Walkingsticks

Bugs! Bugs! Bugs! [Scholastic]

Meet the mamas and papas of the insect world in this fresh and funny nonfiction look at how bugs are like us from popular science author and teacher Heather Montgomery. Most insects don't take care of their young, but some do—in surprising ways. Some bugs clean up after their messy little ones, cater to their picky eaters, and yes—hug their baby bugs. A fun and clever look at parenting in the insect world, perfect for backyard scientists and their own moms and dads. Back matter includes further information about the insects and a list of resources for young readers.

Get the buzz on bugs in this Classic Board Book edition of Some Bugs by bestselling author Angela DiTerlizi! Grab your magnifying glass! Find your field guide! And come hop, hide, swim, and glide through this buggy backyard world! Featuring butterflies and moths, crickets and cicadas, bumblebees and beetles, this zippy rhyming exploration of backyard-bug behavior is sure to have young insect enthusiasts bugging out with excitement!

A fascinating introduction to the bugs all around us. There are twice as many insects in the world as all other animals combined. They're everywhere ... if we know where to look! This beautifully illustrated book introduces young readers to ants, honeybees, dragonflies and more! It covers their basic body parts, life cycles and habitats. It explains which bugs can be found in each of the four seasons, and where. And it includes a beginner's bug-watching guide with a series of questions to help kids identify insects in their communities. New and longtime insect-watchers will be buzzing for this one!

All kinds of insects compete to see who is the "bugliest" bug of all, but there is a sinister surprise behind the contest.

Little Kids First Big Book of Bugs

Bugs Are Insects

A Practical Introduction to Bayesian Analysis

I Don't Want to Eat Bugs

Enter the kingdom of bugs and their close relatives for a magical journey through the forest floor, down into the deepest caves, and even across the open ocean. Insects, arachnids, worms, and molluscs are crawling across the pages of this colourful bug book, which combines gorgeous illustrations and photos to help young animal enthusiasts spot and learn all the main bug groups. From dancing bees to cartwheeling spiders, from butterfly athletes to the beetles that eat poo, they'll learn all about the incredible secret world of creepy-crawlies. And they'll find out how bugs help to look after our planet too. The Book of Brilliant Bugs, written by insect expert Jess French and illustrated by Claire McElfatrick, takes children on a fascinating journey of exploration, showing them just how amazing creepy-crawlies are, what they do for our planet, and how we can help them. It includes bug relatives such as slimy slugs, web-spinning spiders and scuttling centipedes, plus amazing facts on how bugs pass on messages, compete for food, seek true love, and fill the air with buzzing wings.

Looking for non-fiction, high-interest literacy, and skill-building material for young students or an integrated resource that will excite and teach? Look no further. This resource is filled with activities that will capture student interest and teach or reinforce skills in the areas of reading, vocabulary, phonics, research, brainstorming, creative writing, and thinking.

A lavishly photographed, fact-filled introduction to a variety of jumping, crawling and creeping insects expands from backyard favorites, including ladybugs and fireflies, to more exotic species from the world's rain forests and deserts.

From "Baby Bumblebee" to "The Ants Go Marching", children will sing, dance, and learn with these songs about the insects they encounter in their own backyard. The CD is accompanied by a book with over 250 activities that teach children about colors, counting, growing things, friendship, and of course, bugs. Each of the eight CD/book combinations will provide

hours of learning fun. 128 pages plus CD.

Bugs Galore

The Backyard Bug Book for Kids

I Love Bugs!

Bugs of all shapes, colors, and sizes, including bed bugs, cute bugs, live bugs, and dead bugs, are presented in illustrations and rhyme.

Some bugs hop. Some bugs make honey. Some bugs light up the sky! Come explore the amazing world of bugs! The friendly bugs that crawl all over these pages include hungry caterpillars, busy ants, and graceful dragonflies. Which one is your favorite?

