This book introduces novel and groundbreaking theories on social medicine, social medicine therapy and pharmacogelotology. Aimed at improving the global health care system in terms of cost-effectiveness and efficiency, the research included in this book represents a paradigm shift from traditional drugs to social medicine. Tracing the history of social medicine, from Natural Healing Power (NHP), Oriental Medicine ’ s vitalism, to Homeostasis (Natural Healing Strength) and Reciprocity (Social Healing Strength), the book first focuses on laying the theoretical foundations. It then highlights how social medicine can be specialized into various social medicine therapies (i.e., aromatherapy, stone therapy, diet therapy, exercise therapy, light therapy, etc.), just like stem cells. This is followed by arguments that 21st century pharmacy should be a harmonious system where the replacement of traditional drug products (i.e., herbal, chemical, and biological products) with new social medicine takes precedence. To that end, the author focuses on the '4+2 system' with 4 representing diet, body, stress, and facial-image control, and 2 representing the complementary and alternative medical methods of evacuation(-) and filling(+). In the context of pharmacogelotology, the book then goes on to present findings on theories of laughter and laughter therapy practices, which are systematically examined and described in detail. Finally, it calls for the development of social-medicine structures by governments that aim to help local authorities use their resources effectively, and for local governments to establish the long-term planning on social-medicine therapy for healthy ageing.

Tourism is a global phenomenon. Because it is an important, even vital, source of income for many countries in the world. Its importance was recognized in the Manila Declaration on World Tourism of 1980 as “ an activity essential to the life of nations because of its direct effects on the social, cultural, educational, and economic sectors of national societies and on their international relations and its indirect effects on the development of allied industries like transport, hotel etc. ” .Medical Tourism is one form of tourism and which means a journey that patients take from one country to another country to get cost effective and efficient medical treatment, followed by a great vacation at some of the most beautiful locations. India is one of the major players in this industry. Currently, it hosts about 1.27 million medical tourists from industrialized countries like UK, USA and Canada and from its neighboring countries such as Bangladesh, Sri Lanka, and China. Its foreign exchange earnings from medical tourism are estimated to be around US \$ 1.8 billion. The estimated number of medial tourists in India in 2015 would be between 1.21 million and 2.78 million. The estimated revenue would lie between US \$ 1719 million to US \$ 3964 million in 2015. Medical tourism industry in India has potential to contribute around 25 percent to the country ’ s Gross Domestic Product in the next five years, if fully tapped.The present book titled Sociology of Medical Tourism highlights various dimensions, identifies different issues and suggests further development of this multimillion dollar industry in India in an in-depth manner. Medical Tourism is one of the most important trust areas which emerge in the past century and because of its multiple level of use it also become subject matter of research in various subjects including Sociology. It is hoped that this book, with its wide-ranging and in-depth content, critical insights and detailed analysis of the concept, prove to be immensely resourceful to the readers. I also assure that this book should be proven an informative referral for those who are working and doing research in the field of medical tourism.

*This book discusses Asian medicine, which puts enormous emphasis on prevention and preservation of health, and examines how, in recent decades, medical schools in Asia have been increasingly shifting toward a curative approach. It offers an ethnographic investigation of the scenarios in China and India and finds that modern students and graduates in these countries perceive Asian medicine to be as important as Western medicine. There is a growing tendency to integrate Asian medicine with Western medical thought in the academic curriculum that has led to a gradual decline of Asian medical thought and practices. At the same time, there has been a massive rise in patent drugs, health products and cosmetics being sold under the brand names of Asian medicine or herbal medicine. Most of these drugs and health products do not follow the classical formulas found in the Asian medical texts. The book analyses these texts and concludes that contemporary Asian medicine rarely follows the classical texts, and in fact uses Asian medicine brands to sell Western health products and practices. With a particular focus on the formal and professional sector of Chinese herbal medicine and Indian ayurvedic medicine in urban areas, this book appeals to a broad readership, including undergraduate students and academics as well as non-experts. With significant cost advantages, availability of quality medical treatment with the most-advanced medical technology coupled with India's well-known tourist destinations and rich cultural heritage, medical tourism does provide a motive sufficient enough to allure those foreign patients who either want to avoid the long waiting list for medical treatment in the West or, in absence of any health insurance coverage, seek lower cost treatment. India's strength in advanced and life saving healthcare such as organ transplants, cardio-vascular surgery, etc, as well as in alternative systems of medicine(i.e. ayurveda, naturopathy, etc) offer significant competitive advantages. Cashing in this opportunity, The National Health Policy 2002 declared that treatment of foreign patients is legally an "export" and deemed "eligible for all fiscal incentives extended to export earnings." Besides, a new category of visa, "Medical Visa" has been introduced by Ministry of Home Affairs, Govt. of India. On the other hand, setting up of Bio-Technology Parks Society of India, grant of SEZ status to them, coming up Medicities, entry of private players in health insurance in India along with Indian hospitals looking for international accreditation glitter further hopes of accelerated medical tourism, a growth engine for foreign exchange earnings. However, the poor infrastructure of the country, shabby streets, pity state of our public hospitals shakes our confidence, despairs for this much hype of medical tourism and calls for serious attention wherein much m*

