Living in Pakistan was like a 24/7 roller coaster ride for Sarah. Following into her father's footsteps she just picked herself and her family up from the comfortable, cosy and predictable British life only to land herself among people who not only thought and acted differently but despised her guts and truthfulness. Her experiences which were penned over a decade, takes you on an emotional journey which grips and entertains at the same time. The heroes and villains that cross her path come to life as she moves through time. A misfit and a rebel, she continued striving for the causes she believed in: only to end up in deep troubles which started to threaten her loved ones. After surviving

blasphemy charges, terrorism and corrupt power she reluctantly withdrew but refused to be a silent witness against all the injustices of the world she had lovingly embraced.

Agriculture plays a pivotal role in the economy and

development of Pakistan providing food to consumers, raw materials to industries, and a market for industrial goods. Unfortunately, agricultural production is stagnant due to several barriers including a fixed cropping pattern, reliance on a few major crops, a narrow genetic pool, poor seed quality, and a changing climate. In addition, the high cost of production, weak phytosanitary compliance mechanisms, and a lack of cold chain facilities makes Pakistan agriculturally uncompetitive in export markets. Despite all these issues, agriculture is the primary industry in Pakistan and small farmers continue to dominate the business. Small farmers grow crops for

subsistence under a fixed cropping pattern and a holistic approach is required to develop agriculture to improve the livelihoods of the rural populace. This book presents an exhaustive look at agriculture in Pakistan. Chapters provide critical analyses of present trends, inadequacies in agriculture, strategic planning, improvement programs and policies while keeping in view the natural resources, plant- and animal-related agricultural production technologies, input supplies, population planning, migration and poverty, and balanced policies on finance, credit, marketing, and trade.

This book investigates the impact of creative writing tests

on classroom practice in Pakistan. All National Education Policies in Pakistan since 1959 have expressed grave concern at the deteriorating standard of Board Examinations but no significant steps have been taken to improve the examination system. The method of assessment in the Pakistani classroom is influenced by the Board Examinations, with the students memorising the essays and stories from their textbooks and reproducing them. The Board Examination tends to produce negative washback as it damages learners' creative talents. Appropriate changes in the textbooks and the external examination, however, will, in turn,

definitely improve the teaching and assessment practices in the classroom.
