Your First Tropical Fish

This story begins in 1945, with how I first met My Love. She was only 15, and I was 17 years old. It's a story about how we met, and

how a song had a profound effect on our lives. It is also about how our undying love for each other survived the many obstacles we endured in our early years. We had an unusual start, some touching moments, and a very emotional and somewhat surprising ending. These memories are too precious not to be shared.

angelfish in their natural Amazon rain forest habitat in South America and the needs of this beautiful and recognizable fish in the home aquarium based on their dietary, water conditions, and behavior in the wild. The chapter "Angelfish Groups" describes the three species of angelfish (*Pterophyllum altum*, *P. leopoldi*, and *P. scalare*), the most popular twelve color variations seen in local pet stores, and the special traits of the species. Separate chapters are devoted to selection and care, feeding and diet, and reproduction. The author discusses the keeping of angelfish in an "all-angel" tank (shoal of angelfish!) as well as in a community tank, and gives solid advice on selection of equipment and live plants. A chapter on parasites and diseases will be of great use to all fishkeepers trying to avoid fungal, bacterial, and viral diseases in their tanks as well as general treatment protocols and hospital tanks. Glossary as well as resources of websites and publications conclude the guide.