India has been a tourist hot spot and has lured foreigners predominantly because of its mysticism, spirituality, exotic locales and rich history and culture.But, as exceptional standards of medical treatment emerge there is a larger demand for low-priced, yet good quality health care, and an active involvement of the private sector, foreign patients have started perceiving the country as a perfect destination to have health treatments in the fields of Ayurveda, Naturopathy, Yoga, etc. India is an enchanting country, its a vibrant combination of breathtaking stunning landscapes, thick tropical forests, glorious historical sites, colorful people, rich culture and innumerable festivals. Seminar paper from the year 2013 in the subject Health Science, grade: B-, University of Bedfordshire, course: MASTER OF BUSINESS ADMINISTRATION IN HEALTHCARE & HOSPITAL MANAGEMENT, language: English, abstract: This report is written on the topic of ‘ Healthcare Tourism Opportunities for India ’ . The scope of this report is broad as it incorporates the case studies of five major players in Indian healthcare tourism sector. It has been observed that Healthcare Tourism and Medical Tourism are interchangeable terms. In general, there are two main causes (developed countries ’ increasing cost of healthcare services and their overburdened healthcare infrastructure) that have resulted in enhancing the demand for healthcare tourism. Medical Malpractices Insurance is the major for increasing the healthcare cost in developed countries. Commonly, medical malpractice insurance is considered as major aspect for increasing the cost of medical treatment, widening the delay in the waitlist and also enhancing the movement of medical professionals from one region to another. India has competitive edge in the healthcare tourism because of certain characteristics: healthcare professional availability, low-cost medical treatment, enhancing popularity of its traditional wellness systems and country ’ s existing reputation for treat of relatively advance healthcare segments (such as organ transplant, cardio-vascular surgery and eye surgery/ By reviewing all the case studies, it has been analysed that there are certain general practices that are being pursued by major healthcare service providers in India. It includes updation and utilisation of advanced technology & medical facilities, consistent healthcare education, research in medical sciences and the approach of skill development. It has been discovered that there are certain opportunities (Increasing cost of healthcare in developed countries, language proficiency of Indians, Indian healthcare institutions ’ success rate, delay in waiting time, Indian healthcare institutions ’ success rate and spillover effects) that could be exploited by the Indian medical institutions that are intended on providing medical services to foreign medical tourists. However, it has been determined that Indian medical tourism sector has been some of the challenges (Indian government ’ s low spending on Healthcare sector, lack of International Accreditation, transplantation law, shortage of hotel accommodation and inadequate malpractices law) that could have negative impact on the growth rate of this sector. It has been recommended that the strategies currently adopted by major players of Indian medical tourism sector have helped its country to emerge as favouri

What makes life worth living? Many people would argue that it is fulfilling experiences. These experiences are characterised by feelings of joy and pleasure, positive relationships and a sense of engagement, meaning and achievement. Tourism is arguably one of the largest self-initiated commercial interventions to promote well being and happiness on the global scale but yet there is absence in the literature on the topic of fulfilling tourist experiences from psychological perspectives. Drawing on insights and theories from the research field of positive psychology (the study of well being), this is the first edited book to evaluate tourist experiences from positive psychology perspectives. The volume addresses the important topic of fulfillment through the lens of the world ’ s largest social global phenomenon tourism. In doing so, the book refreshes and challenges some aspects of tourist behaviour research. The chapters are grouped under three broad sections which reflect a range of positive psychological outcomes that personal holiday experiences can produce, namely; happiness and humour; meaning and self-actualisation and health and restoration. The book critically explores these fulfilling experiences from interdisciplinary perspectives and includes research studies from wide range of geographical regions.

By analysing the contemporary fulfilling tourist experiences the book will provide further understanding of tourist behaviour and experience. Written by leading academics this significant volume will appeal to those interested in Tourism and Positive Psychology.

