Trading is a battle between you and the market. And while you might not be a financial professional, that doesn't mean you can't win this battle. Through interviews with twelve ordinary individuals who have worked hard to transform themselves into extraordinary traders, Millionaire Traders reveals how you can beat Wall Street at its own game. Filled with in-depth insights and practical advice, this book introduces you to a dozen successful traders-some who focus on equities, others who deal in futures or foreign exchange-and examines the paths they've taken to capture considerable

profits. With this book as your guide, you'll quickly become familiar with a variety of strategies that can be used to make money in today's financial markets. Those that will help you achieve this goal include: Tyrone Ball: trades Nasdaq stocks almost exclusively, and his ability to change with the times has enabled him to prosper during some of the most treacherous market environments in recent history. AShkan Bolour: one of the earliest entrants into the retail forex market, he trades in the direction of the major trend, rather than trying to find reversals. Frank Law: a technician at heart, identifies a trading zone, commits to it, and scales down as long as the zone holds. Paul Willette: has mastered a method that allows him to harvest some profits right away, while ensuring that he can still benefit from an occasional extension run in his favor. Contemporary American Science Fiction Film explores and interrogates
a diverse variety of popular and culturally relevant American science
fiction films made in the first two decades of the new millennium,
offering a ground-breaking investigation of the impactful role of
genre cinema in the modern era. Placing one of the most popular and
culturally resonant American film genres broadly within its rich
social, historical, industrial, and political context, the book
interrogates some of the defining critical debates of the era via an
in-depth analysis of a range of important films. An international
team of authors draw on case studies from across the science fiction
genre to examine what these films can tell us about the time period,
how the films themselves connect to the social and political context,
how the fears and anxieties they portray resonate beyond the screen,
and how the genre responds to the shifting coordinates of the

Hollywood film industry. Offering new insights and perspectives on the cinematic science fiction genre, this volume will appeal primarily to scholars and students of film, television, cultural and media studies, as well as anyone interested in science fiction and speculative film.
