practitioner of customer satisfaction. His accomplishments are

astounding. His small Ford dealership is consistently among the world's best in sales volume, and industry executives from all over often visit in order to learn from his operation. Though he sells a generic product, Tasca has at times achieved the unheard-of feat of capturing 24 percent of his metro market, and he regularly sees 65 percent of his customers return -- triple the loyalty rate of his competitors. In *You Will Be Satisfied*, he reveals how anyone, whether shoe salesman, software company middle manager or bookstore owner, can drive customer loyalty to dizzying heights. In the book's short, punchy chapters, real-life anecdotes and bulleted lessons, readers will find the knowledge and tools they need to send their sales soaring.

The only book series to summarize the latest progress on organic reaction mechanisms, *Organic Reaction Mechanisms*, 1992 surveys the development in understanding of the main classes of organic reaction mechanisms reported in the primary scientific literature in 1992. The 28th annual volume in this highly successful series highlights mechanisms of stereospecific reactions. Reviews are compiled by a team of experienced editors and authors, allowing advanced undergraduates, graduate students, postdocs, and chemists to rely on the volume's continuing quality of selection and presentation.

The book focuses on the effects of shock waves on vacancies and their clusters in fcc crystals. It is shown that high-speed cooperative atomic displacements represent a powerful tool for the purposeful modification of defect structures in

crystalline bodies. The results are important for radiation material science, nano-engineering, the study of shock wave effects and the ultrasonic treatment of materials.