Concept Analysis and Development Suggestions

A Critical Introduction

*The state Kerala, or God's Own Country as its corporate slogan goes, has pioneered health tourism in India. They have made a concerted effort to promote health tourism in a big way, which has resulted in a substantial increase of visitor arrivals into the state. Kerala and Ayurveda have virtually become synonymous with each other. However, though Kerala has strongly focused on Ayurveda and its wide array of treatments and medications, good facilities are also available in the other traditional forms of medicine as well as in modern medical treatment. The bias towards health tourism in Kerala is so strong that Kerala Ayurveda Centers have been established at multiple locations in various metro cities. The health tourism focuses on Kerala's participation in various trade shows and expos wherein the advantages of this traditional form of medicine are showcased. Kerala, has one of the best qualified professionals in each and every field, Allopathy, Dental, Ayurveda etc and this fact has now been realized the world over. Regarding Medical facilities Kerala has the most competent doctors and world class medical facilities. This text book highlights types of health tourism products available at Kerala and gives over all marketing process, risk factors etc. of health tourism.*

*Traditional East Asian healthcare systems have moved rapidly from the fringes of healthcare systems in the West towards the centre over the past 50 years. This change of status for traditional medicines presents their practitioners with both opportunities and challenges as the focus shifts from one of opposition towards one of integration into biomedically dominated healthcare systems. Integrating East Asian Medicine into Contemporary Healthcare examines the opportunities and challenges of integrating East Asian medicine into Western healthcare systems from an interdisciplinary perspective. Volker Scheid and Hugh MacPherson bring together contributions from acknowledged experts from a number of different disciplines - including clinical researchers, Chinese Medicine practitioners, historians, medical anthropologists, experts in the social studies of science, technology and medicine - to examine and debate the impact of the evidence-based medicine movement on the ongoing modernization of East Asian medicines. The book considers the following questions: •What are the values, goals and ethics implicit within traditional East Asian medical practices? • What claims to effectiveness and safety are made by East Asian medical practices? •What is at stake in subjecting these medical practices to biomedical models of evaluation? • What constitutes best practice? How is it to be defined and measured? • What are the ideologies and politics behind the process of integration of East Asian medical practices into modern health care systems? • What can we learn from a variety of models of integration into contemporary healthcare?*

*Handbook for Medical Tourists to India*

The relationships between religion, spirituality, health, biomedical institutions, complementary, and alternative healing systems are widely discussed today. While many of these debates revolve around the biomedical legitimacy of religious modes of healing, the market for them continues to grow. The Routledge Handbook of Religion, Medicine, and Health is an outstanding reference source to the key topics, problems, and debates in this exciting subject and is the first collection of its kind. Comprising over thirty-five chapters by a team of international contributors, the Handbook is divided into five parts: Healing practices with religious roots and frames Religious actors in and around the medical field Organizing infrastructures of religion and medicine: pluralism and competition Boundary-making between religion and medicine Religion and epidemics Within these sections, central issues, debates and problems are examined, including health and healing, religiosity, spirituality, biomedicine, medicalization, complementary medicine, medical therapy, efficacy, agency, and the nexus of body, mind, and spirit. The Routledge Handbook of Religion, Medicine, and Health is essential reading for students and researchers in religious studies. The Handbook will also be very useful for those in related fields, such as sociology, anthropology, and medicine.

The quest for wellness is universal and has always featured prominently in human history. To move ahead in this journey, learn all about the mystical energy centers that are integral to the ancient Indian traditions of Yoga and Ayurveda. The Chakras are inner portals of harmony, linking the physical and spiritual planes, thus offering a deep and time-tested formula for transformation, abundance and the ability to hack into one’s own power of manifestation. Using simple and everyday language, this book equips you with the ability to harness the potential of the tremendous internal energy pools that lie dormant in the body, and helps you to channelize it and act upon your life purpose by presenting Chakras as a tool for self-development. The book delves into concepts such as Sankhya, Yoga philosophies and the Karma doctrine in order to establish the context of how the Chakra energies work. It outlines the various aspects (such as sound, colour, mandala, body parts, related ailments and dysfunctions) associated with each of the seven chakras while recommending time-tested remedies to bring each chakra into a state of balance and harmony. Compatible with any spiritual path, the holistic perspective helps create a richer and more fulfilling life, from overcoming everyday challenges to taking charge of one’s wellbeing, expressing one’s true self and navigating life’s journey towards full-spectrum living. This is the second book by the author in the Spirituality Series. The first book, which was very well received by readers and critics alike, was about the esoteric Sri Chakra Yantra. Men go forth to wonder at the heights of mountains, the huge waves of the sea, the vast compass of the ocean, the courses of the stars; and they pass by themselves without wondering. St. Augustine. Whether you are in your backyard or the farthest-flung corner of the Earth, all the mysteries and wonders of life are right there both in front of you and inside of you, in your soul. In the world of travel, the only way you really learn anything from the outside world is if you come across something that touches you deeply in some way. It either inspires or angers you enough to reassess your life and push for something different which is why I'm against cosmetic travel where you see packaged tourism and don't interact with the people and land like a pilgrim going there looking to get something out of

the deal in a conscious way.
