EBOOK: Economics, South African Edition

Economics studies how people, businesses and governments use resources. What shapes our decisions? How do we allocate goods and services? What does a rational choice look like? In this third edition of Economics: A Southern African Context, the authors expertly guide us through the key principles of economics, providing a solid foundation in the subject. The text combines relevant Southern African examples with a clear and accessible narrative. By encouraging critical engagement with economic theories, it provides a basis for examining today ' s economic, social, and political issues. Key Features: • A new structure to refocus the book and align with teaching • Additional online chapters, including the Economics of Pandemics, available in Connect® • Fully updated pedagogy, including Interactive Graphs, Last Word, and Quick Quiz boxes • Discussions on new developments in economics, such as the consequences of COVID-19 and the impact of BRICS membership on trade in South Africa • Revised end-of-chapter content to test comprehension, including Review Questions, Discussion Questions and Problems, available in Connect® Economics: A Southern African Context is available with McGraw Hill ' s Connect®, the online learning platform which features resources to help faculty and institutions improve student outcomes and course delivery efficiency. Jan J. Janse van Rensburg is a lecturer at the University of Pretoria. His main area of interest is in teaching and course development with a focus on Principles of Economics. He also specializes in Health Economics, concentrating on the economic effects and costs of substance abuse. Campbell R. McConnell was a professor at the University of Nebraska-Lincoln, where he taught from 1953 until his retirement in 1990. Stanley L. Brue is a professor at Pacific Lutheran University, where he has been honoured as a recipient of the Burlington Northern Faculty Achievement Award. Sean M. Flynn is an associate professor of economics at Scripps College in Claremont, California.

A rare reproduction of Nobel Prize Winner Paul Samuelson's original 1948 Classic economics textbook. For 50 years, Samuelson's Economics has been the standard-bearer for the field. Now in it's 16th edition, Samuelson is probably the most successful economics book ever published. The book has sold several million copies throughout the world, and has also been translated into more than 40 languages. The reproduction is far more than just a historical curiosity and an interesting object; it contains the original words of arguably the most influential and most widely read textbook economics author of the 20th century. This 1948 edition represents the original spark that ignited the Samuelson revolution--a movement which has endured for half a century, and influenced millions of young minds in hundreds of the world's best learning institution.

The fifth edition of Romer's Advanced Macroeconomics continues its tradition as the standard text and the starting point for graduate macroeconomics courses and helps lay the groundwork for students to begin doing research in macroeconomics and monetary theories concerning the central questions of macroeconomics. The theoretical analysis is supplemented by examples of relevant empirical work, illustrating the ways that theories can be applied and tested. In areas ranging from economic growth and short-run unemployment and monetary policy, formal models are used to present and analyze key ideas and issues. The book has been extensively revised to incorporate important new topics and new research, eliminate inessential material, and further improve the presentation. Brief Edition

Schiller's Essentials of Economics is the market leader for the one-semester survey course, praised for its strong policy focus and core theme of seeking the best possible answers to the basic questions of WHAT, HOW, and FOR WHOM to produce. The 9th edition is benefitted by SmartBook, the first adaptive reading experience designed to engage students with the content in an active and dynamic way, as opposed to the passive and linear reading experience they are used to. As a result, students are more likely to master and retain important concepts in the survey course. As in previous editions, students are confronted early on with the reality that the economy doesn't always operate optimally, either at the macro or micro level, and are encouraged to examine the policy challenge of finding the appropriate mix of market reliance and government regulation that generates the best possible outcomes. In addition to the suite of resources available within Connect Economics, over 100 key topics are reinforced with interesting and innovative videos on YouTube, provided to help non-majors see the relevance of economics. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Mainstream textbooks present economics as an objective science, free from value judgements. The Microeconomics Anti-Textbook demonstrates this to be a myth – one which serves to make such textbooks not only off-puttingly bland, but also dangerously misleading in their justification of the status quo and neglect of alternatives. In this fully updated and expanded edition of their celebrated book, Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way, before presenting an 'anti-text' analysis and critique. Challenging the assumptions, arguments, and models, Hill and Myatt provide the essential guide to decoding the textbooks, and show that real economics is far more interesting - and subversive - than the simplistic version presented to students.

