Lying in Early Modern English Culture is a major study of ideas of truth and falsehood in early modern England from the advent of the Reformation to the aftermath of the failed Gunpowder Plot. The period is characterised by panic and chaos when few had any idea how religious, cultural, and social life would develop after the traumatic division of Christendom. While many saw the need for a secular power to define the truth others declared that their allegiances belonged elsewhere. Accordingly there was a constant battle between competing authorities for the right to declare what was the truth and so label opponents as liars. Issues of truth and lying were, therefore, a constant feature of everyday life and determined ideas of individual identity, politics, speech, sex, marriage, and social behaviour, as well as philosophy and religion. This book is a cultural history of truth and lying from the 1530s to the 1610s, showing how lying needs to be understood in action as well as in theory. Unlike most histories of lying, it concentrates on a series of particular events reading them in terms of academic theories and more popular notions of lying. The book covers a wide range of material such as the trials of Ann Boleyn and Thomas More, the divorce of Frances Howard, and the murder of Anthony James by Annis and George Dell; works of literature such as Othello, The Faerie Queene, A Mirror for Magistrates, and The Unfortunate Traveller; works of popular culture such as the herring pamphlet of 1597; and major writings by Castiglione, Montaigne, Erasmus, Luther, and Tyndale.

For every element that we design in the landscape, there is a corresponding grading concept, and how these concepts are drawn together is what creates a site grading plan. This study guide explores these concepts in detail to help you learn how to grade with confidence in preparation for the Grading, Drainage and Construction Documentation section of the Landscape Architecture Registration Examination (LARE). This updated second edition is designed as a textbook for the landscape architecture student, a study guide for the professional studying for the LARE, and a refresher for licensed landscape architects. New to this edition: • Additional illustrations and explanations for grading plane surfaces and warped planes, swales, berms, retention ponds, and drain inlets; • Additional illustrations and explanations for grading paths, ramp landings, ramp/stair combinations and retaining walls; • A section on landscape and built element combinations, highlighting grading techniques for parking lots, culverts and sloping berms; • A section on landscape grading standards, recognizing soil cut and fill, determining pipe cover, finding FFE, and horizontal and vertical curves; • Updated information about the computer-based LARE test; • All sections updated to comply with current ADA guidelines; • An appendix highlighting metric standards and guidelines for accessibility design in Canada and the UK. With 223 original illustrations to aid the reader in understanding the grading concepts, including 32 end-of-chapter exercises and solutions to practice the concepts introduced in each chapter, and 10 grading vignettes that combine different concepts into more robust exercises, mimicking the difficulty level of questions on the LARE, this book is your comprehensive guide to landscape grading.
