For one-semester college courses in Introductory Astronomy. Teaching the Process of Science through Astronomy Inspired by an activities-based classroom approach, The Cosmic Perspective Fundamentals is the briefest introduction to astronomy in the Bennett series. By focusing on the process of science and fundamental concepts of astronomy, The Cosmic Perspective Fundamentals allows time for the use of other instructional tools in the course. Each concisely written chapter is formatted into two main sections followed by a Process of Science section, making learning targeted and expectations clear for students. The Second Edition of The Cosmic Perspective Fundamentals presents recent dramatic advances in astronomy and how they change our understanding of the cosmos. This new edition focuses on essential subjects of astronomy chosen for their importance to the field, interest, and engagement level, using goal-oriented lessons and practical tools to bring astronomy to life. The textbook is now supported in MasteringAstronomy to create an unrivalled learning suite for students and instructors.

This product features all of the resources of Mastering Astronomy in addition to the Pearson eText. Mastering(TM) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and improves results for each student. Resources in Mastering Astronomy are written and carefully reviewed by the author team, establishing the same coherent and trusted voice as the book. You are purchasing an access card only. Before purchasing, check with your instructor to confirm the correct ISBN. Several versions of the MyLab(TM) and Mastering(TM) platforms exist for each title, and registrations are not transferable. To register for and use MyLab or Mastering, you may also need a Course ID, which your instructor will provide. If purchasing or renting from companies other than Pearson, the access codes for the MyLab platform may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase.

This book offers a highly revealing and troubling view of today's high school

students and the ways they pursue high grades and success. Denise Pope, veteran teacher and curriculum expert, follows five motivated and successful students through a school year, closely shadowing them and engaging them in lengthy reflections on their school experiences. What emerges is a double-sided picture of school success. On the one hand, these students work hard in school, participate in extracurricular activities, serve their communities, earn awards and honours, and appear to uphold school values. But on the other hand, they feel that in order to get ahead they must compromise their values and manipulate the system by scheming, lying, and cheating. In short, they do school, that is, they are not really engaged with learning nor can they commit to such values as integrity and community. The words and actions of these five students - two boys and three girls from diverse ethnic and socioeconomic backgrounds - underscore the frustrations of being caught in a grade trap that pins future success to high grades and test scores. Their stories raise critical questions that are too important for parents, educators, and community leaders to ignore. Are schools cultivating an environment that promotes intellectual curiosity, cooperation, and integrity? Or are they fostering anxiety, deception, and hostility? Do today's schools inadvertently impede the very values they claim to embrace? Is the success that current assessment practices measure the kind of success we want for our children?

NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. A modular and highly visual approach to introductory astronomy *Astronomy: The Universe at a Glance* takes students on a spectacular journey across the vast cosmos. *The Universe at a Glance* introduces the structure and nature of the universe while emphasizing both the latest scientific findings and the process of scientific discovery. This new book by trusted authors Eric Chaisson and Steve McMillan reimagines their classic texts in a modularly organized, visual approach to learning. Here, the essential ideas, concepts, and discoveries of contemporary astronomy are presented in 15 chapters, each chapter composed of richly illustrated, two-page spreads designed to visually engage and instruct students. Complete with spectacular graphics and concise, compelling chapters, *The Universe at a Glance* packs an immense amount of awe-inspiring insights into a brief modular volume. Uniting engaging prose, fascinating details, and easy-to-follow Learning Outcomes, this accessible account of astronomy is flexible and fun, an ideal complement to a dynamic introductory course. The text is integrated with MasteringAstronomy to create an unrivalled learning suite for students and instructors. Personalize

Learning with MasteringAstronomy® MasteringAstronomy from Pearson is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students before, during, and after class with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content before class, and encourage critical thinking and retention with in-class resources such as Learning Catalytics. Students can further master concepts after class through traditional and adaptive homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions. Mastering brings learning full circle by continuously adapting to each student and making learning more personal than ever-before, during, and after class. 0321792998 / 9780321792990 Astronomy: The Universe at a Glance Plus MasteringAstronomy with eText -- Access Card Package, 1/e. A Beginner's Guide to the Universe

Women's Rights and Transatlantic Antislavery in the Era of Emancipation

The Cosmic Perspective

Dotyczy m. in. Polski.

