

Boyd And Bee Lifespan Development 6th Edition

Written specifically for non-clinical undergraduate students, but also relevant to graduate studies in helping professions, *Skills for Helping Professionals*, by Anne M. Geroski focuses on helping students develop the skills they need to effectively initiate and maintain helping relationships. After exploring the literature identifying critical components of helping relationships and briefly reviewing developmental and helping theories, the text covers such topics as the helping process, self-awareness, and ethics in helping, and then focuses on specific helping skills such as listening and hearing, empathy, reflecting, paraphrasing, questioning, clarifying, exploring, and offering feedback, encouragement, and psycho-education. The final chapters focus on individuals in crisis and helping in groups.

Lifespan Development, 5ce provides strong applications, and integrated learning objectives and assessment. Students who want to know "What does current research say?" and "Why is this important?" will appreciate both the applied nature of this text and the clarity and rigor of the authors' presentation of current research. An exceptional pedagogical package that ties the textbook to online MyPsychLab study tools complements the student-centered approach of the book and offers students the benefit of frequent self-assessment. The latest edition has been thoroughly revised and updated to reflect the latest research in the field of human development. The new edition is built for student success, with each chapter streamlined to focus on key content and organized around learning objectives, with a more accessible design, and greater integration to a more robust and effective MyPsychLab.

Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, *Lifespan Development: Lives in Context* offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.