Bayesian statistical methods have become widely used for data analysis and modelling in recent years, and the BUGS software has become the most popular software for Bayesian analysis worldwide. Authored by the team that originally developed this software, the BUGS Book provides a practical introduction to this program and its use. The text presents complete coverage of all the functional aspects of the software, including missing data, model criticism, and prior sensitivity. It also features a large number of worked examples and a wide range of applications from various disciplines. The book introduces regression models, techniques for criticism and comparison, and a wide range of modelling issues before going into the vital area of hierarchical models, one of the most common applications of Bayesian methods. It also covers more advanced topics, such as sensitivity analysis to alternative priors, and thoughtful choice of prior distributions—all those aspects of the "art" of modelling that are easily overlooked in more theoretical expositions. More pragmatic than ideological, the authors systematically work through the large range of "tricks" that researchers can use to deal with missing data, censoring, grouped data, prediction, ranking, parameter constraints, and so on. Many of the examples are biostatistical, but they do not require domain knowledge and are generalisable to a wide range of other application areas. Full code and data for examples, exercises, and some solutions can be found on the book's website.

A collection of unusual facts, games, puzzles, activities, and artwork centering around the world of insects.

The Big Book of Bugs!

I Like Bugs

Insects & Bugs for Kids

Pretty ladybugs, fluttering butterflies, creepy daddy longlegs, and roly-poly bugs are some of the familiar creatures featured in this whimsically illustrated insect album. Complete with an "actual size" chart and bug-o-meter listing fun facts about each bug, Bugs! Bugs! Bugs! will inform and entertain curious little bug lovers everywhere.

Hello, World! is a series designed to help parents introduce simple nonfiction concepts to their babies and toddlers. Now even the youngest children can enjoy learning about the world around them! Told in simple terms and accompanied by bright, cheerful illustrations, Hello, World! makes learning easy for young children and offers useful prompts to the adult reader in order to help them engage with their child on each page. Every young child loves to look at bugs. Now they can learn all about the insects in their backyards—with colors, sounds, sizes, and super-simple facts ("Chomp! A bright red ladybug munches on a leaf. Point to each of its spots."). It's a perfect way to bring the outside world of natural science into the busy world of a toddler, where learning never stops.

Bugs are for the birds! Lisbon is hungry and it's hard to wait for dinner. When her animal friends try to help her find something tasty to eat, the real the problems begin! Join Lisbon on her funny misadventures. Each beautiful illustration is designed to inspire the imaginations of children. An activity page at the end of the book allows for more fun as they search for special items in the illustrations. This version of I Don't Want to Eat Bugs has been designed specifically for ebook with a fixed layout and larger text for easy reading. While this is a great read-aloud book for parents, teachers, and other adults to share with children, we have chosen fonts that are similar to the way children form letters for easy recognition as they begin to read on their own. The print book is also available in 8.5" x 11" format. Author's Note: I Don't Want to Eat Bugs was written for my daughter, who was two when I wrote this story and didn't like salad, but now she's four and a half and loves it—if I give her plenty of salad dressing! (But don't worry—this isn't a book about eating salad.) Of course birds, cats, and dogs have a very different idea of what's good to eat, but through this fun adventure, Lisbon learns there is also food meant just for her—and it's good, especially compared with all the offerings from her animal friends. My daughter and I privately call this book the "Ice Cream Story" (she LOVES ice cream so there had to be ice cream involved), and now whenever something funny happens, she says, "We should write a new ice cream story about that." And we have! I Don't Want to Eat Bugs is the first book in a planned series called Lisbon's Misadventures. I've written the next three books in the series, and Tim Petersen is hard at work creating the illustrations. Tim is obviously a fabulous artist, and I'm excited to be working with him. You can sign up on my website to learn when the next book comes out (<http://teylarachelbranton.com>). Thank you and enjoy!

Don't be afraid of the West Nile Virus... Our science and language arts unit is so good it will drive you "buggy". Major topics include: Ants, Butterflies, Bees, Ladybugs, Beetles, Dragonflies, Grasshoppers, Mosquitoes, and Spiders (even though they are not really insects, they do fall under the description "bugs"). Each lesson includes a spelling activity, a brainstorming activity, a study of new words, work in the student booklet, a writing activity, work at the learning center, playing the bugs of summer trivia game, and a parent page. Includes reproducible pages ready for student use. Every page includes four or five questions about one of the insect fact cards that the children read in class. This Animal Science lesson provides a

teacher and student section with a variety of reading passages, lessons, activities, crossword and word search to create a well-rounded lesson plan.

