In this sequel to The Kinder Poison—which People magazine proclaimed a “delicious high-stakes adventure”—the magical kingdom of Orkena is on the brink of war, and the only person who can save it is Zahru, the girl they once doomed to death. After surviving the Crossing, Zahru has sworn off adventures. While Crown Prince Jet navigates the looming threat of war, she’s content to simply figure out what the future holds for them. But they’re dealt a devastating blow when prince Kasta returns with a shocking claim: he’s the true winner of the Crossing and the rightful heir, and he bears the gods’ mark as proof. Even more surprising—he’s not the only one. Somehow, Zahru possesses the very same mark, giving her equal right to the throne. The last thing she wants is to rule beside her would-be executioner, but she can’t let Orkena fall into his merciless hands. So Zahru, Jet, and their allies must race against the clock to find a way to stop Kasta, because once he’s crowned, there’s no telling what horrors he’ll unleash to win the war. Zahru will do whatever it takes to keep Kasta from taking the throne...but to stop a villain, is she willing to become one herself?

Boonstra is het verhaal van een eigenwijze provinciejongen die zonder diploma’s of kruiwagens de meest spraakmakende en ondernemende CEO van ons land zou worden. Cor Boonstra wist tot vijf keer toe vriend en vijand te verbazen met zijn succes: bij de SRV, bij Intradal, bij Douwe Egberts, bij Sara Lee en tot slot als hoogste baas bij Philips. Een jaar lang voerde reclameman Manfred Bik wekelijks lange, openhartige gesprekken met Boonstra en andere betrokkenen. Dit boek is het resultaat. In een pakkende stijl beschrijft Bik Boonstra’s achtergrond, de rol van zijn vader, zijn komeetachtige loopbaan en zijn tegendraadse aanpak – op zoek naar een mogelijke verklaring voor zijn succes. Boonstra is niet alleen een boeiend levensverhaal. Het is een reis langs oer-Hollandse merken en biedt een ongecensureerde kijk in de boardroom van grote ondernemingen. Het is daarmee ook een boek met tijdloze lessen voor iedereen die van plan is om het zelf ver te gaan schoppen.

De broncode is een reconstructie van het onwaarschijnlijke, maar waargebeurde verhaal van de Nederlandse televisiereparateur Jan Sloot die erin slaagde een wereldschokkende coderingstechnologie te ontwikkelen. In maart 1999 raakte de kroonprins van Philips, Roel Pieper, geïntrigeerd door de ontdekking van Jan Sloot. Hij nam hij de uitvinding mee naar het hart van Silicon Valley om er geldschieters voor te vinden. Binnen enkele jaren zou de revolutionaire technologie honderden miljarden dollars waard zijn, daar waren de grote namen uit het internationale bedrijfsleven, Pieper voorop, van overtuigd. Maar de euforie werd ruw verstoord. Geheel onverwacht overleed Jan Sloot. De broncode van zijn uitvinding nam hij mee het graf in. Het mysterie rond Sloot houdt de gemoederen tot op de dag van vandaag bezig. De broncode, het langverwachte boek van Quote-journalist en adjunct-hoofdredacteur Eric Smit (1967), biedt een schat aan bizarre en onthullende details die de lezers en betrokkenen uit het (inter)nationale bedrijfsleven nog lang zullen heugen.

Floriography

Uses 150 interviews to provide a behind-the-scenes look at humorist Doug Kenney and his role in the history of the revolutionary humor magazine "National Lampoon."

Following his wife Carmen's funeral, chronicled so movingly in Love Life, Dan tries to pick up the pieces. He is now the sole parent of little Luna. But inevitably in his grief he goes right off the rails. His friends worry for him and for Luna, and Rose finds it difficult to reconnect with him. His hedonism becomes self-destructive and he deep down he knows it’s better to have Luna stay with friends than for her to witness his decline. He sells his share of the business to his partner and goes ona drug-addled holiday to Ibiza, where he witnesses 9/11. His relationship with Rose is virtually over, though she can never quite bring herself to abandon him completely. Dan reaches rock bottom and realises he can't go on like this. His friends advise him to go on a long trip, taking Luna with him, and to try and take stock of his life. He decides to take Luna to Australia, via Bali and Thailand. There as they travel across the continent they begin to tentatively establish a relationship – a new relationship – and Dan finally comes to realise what it is he wants and needs in his life.