In this scholarly and timely presentation of the history of economic thought, you'll see how new ideas, evidence, problems and values can be used to reconsider basic disputes and major contributions of the past. THE EVOLUTION OF ECONOMIC THOUGHT, 8e covers the history of economics, the philosophies that drive the economic way of thinking, the ideas of the great economic thinkers and their logical connections to the world. You'll see how Robert Solow's pioneering model can be used to discuss recent renewed emphasis on growth theory and technological change and will explore antitrust perspectives and game theory. The Lost Art of Economics

Now available: Nudge: The Final Edition The original edition of the multimillion-copy New York Times bestseller by the winner of the Nobel Prize in Economics, Richard H. Thaler, and Cass R. Sunstein: a revelatory look at how we make decisions—for fans of Malcolm Gladwell's Blink, Charles Duhigg's The Power of Habit, James Clear's Atomic Habits, and Daniel Kahneman's Thinking, Fast and Slow Named a Best Book of the Year by The Economist and the Financial Times Every day we make choices—about what to buy or eat, about financial investments or our children's health and education, even about the causes we champion or the planet itself. Unfortunately, we often choose poorly. Nudge is about how we make these choices and how we can make better ones. Using dozens of eye-opening examples and drawing on decades of behavioral science research, Nobel Prize winner Richard H. Thaler and Harvard Law School professor Cass R. Sunstein show that no choice is ever presented to us in a neutral way, and that we are all susceptible to biases that can lead us to make bad decisions. But by knowing how people think, we can use sensible “choice architecture” to nudge people toward the best decisions for ourselves, our families, and our society, without restricting our freedom of choice.

Self-interest, economic efficiency and private property rights are among the most basic assumptions of market economics. But can an economic theory built on these assumptions alone provide adequate insight into human nature, motivation and ultimate goals to guide our economic life? John Stapleford says no along with those economists who recognize the limits of their discipline. He insightfully shows us in detail how ethics are inextricably intertwined with economic life and analysis. Writing from a Christian ethical perspective, he interacts with seven standard introductory economics texts, exploring the moral challenges imbedded in various macro-, micro- and international economic theories and outlining a faithful response to them. Among the important ethical issues addressed are possibilities and perils of economic growth the role of government in the economy the growth of work and loss of leisure lending and borrowing poverty and distributive justice environmental stewardship business and social responsibility legalized gambling the pornography industry debt relief for less developed countries the economics of immigration population control Keyed to seven of the most widely used introductory economics texts--Gwartney, Stroup & Sobel; Mankiw; Mansfield & Behraves; McConnell & Brue; Miller; Samuelson & Nordhaus; and Stiglitz--this book will be especially useful for introductory courses in economics.

McConnell/Brue/Flynn has long set the standard for providing high-quality content to instructors and students all over the world. It has remained the most widely used principles of economics product as a result of persistent innovation. The 19th edition brought adaptive technology to the market for the first time with LearnSmart, a resource that ensures that every minute a student spends studying is the most efficient and productive time possible. Feedback from users in combination with the analysis of student performance data from the 19th edition's digital products significantly informed the revision of the 20th edition, resulting in a product expertly tailored to the needs of today's students. With the 20th edition, students and instructors will benefit from a new offering that expands upon the dynamic and superadaptive capabilities of LearnSmart: SmartBook, the first and only adaptive eBook. McConnell/Brue/Flynn's tradition of innovation continues with the 20th edition, providing market-leading content and digital mastery to benefit today's learners. The major goals of this revision have been to streamline the text and to present more student oriented examples. We are also providing a new design with enhanced four colour graphics. Much fine tuning and trimming has gone into almost every chapter resulting in a more approachable textbook for your students. Several chapters that are rarely used will now appear on the book's website. The 9th edition will be much better integrated with the book's website where students can get additional information and/or current events associated with many major topics in the text. Also, the website will have "Want to see the Math Notes" for those instructors that choose a more sophisticated math treatment of the major topics in both Micro and Macro. Another commitment to Instructor Support will be the annual updating of time sensitive PowerPoint slides.

Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.
