Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive

diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions.

The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

The visual feast that is Dorset is enjoyed by millions – visitors and locals alike. But few are lucky enough to enjoy the Jurassic coastline 'from the outside looking in.' This book has been photographed entirely from the sea by sailor and marine photographer Steve Belasco who has cruised the area in small boats for over 20 years. Steve's love of Dorset's waters, those who enjoy them and the people and creatures that depend on them, leaps from every page.