Bugs, bugs, bugs!

Six-Legged Parents and Their Kids

A Counting Book

Bugs, Bugs, Bugs!

Bugs! Bugs! Bugs! Activity Book

A boy and girl find and count 100 different bugs in their backyard in increments of ten.

Each of these 35 word searches, secret codes, mazes, hidden pictures, and other puzzles features a caption with fascinating facts about butterflies, beetles, boll weevils, grasshoppers, fleas, and other insects. Solutions.

Fascinating illustrations and informative text show kids all about bugs and why they're special, including beetles, ladybugs, caterpillars, and butterflies. Original.

Patterns are found in math, reading, science, music, art, dance, and poetry—and in the world all around us. They are also found in this delightful book written by educator Trudy Harris. Children will love the humor and predictability of this story, and teachers and parents alike will appreciate the pattern hunt that will send kids back into the book looking for more patterns again and again.

Catch All the Buzz About Bugs! Kids love the thrill of discovery—especially when it comes to bugs. Become a young entomologist. Learn all about bees, butterflies, spiders, and other creepy crawlies. Jaret C. Daniels, author of many bug books, presents a kids' introduction to entomology. From ants and beetles to dragonflies and mosquitoes, this easy-to-understand book is a perfect guide for beginners. It features expert insights on a variety of common and important insects. It delves into such topics as what the various species eat, how long they live, and whether or not they migrate during winter. In the field-guide section, featured species are organized by where they are commonly found. Full-color photographs and descriptions of key markings help readers to identify the species they see in nature. Inside

You'll Find Beginner's guide to bugs of the USA and southern Canada The basics of entomology and bug anatomy Identification guide to common and important bugs to know Fun bonus activities for the whole family The colors, shapes, and features of various bugs are explored in this nonfiction narrative work. Bright, detailed photographs introduce backyard favorites such as the dragonfly, butterfly, snail, and ladybug. A picture-word glossary is included.

Bugs Bugs Bugs High or low Friends or foes Squeals or tears Phobias or fears They get in your hair They get in your eyes Find here or find them there Little bugs are found everywhere . . . This is a fun children's picture book, which adults can easily relate too and enjoy with their children. It helps children of an early age to realise that bugs are all around and hopefully teaches them something about bugs

habitats and there is no real need to fear bugs. But also to be aware that some bugs can be harmful to them. I have used the word Bugs loosely in this book and this needs to be taken into account when considering this book. Some of the creatures I have used are not true Bugs, but are generally considered as Bugs or Insects by the general public. An example of this is my use of spiders, which are not true Bugs.

Storybook, Insect Facts, and Activities

Describes the hunting activities of various bugs, including the praying mantis, wood ant, and dragonfly.

What makes an insect an insect? What makes a bug a bug? Read and find out! With intricate and vividly colored collages from Caldecott Medal winner Steve Jenkins and engaging text from Anne Rockwell, Bugs Are Insects introduces the youngest readers to the fascinating world of the creepy crawlly. Now rebranded with a new cover look, this NSTACBC Outstanding Science Trade Book includes activities such as conducting an insect survey, drawing a picture of your favorite insects, and planting a butterfly garden. Both text and artwork were vetted for accuracy by Dr. Ed Spevak, Curator of Invertebrates and Director of the Saint Louis Zoo WildCare Institute Center for Native Pollinator Conservation. This is a Level 1 Let's-Read-and-Find-Out, which means the book explores introductory concepts for children in the primary grades and supports the Common Core Learning Standards and Next Generation Science Standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

Get curious about creepy, crawly, and cool bugs Crawl inside the weird world of bugs and discover the fascinating lives of arthropods, insects, and arachnids. This book for kids ages 5 to 7 explains what makes a bug a bug—from their jointed legs to their strange eyes and awkward antennas. Learn how they see, breathe, and fly, and which bugs don't fly at all. Meet amazing bugs—from magnificent moths to peculiar pill bugs—and discover where they live, what they eat, and how they change and grow.
