Although the construction and engineering sector makes

important contributions to the economic, social, and environmental objectives of a nation, it has a notorious reputation for being an unsafe industry in which to work.

Despite the fact that safety

performance in the industry has improved, injuries and fatalities still occur frequently. To address this, the industry needs to evolve further by integrating safety into all decision making processes.

Strategic Safety Management  
in Construction and  
Engineering takes a broad  
view of safety from a strategic  
decision making and  
management perspective with  
a particular focus on the need
