Mystery and romance collide at a glittering soirée when a Sydney businessman meets a stunning beauty who resembles a missing woman. Bruno McKendrick knows that he can win the attention of any woman he pleases. The well-to-do son of a Scottish-born father and Italian mother, Bruno is one of the most eligible bachelors in Australian high-society. But on this night at a party off the coast of Sydney Harbour, finding love is the last thing on his mind as he makes his way through the usual crowd of movers, shakers, and hob-nobbers. Then he lays eyes on an incomparable beauty whose face Bruno is sure he's seen before. Her name is Isabelle Martin—and she says she's not who Bruno thinks she is. Still, he's determined to prove that Isabelle is the living image of someone his late private-investigator father spent his life trying to find. Solving this twenty-year-old mystery is one challenge; the burning attraction between Bruno and Isabelle is another. As he closes in on the case and discovers a dark truth from Isabelle's past, Bruno risks tearing her whole world apart . . . unless she will allow him to help pick up the pieces . . . "In this enjoyable contemporary, Way . . . combines romance with a decades-old mystery and the dazzling beauty of the Australian outback. . . . The mystery . . . propels the novel forward at a swift pace as romantic tension heats up between Bruno and Isabelle, and readers will eagerly follow them to the satisfying ending."—Publishers Weekly

The 15 Most Successful Paralegals in America and what You Can Learn from Them

In this Special Issue on human health engineering, we invited submissions exploring recent contributions to the field of human health engineering, which is the technology used for monitoring the physical or mental health status of individuals in a variety of applications. Contributions focused on sensors, wearable hardware, algorithms, or integrated monitoring systems. We organized the different papers according to their contributions to the main aspects of the monitoring and control engineering scheme applied to human health applications, including papers focusing on measuring/sensing physiological variables, contributions describing research on the modelling of biological signals, papers highlighting health monitoring applications, and finally examples of control applications for human health. In comparison to biomedical engineering, the field of human health engineering also covers applications on healthy humans (e.g., sports, sleep, and stress) and thus not only contributes to develop technology for curing patients or supporting chronically ill people, but also more generally for disease prevention and optimizing human well-being.
Each two-volume book contains four major sections:
- Introduction and Overview: Provides forewords by notables in the field and an outline of the book.
- Essays: Features eight to 10 essays on topics such as workplace issues, financial aid, diversity, and more.
- Directory: Contains descriptions and contact information for hundreds of organizations, schools, and associations, arranged by topic.
- Further Resources/Indexes: Includes glossaries, appendices, further reading, and indexes

The typical wounded soldier must complete and file twenty-two forms after an active-duty injury. To soldiers and their families coping with the shock and reality of the injuries, figuring out what to do next—even completing tasks that seem easy like submitting paperwork—can be overwhelming and confusing. The second edition of this popular resource guide has been thoroughly revised to reflect new policies, additional benefits, updated procedures, and changes to insurance, including traumatic injury insurance and social security disability insurance. New chapters cover veterans' benefits in depth—which have seen significant changes in the last two years—and returning to active duty after an injury. As in the previous edition, this guide directs you to answers and resources for the most pressing and difficult questions that wounded veterans face, such as: Where can I find information on symptoms and treatments of injuries? How do I get through all this paperwork? Where can I get legal assistance? What can I do for employment? How do I get back into everyday life? How can I return to active duty? How do I deal with insurance? What benefits are available to me, and how do I claim them? What about my family? How can they help me? This trusted resource is both comprehensive and easy to use, and now the most up-to-date guide for wounded veterans and their families dealing with active-duty injuries.

Lessons from the Top Paralegal Experts

In a new approach to philosophical anthropology, Bruno Latour offers answers to questions raised in We Have Never Been Modern: If not modern, what have we been, and what values should we inherit? An Inquiry into Modes of Existence offers a new basis for diplomatic encounters with other societies at a time of ecological crisis.

Providing care and treatment for patients usually requires moving and handling activities associated with high rates of back injuries. The personal and financial cost of back pain and injuries to health staff means there is an urgent need to improve practice in this area. Over the past twenty years a number of guidelines have been published, however, these have been based on professional consensus rather than evidence. Evidence-Based Patient Handling tackles the challenge of producing an evidence base to support clinical practice and covers tasks, equipment and interventions. This book questions previously held opinions about moving and handling and provides the foundation for future practice.

In Stop Sabotaging Your Life: 3 Steps To Your Full Potential, acclaimed life coach Bruno LoGreco shares his simple path to achieving healthy mental and emotional independence.How many times have you caught yourself thinking something like this?: I'm not enough—good enough...smart enough...good looking enough...successful enough.... LoGreco says we sabotage our lives by focusing too much on being what others want us to be and do, and not spending enough time listening to our own hearts and minds. Some people try to find self-acceptance and contentment through counseling, but end up trapped on the therapy treadmill. Others try to go it alone, but still end up in a tiresome process of navel-gazing that never leads to personal fulfillment. LoGreco offers a three-step plan to help you reach your own potential: self-awareness (recognize what you have been doing, and why); rebuilding values (learn a different way to do things); and reach your full potential (identify opportunities and set meaningful goals). You will learn to leverage your strengths to stop chasing illusions and work toward achieving your dreams.LoGreco doesn't claim his book will cure everything that ails you. As he says, "There is no secret formula, no magic pill that will make you happy, productive, and successful. You must challenge your beliefs and take back control of your choices. Don't just think outside the box—break out of it altogether."What clients and readers are saying about life coach, mentor, and motivational speaker Bruno LoGreco:"As a divorced mother of three, I've encountered many obstacles, mostly personal ones within myself. I wondered why I kept repeating the same patterns with the men I was dating and why it always ended badly, usually with me being hurt, and questioned what I' was doing wrong. Bruno taught me how to love myself again, how to respect myself and above all else, BELIEVE in myself.... Bruno saved me from my self-destructive patterns. Without his help, I wouldn't be the confident woman I am today. I am a better mother for that."— Cristina"The world is filled with very successful executives who for decades focus every waking minute on professional accolades and professional development [only to] realize they haven't take the time out to focus on personal development in terms of a better balance in life, being in touch with their spiritual side and inner self, and even the fun side of life. That would describe me in the past... I came across Bruno, and I knew he was the man. His personality exudes authenticity and geniality. The man simply knows his stuff, has this uncanny ability to read between the lines, and zero in instantly on underlying triggers. His structured approach steers you to address issues head on; challenges you to challenge yourself; opens your mind; helps you understand behaviors, experiences and patterns; gets you in touch with yourself; fuels a sense of purpose and passion; and escorts you to chart a new course to life. He never judges, but relentlessly encourages and empowers you. He's truly a brilliant, genuine and a humane person with an infectious enthusiasm to make you seize your inborn potential." —Adrian"If I had to sum up my experience with Bruno in one word, it would be 'awakened.' Bruno helped me see life from a different perspective, which is what I needed, but most importantly, he showed me how to do that myself without being dependent on him.... Bruno got me to step outside of my comfort zone and do things I normally wouldn't have done otherwise, which is undoubtedly the key to growth." —Blaine