No-one is better than Diana Henry at turning the everyday into something special. Here is a superb collection of recipes that you can rustle up with absolutely no fuss, but which will knock your socks off with their flavor. Peppered throughout the book are ingenious ideas such as no-hassle starters and sauces that will lift any dish. From Turkish Pasta with Caramelized Onions, Yoghurt and Dill and Paprika-baked Pork Chops with Beetroot, Caraway and Sour Cream to Parmesan-roasted Cauliflower with Garlic and Thyme, Diana takes the kind of ingredients we are most likely to find in our cupboard and fridge – or be able to pick up on the way home from work – and provides recipes that will become your friends for life.

Challenges popular corporate practices of using buzzwords and a pedigreed workforce to promote agenda-based productivity, and makes lighthearted and common-sense recommendations for being professionally competitive in the real world.

The fast and easy way to crack codes and cryptograms Did you love Dan Brown’s The Lost Symbol? Are you fascinated by secret codes and deciphering lost history? Cracking Codes and Cryptograms For Dummies shows you how to think like a symbologist to uncover mysteries and history by solving cryptograms and cracking codes that relate to Freemasonry, the Knights Templar, the Illuminati, and other secret societies and conspiracy theories. You’ll get easy-to-follow instructions for solving everything from the simplest puzzles to fiendishly difficult ciphers using secret codes and lost symbols. Over 350 handcrafted cryptograms and ciphers of varying types Tips and tricks for cracking even the toughest code Sutherland is a syndicated puzzle author; Koltko-Rivera is an expert on the major symbols and ceremonies of Freemasonry With the helpful information in this friendly guide, you’ll be unveiling mysteries and shedding light on history in no time!

"Symbolic symbols played an important role in Egyptian culture because ancient Egyptians believed that, through ceremony, one could influence the gods and the otherworld."--Cover.

"Let's eat Grandma" OR "Let's eat, Grandma"?This fun yet informative book offers bite-sized tips and advice on everything you need to know about grammar—including common misspellings, how to use punctuation correctly, and applying the right tense—and will turn you from a logophobe to a grammarphile in no time!

A prize-winning Dutch journalist's unsparing memoir of growing up amid the excesses, triumphs, and devastation of post-World War II Europe. What can a son say upon discovering that his father wore a Nazi uniform? Reporter Alexander M ünninghoff was only four when he found this mortifying relic from his father's recent past in his attic. This shameful memento came to symbolize not only his father's tragically misguided allegiance but also a shattered marriage and ultimately the unconscionable separation of a mother and son. In this revelatory memoir, the author confronts his parents' complex past as he reconstructs the fortunes and disillusion of an entire family upheaved during the changes of twentieth-century Europe. The M ünninghoffs were driven by greed, rebellion, and rage. An embattled dynasty, they were torn between the right and the wrong side of history. Their saga haunted Alexander's life for the next seventy years. Only in reconciling with them can this man find the courage to move forward as son and heir to the startling legacy of a flawed yet grand tradition.

"A DELICIOUS HIGH-STAKES ADVENTURE." —PEOPLE MAGAZINE Perfect for fans of Victoria Aveyard and Holly Black, The Kinder Poison is an enthralling fantasy adventure that follows a teenage girl chosen to be the human sacrifice in a deadly game between three heirs who will do anything for the crown. Zahru has long dreamed of leaving the kingdom of Orkena and having the kinds of adventures she's only ever heard about in stories. But as a lowly Whisperer, her power to commune with animals means that her place is serving in the royal stables until the day her magic runs dry. All that changes when the ailing ruler invokes the Crossing. A death-defying race across the desert, in which the first of his heirs to finish—and take the life of a human sacrifice at the journey's end—will ascend to the throne. With all of the kingdom abuzz, Zahru leaps at the chance to change her fate if just for a night by sneaking into the palace for a taste of the revelry. But the minor indiscretion turns into a deadly mistake when she gets caught up in a feud between the heirs and is forced to become the Crossing's human sacrifice. Now Zahru's only hope for survival hinges on the impossible: somehow figuring out how to overcome the most dangerous people in the world.

