At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

Other people's big wedding was to enter the bridal chamber, while she and Mo Jingyao wore wedding gowns. Eh? Where is this? The space was too small and it was too close. From then on, Young Master Mo was used to having many small pets in his arms. If a pet wasn't pampered, it would be a waste. Thus, Young Master Mo was determined to bring this truth to its peak. She went up to the house, and he helped her undress. She said that her father didn't love her mother, so with a wave of his hand, he decided to change his mother to a new father and mother. She said that her elder brother and elder sister bullied her, and he stepped on her. My wife is your ancestor. The little ancestor went out every day, and Young Master Mo's body was filled with tears. "My little wife is fair and beautiful, a natural born beauty. Watch out for me." "Young Master, are you blind ..." "Scram..."

In this page-turning fiction book, Jacob's Little League team, Morey's Funeral Home, is a perennial loser. They have never finished with a winning record, but this ragtag team of ten-year-olds has a new coach and a positive attitude for opening day. Standing in the way of a championship is the best team in the league, the Bankees. Will Jacob lead his team to a winning season? To beat their nemesis, they will need help from everybody, including Rupa, the team's worst player. Can the underdog, Morey's Funeral Home team, make a mad dash to victory?

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

'It's incisive, it's intriguing, it's fascinating' – Ryan Tubridy, RTÉ 'Fascinating!'
Keith Ward, FM104 The definitive account of the rise of the Kinahan gang and the deadly feud that has shocked the nation. He is one of Ireland's most successful CEOs, running a global multinational with operations on every continent and a turnover in the billions. However, Christy Kinahan will never be fêted in the financial press. For his business – drugs, guns, money–laundering, murder – also makes him Ireland's leading criminal. While Kinahan kept a low profile as he grew his empire, by the time his crime cartel shot to public attention in 2010 it was known to European police forces for over a decade. In that year police raided members' homes and premises in Spain, Ireland the UK. By then Kinahan and his sons Daniel and Christopher Jr were already among the richest men in Europe, with an estimated joint worth of €750m. However, events in February 2016 made Kinahan a household name. A daring and deadly gun attack in a suburban Dublin hotel – an attack targeting Daniel Kinahan (who escaped) – stunned the public and exposed the depth of enmity between the Kinahans and the family and associates of the veteran Dublin criminal, Gerry Hutch. Despite an intense garda crack–down on the gangsters' activities, the body count continues to rise. The Cartel gives behind–the–scenes story of that initial Spanish–led raid on the Kinahans. The authors have had exclusive access to the wiretaps that tracked the cartel for two years and talked to key officers who investigated them. They expose the criminal clan's aims and actions – in members' own words – and reveal the surprising truths behind how they built their empire. And The Cartel brings the story bang up–to–date to explain the origins of and fall–out from the feud with the Hutches, one of the most violent and vicious Ireland has ever known – and one that could be the undoing of the Kinahans. The authors' combined depth of knowledge – Stephen Breen has been a crime correspondent for over 15 years and in addition to writing about crime for over a decade, Owen Conlon is a fluent Spanish speaker – has culminated in a detailed and gripping account of double–crossing, vengeance and murder.

Relive the first one hundred years of Germany's best two– and four–wheeled rides. Established in 1916, BMW is one of the auto and motorcycle industry's oldest and most–respected car and motorcycle manufacturers. Over the past century, the company went through myriad developments. The BMW Century chronicles this remarkable transportation

company through images of the cars and motorcycles it manufactured, from the 1923 R32 motorcycle to sleek electric cars of today. This handsome volume is filled with images, history, and in-depth looks at the incredible machines BMW created year after year. The BMW Century showcases how the company's new visionary team systematically rebuilt BMW in the post-World War II years into the spectacular success we know today – that is, a company with sales projected to be upwards of two million cars annually by 2016, led by its 3-series, the best-selling luxury-performance car in the world. BMW's motorcycle division is no less legendary. It began with the 1923 avant-garde R32, which featured a 180-degree, horizontally opposed twin, the engine configuration that would become BMW's hallmark. Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. From the pre-war motorcycles to the iconic R-series twins of the 1970s and 80s to the mighty M-series cars and superbikes of today, The BMW Century offers a full review of German engineering at its finest. The book is illustrated with hundreds of historic, contemporary, and racing photographs – many sourced from BMW's archives – and detailed text relating the BMW's full history. This is the one volume no BMW aficionado can be without.

In spite of all the assistance offered by electronic control systems, the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references, this new edition already includes a number of improvements over the first edition.

As the second edition of Global Business Strategy, this book provides novel insights on how a firm can formulate a successful approach toward its global business from both the Western and Asian perspectives. In this respect, the book's overall goal is to bridge the gap between these two different viewpoints. This second edition includes more recent business theories, techniques, and cases within the field of global business strategy. Specifically, it includes new theories and techniques like creating shared value (CSV), the global value chain, platform strategy, and business ecosystem.

They are shown to be important tools for enhancing competitiveness and maintaining sustainability among firms in today's rapidly changing international business environment. This is very much evident today given the critical challenges arising from the trade tensions between the United States and China, emerging technologies such as artificial intelligence and digital transformation, and the unprecedented disruptions brought on by the coronavirus pandemic. We hope that this book will serve as a useful companion for students, business practitioners, policymakers, and the more general readers interested in issues related to competitiveness and business.

