With hundreds of color photographs and illustrations, this Chinese gardening book is a wonderful introduction to penjing—China's treasured bonsai art. Although most people think bonsai is a Japanese invention, the art originated in ancient China where it is called penjing. The two Chinese characters for penjing ("pot" and "landscape") capture the essence of this art: sculpting microcosms of the beauty of the natural world from plants, rocks, soil, and water, both as an artistic process and as horticultural cultivation. Both penjing and bonsai are art forms that express the beauty of nature. In China, bonsai, as a part of penjing, is often called "tree penjing," or "tree in a pot." The Chinese divide penjing into

"Excellent guide...with specifics on individual plants." - The New York Times. A bonsai is a miniature tree. Grown in a shallow dish, it resembles larger trees in all respects except size, and lives to an equally old age. The conventional bonsai requires a site in the open air where the plant is exposed to sun, wind and rain in order to develop and remain healthy. In this book, however, Paul Lesniewicz looks at those species that can successfully be kept indoors all year round. He explores a vast variety of bonsai trees, including mini versions, which are only 3-6 inches tall, for those who are really lacking in space. Indoor Bonsai includes sections such as choosing a plant, growing it from seed, planting, general care, pests and diseases, shaping, wiring and pruning, and many other