An around-the-world journey to discover where in the wild we can find the elements of life and the surprising ways they're essential to our survival We all know that we depend on elements for survival—from the oxygen in the air we breathe to the carbon in the molecular structures of all living things. But we don’t often stop to appreciate how, say, phosphorous holds our DNA together or how potassium powers our optic nerves so that we can see. In The Elements We Live By, physicist and award-winning author Anja Rayne takes us on an astonishing journey through chemistry and physics, introducing the building blocks from which we humans—and the world—are made. Not only does Rayne explain why our bodies need iron, phosphorus, silicon, potassium, and many more elements in just the right amounts in order to function, she also leads us around the world to where these precious elements are found (some of them in ever-shrinking quantities). You’ll understand how precariously balanced our lives—and ways of life—really are, and you’ll see these unsung heroes of the periodic table in an entirely new light.

A charming, gorgeously illustrated botanical encyclopedia for your favorite romantic, local witch, bride-to-be, or green-thumbed friend. Floriography is a full-color guide to the historical uses and secret meanings behind an impressive array of flowers and herbs. The book explores the coded significances associated with various blooms, from flowers for a lover to flowers for an enemy. The language of flowers was historically used as a means of secret communication. It soared in popularity during the 19th century, especially in Victorian England and the U.S., when proper etiquette discouraged open displays of emotion. Mysterious and playful, the language of flowers has roots in everything from the characteristics of the plant to its presence in folklore and history. Researched and illustrated by popular artist Jessica Roux, this book makes a stunning display piece, conversation-starter, or thoughtful gift.

In these beguiling essays on what lies beyond the fringes of Philippine recorded history—whether pointing out the laughing carabao on the margins of a centuries-old map, or combing for shards of Ming porcelain on a coral beach—Ocampo reminds us that the endless gathering and joining and breaking apart of apparently 'useless' bits is, after all, what makes us what we are, and connects us with others in their own quest for identity.

An overview of Austria that includes information on geography, history, government, language, culture, and relations with North America.

What happened when one of today’s best-loved food writers had a change of appetite? Here are the dishes that Diana Henry created when she started to crave a different kind of diet - less meat and heavy food, more vegetable-, fish-, and grain-based dishes - often inspired by the food of the Middle East and Far East, but also drawing on cuisines from Georgia to Scandinavia. In her year of good eating, Diana lost weight, but this was about much more than weight loss - lead by taste, it was about discovering a healthier, fresher way of eating. From a Cambodian salad of shrimps, grapefruit, toasted coconut, and mint or North African mackerel with cumin to blood orange and cardamom sorbet, the magical dishes in this book are bursting with flavor, with goodness and with color. Peppering the recipes is Diana’s inimitable writing on everything from the miracle of broth to the great carbohydrate debate. Above all, this is about opening up our palates to new possibilities. There is no austerity here, simply fabulous food that nourishes body and soul.

The field of Artificial Intelligence (AI) was initially directly aimed at the construction of ‘thinking machines’ – that is, computer systems with human-like general intelligence. But this task proved more difficult than expected. As the years passed, AI researchers gradually shifted focus to producing AI systems that intelligently approached specific tasks in relatively narrow domains. In recent years, however, more and more AI researchers have recognized the necessity – and the feasibility – of returning to the original goal of the field. Increasingly, there is a call to focus less on highly specialized ‘narrow AI’ problem solving systems, and more on confronting the difficult issues involved in creating ‘human-level intelligence’, and ultimately general intelligence that goes beyond the human level in various ways. Artificial General Intelligence (AGI), as this renewed focus has come to be called, attempts to study and reproduce intelligence as a whole in a domain independent way. Encouraged by the recent success of several smaller-scale AGI-related meetings and special tracks at conferences, the initiative to organize the very first international conference on AGI was taken, with the goal to give researchers in the field an opportunity to present relevant research results and to exchange ideas on topics of common interest. In this collection you will find the conference papers: full-length papers, short position statements and also the papers presented in the post conference workshop on the sociocultural, ethical and futurological implications of AGI.