ACURA Integra Prototype美國發表 HONDA海外市場高級車品牌ACURA在美國發表新型Integra Prototype原型車。Integra是1980-1990年代在日本市場上相當受到年輕族群歡迎的轎跑車與四門運動房車。第三代與第四代車款中都有高性能的「Type R」車型，不過在2006年時Integra就在日本國內市場上停產了。而在美國市場這邊，美規Integra則是於1986年3月27日首度發表，也是ACURA品牌最早二款市售車其中之一台。2002年隨著車型改款，車名也改為ACURA RSX相當於日本第四代Integra。不過同樣地隨著車系停產，Integra在美國也於2006年下市。現在ACURA決定將這款車重新回到美國市場，並轉以五門豪華運動房車的形態來復活，成為品牌之下最新的入門性能車款。動力上會搭載1.5升直列四缸VTEC Turbo引擎來搭配六速手排變速箱與LSD限滑差速器。設計工作在日本進行的新Integra在外觀風格上完全突破過往，相當傾斜的車頂線條與接近斜背設計的尾門都是它的主要特色，也不會讓人錯任它獨特的轎跑車屬性。車頭還採用了來自Type S Concept概念車的鑽石五角形水箱罩。頭燈組則是由車廠暱稱為「Jewel Eye」的LED頭燈與稱為「Chicane」的日行燈所組成，並與尾燈造型相互呼應。車身色是與NSX相同的「Indy Yellow Pearl」珍珠黃色，來向2000-2001年三代Integra Type R的 Phoenix Yellow致敬。在消光黑19吋五輻式樣鋁圈中配備了與車身同色的Brembo煞車卡鉗。新Integra預計於2022年開始在美國俄亥俄州Marysville的工廠進行生產，在2022上半年就會上市，售價則估計從三萬美元左右起跳。

Volume 2 of the two-volume set Advanced direct injection combustion engine technologies and development investigates diesel DI combustion engines, which despite their commercial success are facing ever more stringent emission legislation worldwide. Direct injection diesel engines are generally more efficient and cleaner than indirect injection engines and as fuel prices continue to rise DI engines are expected to gain in popularity for automotive applications. Two exclusive sections examine light-duty and heavy-duty diesel engines. Fuel injection systems and after treatment systems for DI diesel engines are discussed. The final section addresses exhaust emission control strategies, including combustion diagnostics and modelling, drawing on reputable diesel combustion system research and development. Investigates how HSDI and DI engines can meet ever more stringent emission legislation Examines technologies for both light-duty and heavy-duty diesel engines Discusses exhaust emission control strategies, combustion diagnostics and modelling

The two-volume set of LNCS 11778 and 11779 constitutes the refereed proceedings of the 18th International Semantic Web Conference, ISWC 2019, held in Auckland, New Zealand, in October 2019. The ISWC conference is the premier international forum for the Semantic Web / Linked Data Community. The total of 74 full papers included in this volume was selected from 283 submissions. The conference is organized in three tracks: for the Research Track 42 full papers were selected from 194 submissions; the Resource Track contains 21 full papers, selected from 64 submissions; and the In-Use Track features 11 full papers which were selected from 25 submissions to this track.

The title of the book is My Mother's Door. This is the story of Monique, Moe for short. Moe's mother worked for BMW, Plant10 in Spartanburg, SC making left rear doors for BMW X3's, and X4's. Moe's mother passes away while giving birth to Moe's baby brother. Moe is very sad. She misses her mother, but then her father brings her mother home, or to her he does. Moe's father brings home a BMW X3 and Moe feels the presence of her mother in the left rear door. Moe describes all the many ways she can feel her mother in the door, and the positive impact it makes in her life. The BMW is totaled in an accident. During the accident Moe can feel how her mother protected her father, baby brother, and herself. Although the car was totaled, none of passengers in the car were hurt. Her father brings home a new X3, but the left rear door of the new X3 does not have her mother's presence. Moe is very angry at this second loss of her mother, and refuses to ride in the car. She is sent to consulators, but no one seems to understand. Finally her father brings a German BMW engineer home to talk with her. She is pleased that at last someone understands. The book ends happily with Moe riding in the new BMW X3, with a rather beat-up left rear door, but although perhaps not as new as the rest of the car, she now rides safe, secure, and happy, beside her mother's door.

Inhaltsangabe:Abstract: The word marketing is always appearing in most articles and books dealing with selling, the word has been watered down and in many cases lost its true value and sense. Most people mistakenly identify marketing with selling and promotion - but selling is only the tip of the marketing iceberg. It is simply one of several marketing functions, and often not the most important one. If the marketer does a good job of identifying consumer needs, developing appropriate products, and pricing, distributing, and promoting them effectively, these goods will sell very easily. Companies have to search for buyers, identify their needs, design appropriate products, promote them, store and transport them, negotiate, and so on. Such activities as product

development, search, communication, distribution, pricing, and service constitute core marketing activities. We have defined the core marketing activities; supporting the sales force in their pursuit of revenues and profit. The marketing department have to focus multiple tasks ranging from product development to pricing. Often the marketing department is so intertwined in the sales processes that the marketing and sales division is one division, in order to maintain the direction required in order to achieve the objectives set up by the management. In the first part of this case we will look at the general term; strategic marketing and set up fictitious examples of how a company in the automotive industry would deal with strategic marketing and look at the tools available to the marketing department and how they are implemented. Being a multinational company like BMW you need a strategy for virtually prior to make a decision and this applies to marketing as well. The company has the past two decades developed from an international company to a global player, where the set of standards are different and the requirement for setting up a marketing strategy has changed. We have decided in this case to analyze the decisions behind launching certain products; such as the roadster; the Z Series and the X Series, which meant that BMW for the first time in its history ventured into new segments normally being dominated by other manufactures. The decision to leave the traditional segment where BMW had for years been successful and diversify the product line will be analysed and in the introduction we will try to cast a light on the tools and means behind such decisions. In the middle of the [...]