"College textbook for intro to physics courses"--

Astronomy is written in clear non-technical language, with the occasional touch of humor and a wide range of clarifying illustrations. It has many analogies drawn from everyday life to help non-science majors appreciate, on their own terms, what our modern exploration of the universe is revealing. The book can be used for either a one-semester or two-semester introductory course (bear in mind, you can customize your version and include only those chapters or sections you will be teaching.) It is made available free of charge in electronic form (and low cost in printed form) to students around the world. If you have ever thrown up your hands in despair over the spiraling cost of astronomy textbooks, you owe your students a good look at this one. Coverage and Scope Astronomy was written, updated, and reviewed by a broad range of astronomers and astronomy educators in a strong community effort. It is designed to meet scope and sequence requirements of introductory astronomy courses nationwide. Chapter 1: Science and the Universe: A Brief Tour Chapter 2: Observing the Sky: The Birth of Astronomy Chapter 3: Orbits and Gravity Chapter 4: Earth, Moon, and Sky Chapter 5:

Radiation and Spectra Chapter 6: Astronomical Instruments
Chapter 7: Other Worlds: An Introduction to the Solar System
Chapter 8: Earth as a Planet Chapter 9: Cratered Worlds Chapter
10: Earthlike Planets: Venus and Mars Chapter 11: The Giant
Planets Chapter 12: Rings, Moons, and Pluto Chapter 13: Comets
and Asteroids: Debris of the Solar System Chapter 14: Cosmic
Samples and the Origin of the Solar System Chapter 15: The Sun:
A Garden-Variety Star Chapter 16: The Sun: A Nuclear Powerhouse
Chapter 17: Analyzing Starlight Chapter 18: The Stars: A
Celestial Census Chapter 19: Celestial Distances Chapter 20:
Between the Stars: Gas and Dust in Space Chapter 21: The Birth
of Stars and the Discovery of Planets outside the Solar System
Chapter 22: Stars from Adolescence to Old Age Chapter 23: The
Death of Stars Chapter 24: Black Holes and Curved Spacetime
Chapter 25: The Milky Way Galaxy Chapter 26: Galaxies Chapter
27: Active Galaxies, Quasars, and Supermassive Black Holes
Chapter 28: The Evolution and Distribution of Galaxies Chapter
29: The Big Bang Chapter 30: Life in the Universe Appendix A:
How to Study for Your Introductory Astronomy Course Appendix B:
Astronomy Websites, Pictures, and Apps Appendix C: Scientific
Notation Appendix D: Units Used in Science Appendix E: Some
Useful Constants for Astronomy Appendix F: Physical and Orbital
Data for the Planets Appendix G: Selected Moons of the Planets
Appendix H: Upcoming Total Eclipses Appendix I: The Nearest
Stars, Brown Dwarfs, and White Dwarfs Appendix J: The Brightest
Twenty Stars Appendix K: The Chemical Elements Appendix L: The
Constellations Appendix M: Star Charts and Sky Event Resources
NOTE: Before purchasing, check with your instructor to ensure
you select the correct ISBN. Several versions of the
MyLab(tm)and Mastering(tm) platforms exist for each title, and

For two-semester courses in astronomy. This package includes
Mastering Astronomy. Exploring the impact of new discoveries on
astronomy, science, and life in the universe Building on a long
tradition of effective pedagogy and comprehensive coverage, The
Cosmic Perspective, 9th Edition provides a thoroughly engaging
and up-to-date introduction to astronomy for anyone who is
curious about the universe, regardless of prior background in
astronomy or physics. As respected teachers and active
researchers, the authors present astronomy using a coherent