The world as seen from a bike ‘Understated, comic and melancholic... It’ll inspire you to get back on your bike.’ Martin Love, The Guardian ‘One of the most entertaining sports books I have ever read’ Joe Short, The Daily Express In this award-winning collection of cycling tales, Wilfried de Jong uncovers the true soul of cycling – why we do it, why we watch it, why we hate it, why we love it – stripped bare. With his distinctly comic and melancholic charm Wilfried ponders life, love and death on his trusted bike, chasing the essence of our existence against the backdrop of major cycling events or while roaming alone in nature. Whether he is describing being ejected from Paris-Roubaix, a terminal incident with a bird while out riding, or explaining why he is standing stark naked on Belgian cobbles with a tyre in his hand, Wilfried unlocks a sport that involves so much pain, punishment, and a high probability of failure, but that will always liberate and inspire us.

After all, the purpose is to land a nicely paid job in a globally recognized firm. This book will help you reach that goal!Most people can learn how to code but not just anyone can code smartly. This book is going to help you to think out of the box and take on problems with a completely different perspective. The tricks mentioned will make you invaluable to any software development firm.Even if you don't have any skills this book help you step by step to achieve your goal in a few days you will be able to learn it.scroll up and buy now

A heart-expanding novel about four Latinx teens who make New Year’s resolutions for one another—and the whirlwind of a year that follows. Fans of Erika L. Sánchez and Emery Lord will fall for this story of friendship, identity, and the struggle of finding yourself when all you want is to start over. From hiking trips to four-person birthday parties to never-ending group texts, Jess, Lee, Ryan, and Nora have always been inseparable. But now with senior year on the horizon, they’ve been growing apart. And so, as always, Jess makes a plan. Reinstating their usual tradition of making resolutions together on New Year’s Eve, Jess adds a new twist: instead of making their own resolutions, the four friends assign them to one another—dares like kiss someone you know is wrong for you, find your calling outside your mom’s Puerto Rican restaurant, finally learn Spanish, and say yes to everything. But as the year unfolds, Jess, Lee, Ryan, and Nora each test the bonds that hold them together. And amid first loves, heartbreaks, and life-changing decisions, beginning again is never as simple as it seems.

This edited volume presents and reflects upon empirical evidence of ‘sustainability’-induced and -related transition in food practices. The material collected in the various chapters contributes to our understanding of the ways in which ideas and preferences, sociotechnological developments and changes in the governance of food interact and become visible in practices of consumption, retail and production.

Franz Kafka has given his name to a world of nightmare, but in Kafka's world, it is never completely clear just what the nightmare is. Kafka deals in dark and quirkily humorous terms with the insoluble dilemmas of a world which offers no reassurance, and no reliable guidance to resolving our existential and emotional uncertainties and anxieties.

Learn about how we organize our society in The Sociology Book. Part of the fascinating Big Ideas series, this book tackles tricky topics and themes in a simple and easy to follow format. Learn about Sociology in this overview guide to the subject, great for beginners looking to learn and experts wishing to refresh their knowledge alike! The Sociology Book brings a fresh and vibrant take on the topic through eye-catching graphics and diagrams to immerse yourself in. This captivating quiz book will broaden your understanding of Sociology, with: - More than 80 ideas from the world's most renowned sociologists - Packed with facts, charts, timelines and graphs to help explain core concepts - A visual approach to big subjects with striking illustrations and graphics throughout - Easy to follow text makes topics accessible for people at any level of understanding The Sociology Book is the perfect introduction to a range of societal issues, ranging from government and gender identity to inequalities and globalization, aimed at adults with an interest in the subject and students wanting to gain more of an overview. Here you'll find biographies of key sociologists and social activists that give a historical context to each idea. Your Sociology Questions, Simply Explained This book explores the similar issues that affect us all; the tension between the needs of the individual and society, the changing workplace, and the role of everything from government to mass culture in our lives. If you thought it was difficult to learn about social theory, The Sociology Book presents key information in a clear layout. Learn about issues of equality, diversity, identity, and human rights; the role of institutions; and the rise of urban living in modern society, with fantastic mind maps and step-by-step summaries. The Big Ideas Series With millions of copies sold worldwide, The Sociology Book is part of the award-winning Big Ideas series from DK. The series uses striking graphics along with engaging writing, making big topics easy to understand.

