**This introductory textbook provides an overview of the concepts necessary for an understanding of agricultural and agribusiness law. The text will help students of land-based industries with little or no legal background to appreciate and identify issues which may require referral or consultation with legal counsel. Each concise chapter addresses a different legal issue that those employed in agriculture and agribusiness may face, and both federal law and representative examples of state law are included. In addition to traditional topics such as contracts, property law and estate planning, the book also covers more contemporary issues such as organic certification, animal law, genetically engineered crops and food safety. Agricultural law extends beyond those directly engaged in farming to those in agribusiness who provide services and inputs to farmers, buy farmers' products, store or transport products, manufacture food products, and serve as intermediaries between farmers and consumers. The book will therefore also serve as a reference and a guide for those employed in agribusiness as well as agriculture.**

*Our Extractive Age: Expressions of Violence and Resistance* emphasizes how the spectrum of violence associated with natural resource extraction permeates contemporary collective life. Chronicling the increasing rates of brutal suppression of local environmental and labor activists in rural and urban sites of extraction, this volume also foregrounds related violence in areas we might not expect, such as infrastructural developments, protected areas for nature conservation, and even geoengineering in the name of carbon mitigation.

Contributors argue that extractive violence is not an accident or side effect, but rather a core logic of the 21st Century planetary experience. Acknowledgement is made not only of the visible violence involved in the securitization of extractive enclaves, but also of the symbolic and structural violence that the governance, economics, and governmentality of extraction have produced. Extractive violence is shown not only to be a spectacular event, but an extended dynamic that can be silent, invisible, and gradual. The volume also recognizes that much of the new violence of extraction has become cloaked in the discourse of "green development," "green building," and efforts to mitigate the planetary environmental crisis through totalizing technologies. Ironically, green technologies and other contemporary efforts to tackle environmental ills often themselves depend on the continuance of social exploitation and the contaminating practices of non-renewable extraction. But as this volume shows, resistance is also as multi-scalar and heterogeneous as the violence it inspires. The book is essential reading for activists and for students and scholars of environmental politics, natural resource management, political ecology, sustainable development, and globalization.

*The relationship between environmentally sustainable development and company and business law has emerged in recent years as a matter of major concern for many scholars, policy-makers, businesses and nongovernmental organisations. This book offers a conceptual analysis of the principles of sustainable development and environmental integration in the EU legal system. It particularly focuses on Article 11 of the Treaty on the Functioning of the European Union (TFEU), which states that EU activities must integrate environmental protection requirements and emphasise the promotion of sustainable development. The book gives an overview of the role played by the environmental integration principle in EU law, both at the level of European legislation and at the level of Member State practice. Contributors to the volume identify and analyse the main legal issues related to the importance of Article 11 TFEU in various policy areas of EU law affecting European businesses, such as company law, insurance and state aid. In drawing together these strands the book sets out the requirements of environmental integration and examines its impact on the regulation of business in the EU. The book will be of great use and interest to students and researchers of business law, environment law, and EU law.*