narrative and a thematic approach that engages students immediately and guides them through connecting ideas. This engagement-centered approach and variety of contextualizing features enhance student understanding of the process of science and actively involve them in learning key concepts. The 9th Edition features major scientific updates, new content that focuses on the possibility of life in the universe, and recent discoveries that provide modern contexts to help students see astronomy as highly relevant to their worlds now. The authors integrate a new focus on cultural diversity among scientists and ethics across science and astronomy, delving into science done by a wide range of people and evaluated in different ways. The authors write and create a wealth of Mastering Astronomy resources, carrying the coherent and cohesive approach of the book to the new and expanded digital tools, such as Prelecture Videos. Instructors can access this curated group of activities in Mastering Astronomy for use before, during, and after class and can easily edit the pre-built assignments to fit the way they teach. This text is also available in two volumes, which can be purchased separately: The Cosmic Perspective: The Solar System, 9th Edition (includes Chapters 1-13, 14, S1, 24) The Cosmic Perspective: Stars, Galaxies, and Cosmology, 9th Edition (includes Chapters 1-3, S1, 4-6, S2-S4, 14-24) Personalize learning with Mastering Astronomy By combining trusted author content with digital tools and a flexible platform, Mastering personalizes the learning experience and improves results for each student. Resources in Mastering Astronomy are written and carefully reviewed by the author team, establishing the same coherent and trusted voice as the book. 0134988930 / 9780134988931 Cosmic Perspective, The Plus Mastering Astronomy with Pearson eText -- Access Card Package Package consists of: 0134874366 / 9780134874364 Cosmic Perspective, The 0134988833 / 9780134988832 Mastering Astronomy with Pearson eText -- ValuePack Access Card -- for Cosmic Perspective, The 0321765184 / 9780321765185 SkyGazer 5.0 Student Access Code Card (Integrated component)

for The Cosmic Perspective, Seventh Edition

Life in the Universe By Jeffrey O. Bennett

For one-semester Introduction to Astronomy courses. With the Eighth Edition of Astronomy: A Beginner's Guide, trusted authors Eric Chaisson and Steve McMillan bring a renewed freshness and analysis to recent changes in our understanding of the cosmos. As with the other two books in their Astronomy series (one for two-semester courses and the other, a brief visual book), the authors continue to emphasize three major themes: the process of science, the size and of the universe, and the evolution of the cosmos. This new edition ignites reader interest with new discoveries from the latest space missions and a new focus on reader-oriented engagement. Also available as a Pearson eText or packaged with Mastering Astronomy Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience that can be adopted on its own as the main course material. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily share their own notes with students so they see the connection between their eText and what they learn in class — motivating them to keep reading, and keep learning. Mastering combines trusted author content with digital tools and a flexible platform to personalize the learning experience and improve results for every student. Built for, and directly tied to the text, Mastering Astronomy enables an extension of learning, allowing students a platform to practice, learn, and apply outside of the classroom. Note: You are purchasing a standalone book; Pearson eText and Mastering Astronomy do not come packaged with this content. Students should ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. "Building on a long tradition of effective pedagogy and comprehensive presentation, The Cosmic Perspective includes an enhanced art program. This student-friendly text is now even more accessible through robust visual pedagogy via new Cosmic Context two-page illustrations, which walk students through key processes and summarize the major points of each Part, and via updated zoom-in figures which provide students with a sense of orientation, scale, and relation between images. In addition to an enhanced art program, the text also features new See It For Yourself boxes with practical hands-on activities for in-class use or self-study, and a new subset of Process of Science end-of-chapter questions that challenge students to think through how we know what we know about astronomy."--Product description.

In this volume LaValley presents the most comprehensive look at Hitchcock to date, examining the man and his films from a three-fold approach; Hitchcock on Hitchcock, the Hitchcock Controversy, and the Hitchcock Films. Five interviews with and articles by the director reveal his own conception of himself as a film-maker. The diverse reactions of the critics...are brought out through a whole section of articles on Hitchcock the director. Such masterpieces as Rear Window, Vertigo, Stranger on a Train, and Psycho are examined by a variety of critics with diverse approaches...providing the rare opportunity to see Hitchcock through the diversity of responses he evokes--Jacket.

A brief path through astronomy that helps students gain an appreciation for astronomy and discovery in science. The Cosmic Perspective Fundamentals is the briefest introduction to astronomy in the Bennett series and supports instructors using an active or collaborative approach to teaching. By focusing on the process of science and