Kokology 2 offers all-new insights into the surprising real you. Kokology, the popular Japanese pop-psych quiz game, is now an American bestseller, and Kokology 2 offers more than 50 all-new quizzes, perfect for beginners and experienced kokologists alike. Kokology, the study of kokoro ("mind" or "spirit" in Japanese), asks you to answer questions about seemingly innocent topics -- such as which is the cleanest room in an imaginary house? -- and then reveals what your answers say about you. Play it alone as a quest of self-discovery, or play with friends, if you dare!

How successful has Romano Prodi been in reviving the European Commission after the crisis of 1999? How have Commissioner Chris Patten and Council Secretary-General Javier Solana worked in the area of foreign policy? Key themes such as these are discussedby an international group of scholars.

Featuring art and writing from the students of the Parkland tragedy, this is a raw look at the events of February 14, and a poignant representation of grief, healing, and hope. The students of Marjory Stoneman Douglas High School share their emotional journeys that began on February 14, 2018, and continue today. This revealing and unfiltered look at teens living in anger, determination, healing, and hope. The intimate collection includes poetry, eyewitness accounts, letters, speeches, journal entries, drawings, and photographs from the events of February 14 and its aftermath. Full of heartbreaking loss, a rally cry for change, and hope for a safe future, these artistic pieces will inspire readers to reflect on their own lives and the Alaska Thunderfuck spills the tea on her meteoric rise from timid Pennsylvania kid to drag superstar in this intimate photographic memoir that will appeal to diehard Alaska admirers and broader drag fans alike. Before RuPaul's Drag Race became a worldwide phenomenon, Drag was mostly an underground art form, performed by the daring and the quick-witted, with one of one of the galaxy's greatest queens, Alaska Thunderfuck 5000, as she transforms from wearing dresses made of trash bags because she has to, to wearing dresses made of trash bags because she wants to. Finally coming clean on her home planet (earth), this dishy, visual memoir tells the stories that shaped Alaska into an All Star: from prom king to the House

Intimate and alluring with exclusive photography throughout, and illustrations by the author, My Name's Yours, What's Alaska? is the ultimate backstage pass. UNIQUE & PERSONAL: Chronicling Alaska's journey from small-town kid to drag superstar, this memoir stands out for its emotional resonance, distinct humor, and unapologetic realism. Filled with compelling photos, fans an exclusive look at Justin Honard the person, not just Alaska Thunderfuck the drag queen. LGBTQIA+ REPRESENTATION: LGBTQIA+ consumers will see their experiences and passions reflected in Alaska's authenticity and openness about her childhood struggles, and will be excited by a drag memoir that celebrates the whole story of queerness, not just the sassy RUPAUL'S DRAG RACE: Behind the scenes stories of Alaska's journey to RuPaul's Drag Race fame, alongside full-color photography of Alaska's iconic trash-glam looks throughout her career, will deliver the exclusive content fans crave. Perfect for: • Diehard drag fans • Fans of Alaska Thunderfuck, RuPaul, Michelle Visage, Trixie Mattel, Bianca del Rio, Sharon Needles, Miley Cyrus, and more • RuPaul's Drag Race enthusiasts who want to deep dive into a famous queen's rise to stardom

Part of the bestselling Surrounded by Idiots series! #1 internationally bestselling author Thomas Erikson shows readers how to identify and avoid the psychopaths around them. Charming, charismatic, and delightful or manipulative, self-serving, and cunning? Psychopaths are both and that's exactly what makes them dangerous. Bestselling author of the international bestseller Surrounded by Idiots reveals how to identify the psychopaths in your life and combat their efforts to control and manipulate. Using the same simple four-color system of behavior classification that made Surrounded by Idiots so popular, Surrounded by Psychopaths teaches readers how to deal with psychopaths in their lives by becoming aware of their own behavior and their weaknesses. Take advantage of various behavior types, helping readers identify their own weaknesses and be proactive about protecting themselves. Erikson outlines some of the most common forms of manipulation used by psychopaths—and others—to influence those around them. Since manipulation can often be a feature of ordinary, non-psychopathic relationships, the book helps readers confront controlling people and rehabilitate negative relationships into mutually respectful ones. By understanding your behavior as well as the tendencies and strategies of psychopaths, Surrounded by Psychopaths will teach you to protect yourself from manipulative influence in your workplace, social life, and family.