fundamental concepts of astronomy, *The Cosmic Perspective Fundamentals* allows time for the use of other instructional tools in the course. Each concisely written chapter is formatted into two main sections followed by a Process of Science section, making learning targeted and expectations clear for students. The 3rd Edition of *The Cosmic Perspective Fundamentals* features major scientific updates, new content that focuses on the possibility of life in the universe, and recent discoveries that provide modern contexts to help students see the relevance of astronomy to their worlds. The authors write and create a wealth of Mastering Astronomy resources that include a new Pearson eText, Dynamic Study Modules, and Interactive PreLecture videos that students can use before, during, and after class, including pre-built assignments that instructors can edit to fit the way they teach. For one-semester courses in introductory astronomy. Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily schedule readings and share their own notes with students so they see the connection between their eText and what they learn in class -- motivating them to keep reading, and keep learning. And, reading analytics offer insight into how students use the eText, helping educators tailor their instruction. NOTE: This ISBN is for the Pearson eText access card. For students purchasing this product from an online retailer, Pearson eText is a fully digital delivery of Pearson content and should only be purchased when required by your instructor. In addition to your purchase, you will need a course invite link, provided by your instructor, to register for and use Pearson eText.

A Short Version

The Universe at a Glance, Pearson Etext

Life in the Universe

Rhineland v. Rhineland and the Law of the Multiracial Family

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- Used by over 1.5 million science students, the Mastering platform is the most effective and widely used online tutorial, homework, and assessment system for the sciences. The eText pages look exactly like the printed text, and include powerful interactive and customization functions. This is the product

access code card for MasteringPhysics with Pearson eText and does not include the actual bound book. This best-selling introduction to the physical and life sciences emphasizes concepts over computation and treats equations as a guide to thinking so you can connect ideas. Conceptual Integrated Science covers physics, chemistry, earth science, astronomy, and biology at a level appropriate for non-science students. The conceptual approach relates science to everyday life, is personal and direct, deemphasizes jargon, and emphasizes central ideas. The conceptual ideas serve as the foundation supporting and integrating all the sciences. The Second Edition now includes MasteringPhysics®--an unrivaled homework, tutorial, and assessment system. Learning objectives have also been added so that you can easily see the most important concepts in each chapter. DIV This landmark book looks at what it means to be a multiracial couple in the United States today. According to Our Hearts begins with a look back at a 1925 case in which a two-month marriage ends with a man suing his wife for misrepresentation of her race, and shows how our society has yet to come to terms with interracial marriage. Angela Onwuachi-Willig examines the issue by drawing from a variety of sources, including her own experiences. She argues that housing law, family law, and employment law fail, in important ways, to protect multiracial couples. In a society in which marriage is used to give, withhold, and take away status—in the workplace and elsewhere—she says interracial couples are at a disadvantage, which is only exacerbated by current law. /div

With Astronomy Today, Seventh Edition, trusted authors Eric Chaisson and Steve McMillan communicate their excitement about astronomy and awaken you to the universe around you. The text emphasizes critical thinking and visualization, and it focuses on the process of scientific discovery, making "how we know what we know" an integral part of the text. The revised edition has been thoroughly updated with the latest astronomical discoveries and theories, and it has been streamlined to keep you focused on the essentials and to develop an understanding of the "big picture." Alternate Versions Astronomy Today, Volume 1: The Solar System, Seventh Edition—Focuses primarily on planetary coverage for a 1-term course. Includes Chapters 1-16, 28. Astronomy Today, Volume 2: Stars and Galaxies, Seventh Edition—Focuses primarily on stars and stellar evolution for a 1-term course. Includes Chapters 1-5 and 16-28.

This volume presents over 200 selected original artworks from the collection of Betsy Beinecke Shirley, one of the great collectors of American children's literature. Shirley gathered an authoritative collection of books, original illustrations, manuscripts, as well as drawings and paintings from such children's classics as "Treasure Island" and "Eloise." The artwork in Shirley's collection guides the reader on a tour through the stages of childhood reading, this volume begins with ABC's and nursery books. It continues through adventure stories, magazines, and more, then concludes with a miscellany section of odds and ends. The images demonstrate how children's books evolved, from the nation's first days of independence to modern times. Artists whose works are represented include many of the favorites, among them Ludwig Bemelmans, Maurice Sendak, A.B. Frost, Wanda Gag, Peter Newell, N.C. Wyeth,

Tony Sarg, Robert Lawson, and Johnny Gruelle.

MasteringPhysics(R) with Pearson EText -- Standalone Access Card -- for Conceptual Integrated Science

For intro-level, one-semester multidisciplinary science and astronomy courses. Encourage students to explore answers to questions about life beyond Earth and our solar system. Life in the Universe provides an ideal starting point for non-science majors intrigued by the latest discoveries about life in the solar system and beyond. Rigorously researched and accessible to students of all backgrounds, the text introduces concepts drawn from astronomy, biology, and geology to explain natural phenomena and to explore profound scientific questions about astrobiology. The Fourth Edition has been thoroughly revised and updated to include the latest scientific discoveries and advancements, including new information regarding extrasolar planets, artificial life, and early life on Earth. Designed for courses in astrobiology, Life in the Universe arouses students' natural curiosity by exploring fundamental questions such as: How did life begin on Earth? What are the most extreme forms of life currently known? What do we know about the possibility of life beyond Earth? The text encourages non-science majors to develop an understanding of the process of science through its inherently compelling subject matter as well as its wealth of engaging features, including Learning Goals, Special Topics, and connections to popular culture. Sidebars provide optional mathematical material for courses that fulfill quantitative requirements. Also available as a Pearson eText or packaged with Mastering Astronomy Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience that can be adopted on its own as the main course material. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily share their own notes with students so they see the connection between their eText and what they learn in class - motivating them to keep reading, and keep learning. Mastering combines trusted author content with digital tools and a flexible platform to personalize the learning experience and improve results for each student. Built for, and directly tied to the text, Mastering Astronomy enables an extension of learning, allowing students a platform to practice, learn, and apply outside of the classroom. Note: You are purchasing a standalone book; Pearson eText and Mastering Astronomy do not come packaged with this content. Students, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If your instructor has assigned Pearson eText as your main course material, search for: • 0135234204 / 9780135234204 Pearson eText Life in the Universe, 4/e -- Access Card OR • 013523445X / 9780135234457 Pearson eText Life in the Universe, 4/e -- Instant Access If you would like to purchase both the physical text and Mastering Astronomy, search for: 0134068408 / 9780134068404 Life in the Universe Plus Mastering Astronomy with eText -- Access Card Package Package consists of: 0134080017 / 9780134080017 Mastering Astronomy with Pearson

NOTE: This loose-leaf, three-hole punched version of the textbook gives you the flexibility to take only what you need to class and add your own notes - all at an affordable price. For loose-leaf editions that include MyLab(tm) or Mastering(tm), several versions may exist for each title and registrations are not transferable. You may need a Course ID, provided by your instructor, to register for and use MyLab or Mastering products. For one-semester courses in introductory astronomy. This package includes Mastering Astronomy. A brief path through astronomy that helps students gain an appreciation for astronomy and discovery in science The Cosmic Perspective Fundamentals is the briefest introduction to astronomy in the Bennett series and supports instructors using an active or collaborative approach to teaching. By focusing on the process of science and fundamental concepts of astronomy, The Cosmic Perspective Fundamentals allows time for the use of other instructional tools in the course. Each concisely written chapter is formatted into two main sections followed by a Process of Science section, making learning targeted and expectations clear for students. The 3rd Edition of The Cosmic Perspective Fundamentals features major scientific updates, new content that focuses on the possibility of life in the universe, and recent discoveries that provide modern contexts to help students see the relevance of astronomy to their worlds. The authors write and create a wealth of Mastering Astronomy resources that include a new Pearson eText, Dynamic Study Modules, and Interactive PreLecture videos that students can use before, during, and after class, including pre-built assignments that instructors can edit to fit the way they teach. Personalize learning with Mastering Astronomy Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and improves results for each student. Resources in Mastering Astronomy are written and carefully reviewed by the author team, establishing the same coherent and trusted voice as the book. 0135257298 / 9780135257296 The Cosmic Perspective Fundamentals, Loose-Leaf Plus Mastering Astronomy with Pearson eText -- Access Card Package, 3/e Package consists of: 0135214793 / 9780135214794 The Cosmic Perspective Fundamentals, Loose-Leaf Edition 0134989279 / 9780134989273 Mastering Astronomy with Pearson eText -- ValuePack Access Card -- for The Cosmic Perspective Fundamentals 0321765184 / 9780321765185 SkyGazer 5.0 Student Access Code Card (Integrated component)

The folder may include clippings, announcements, small exhibition catalogs, and other ephemeral items.