This open access book examines more than two centuries of societal development using novel historical and statistical approaches. It applies the well-being monitor developed by Statistics Netherlands that has been endorsed by a significant part of the international, statistical community. It features The Netherlands as a case study, which is an especially interesting example. Around 1850, extreme poverty and inequality were significant problems of well-being at the time. Monitors of 1850, 1910, 1970 and 2015 depict the changes in three dimensions of well-being: the quality of life 'here and now', 'later' and 'elsewhere'. The analysis of two centuries shows the solutions to the extreme poverty problem and the appearance of new sustainable systems. The study also reveals the importance of natural capital: soil, air, water and subsoil resources, showing their relation with the social structure of the 'here and now'. Treatment and trade of natural resources also impacted on the quality of life 'later' and 'elsewhere.' Further, the book illustrates the role of natural capital by dividing the capital into three types: human, natural and financial. The book also discusses the role of natural capital in the development of raw materials, mineral and fossil subsoil resources. Additionally, the analysis of the institutional context identifies the key roles of social groups in well-being development. The book ends with an assessment of the solutions and barriers offered by the historical anchoring of the well-being and sustainability issues. This unique analysis of well-being and sustainability issues is a valuable contribution to the work of statisticians and policy makers.

This is a state-of-the-art Guide to the fascinating world of the lexicon and its description in various types of dictionaries. A team of experts brings together a solid Introduction to Lexicography and leads you through decision-making processes step-by-step to compile and design dictionaries for general and specific purposes. The domains of lexicography are outlined and its specific terminology is explained in the Glossary. Each chapter provides ample suggestions for further reading. Naturally, electronic dictionaries, corpus analysis, and database management are central themes throughout the book. The book also "introduces" questions about the many types of definition, meaning, sense relations, and stylistics. And that is not all: those afraid to embark on a dictionary adventure will find out all about the pitfalls in the chapters on Design. A Practical Guide to Lexicography introduces and seduces you to learn about the achievements, unexpected possibilities, and challenges of modern-day lexicography.

This Is A New Release Of The Original 1922 Edition.

Is there something distinctive about penology in Europe? Do Europeans think about punishment and penal policy in a different way to people in other parts of the globe? If so, why is this the case and how does it work in practice? This book addresses some major and pressing issues that have been emerging in recent years in the interdisciplinary field of 'European penology', that is, a space where legal scholarship, criminology, sociology and political science meet - or should meet - in order to make sense of punishment in Europe. The chapters in European Penology? have been written by leading scholars in the field and focus in particular on the interaction of European academic penology and national practice with European policies as developed by the Council of Europe and, increasingly, by the European Union.

The world is overflowing with waste. It 's time to take action. You can make positive changes without radically altering your lifestyle. This practical book suggests ways to reduce waste, including how to cut unnecessary packaging, patch up or recycle old household items and drastically limit food waste. Over the past few decades, there has been a growing concern about the social and environmental risks which have come along with the progress achieved through a variety of mutually intertwined modernization processes. In recent years these concerns are transformed into a widely-shared sense of urgency, partly due to events such as the various pandemics threatening livestock, and increasing awareness of the risks and realities of climate change, and the energy and food crises. This sense of urgency includes an awareness that our entire social system is in need of fundamental transformation. But like the earlier transition between the 1750's and 1890's from a pre-modern to a modern industrial society, this second transition is also a contested one. Sustainable development is only one of many options. This book addresses the issue on how to understand the dynamics and governance of the second transition dynamics in order to ensure sustainable development. It will be necessary reading for students and scholars with an interest in sustainable development and long-term transformative change.

The national bestseller now in paperback: the revealing personal memoir from Tom Perkins?renowned venture capitalist, Silicon Valley and biotechnology pioneer, and one of America?s most successful businessmen. Known for his idiosyncratic ideas and golden touch, Tom Perkins has always been one of the business world?s most intriguing figures.