For courses in Introductory Astronomy. Connects introductory astronomy to a broad understanding of the universe In this Ninth Edition of Astronomy Today , authors Eric Chaisson and Steve McMillan communicate their excitement about astronomy, combining up-to-date science with insightful pedagogy. The text emphasizes visualization, focusing on the process of scientific discovery in order to teach readers "how we know what we know." Updated features in the 9th Edition, Big Pictures and Big Questions, help readers connect the content of each chapter with a broader understanding of the universe while piquing interest in current research. New features within MasteringAstronomy bring these features together and allow readers to interact with astronomy outside of the classroom. The 9th

Edition has also been thoroughly updated and revised to reflect recent discoveries in the field of astronomy. Also available with MasteringAstronomy(tm) MasteringAstronomy is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students with powerful, interactive content. Instructors ensure students arrive ready to learn by assigning new Interactive pre-lecture videos that give students exposure to key concepts before class and open classroom time for active learning or deeper discussions of topics. With Learning Catalytics(tm) instructors can expand on key concepts and encourage student engagement during lecture through questions answered individually or in pairs and groups. Students further master concepts through book-specific MasteringAstronomy assignments, which provide hints and answer-specific feedback that build problem-solving skills. MasteringAstronomy now features Virtual Astronomy Labs, providing assignable online laboratory activities that use Stellarium and Interactive Figures. Note: You are purchasing a standalone product; MyLab(tm) & Mastering(tm) does not come packaged with this content. Students, if interested in purchasing this title with MyLab & Mastering, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and MyLab & Mastering, search for: 0321897617 / 9780321897619 Astronomy Today Plus MasteringAstronomy with eText -- Access Card Package Package consists of: 0321901673 / 9780321901675 Astronomy Today 0321909860 / 9780321909862 MasteringAstronomy with Pearson eText -- ValuePack Access Card -- for Astronomy Today

Chaisson and Steve McMillan communicate their excitement about astronomy and awaken you to the universe around you. The text emphasizes critical thinking and visualization, and it focuses on the process of scientific discovery, making "how we know what we know" an integral part of the text. The revised edition has been thoroughly updated with the latest astronomical discoveries and theories, and it has been streamlined to keep you focused on the essentials and to develop an understanding of the "big picture." Astronomy Today is available with an interactive Pearson eText and MasteringAstronomy®--the most powerful astronomy tutorial and assessment system ever built. Alternate Versions Astronomy Today, Volume 1: The Solar System, Seventh Edition--Focuses primarily on planetary coverage for a 1-term course. Includes Chapters 1-16, 28. Astronomy Today, Volume 2: Stars and Galaxies, Seventh Edition--Focuses primarily on stars and stellar evolution for a 1-term course. Includes Chapters 1-5 and 16-28. Package Components: MasteringAstronomy with Pearson eText Student Access Code Card Astronomy Today, Seventh Edition

This textbook for college courses in introductory astronomy tells the story of modern astronomy and the new perspective that astronomy gives us on ourselves and our planet.--

For the Introductory Materials Science course. This unique textbook is designed to serve as an active learning tool that uses carefully selected information and guided inquiry questions. Guided inquiry helps students reach true understanding of concepts as they develop greater ownership over the material presented. First, background information or data is presented. Then, concept invention questions lead the students to construct their own understanding of the fundamental concepts represented. Finally, application questions provide the students with practice in solving problems using the concepts that they have derived from their own valid conclusions.

MasteringAstronomy is the most sophisticated astronomy tutorial and assessment system ever built. It provides the first library of activities and problems pre-tested by students nationally. Sophisticated analysis of the student performance data (including difficulty, time spent, and most common errors) has allowed every item to be systematically refined for quality, educational effectiveness, efficiency of teaching and learning, and assessment accuracy. The students' choice: interactive, self-study activities used by 100,000 students MasteringAstronomy offers the most highly rated, most widely used student self-study media available. Award-winning interactive tutorials (previously available at Addison-Wesley's www.astronomyplace.com) are complemented by a wealth of other targeted self-assessment aids, including quizzes, exercises, and NEW Interactive Figures and Interactive Photos from the book. A one-year access to MasteringAstronomy is included with all new copies of Bennett et al's The Cosmic Perspective, Fourth Edition, The Solar System, Fourth Edition, Stars, Galaxies, and Cosmology, Fourth Edition or can be purchased as a

stand-alone product to use with any introductory astronomy
