The Confessions of a Physician Operative By: Dr. John W. Ford When the sudden death of his mother and abandonment by his father leaves young Sean Devlin without a home, he leaves the life he knows to move in with his aunt Jill. Though his childhood is tumultuous and often lonely, he finds love and acceptance in his new home and Sean grows up to become a very successful physician. But Sean lives a secret life. Ever the contradictory figure, Sean, when not saving his patients' lives, is a physician/killer for the CIA, and later in life, a crack operative for Israel's Mossad intelligence agency - a life he keeps closely guarded. *The Confessions of a Physician Operative* tells the story of a willful, complicated, and enigmatic figure and the unprecedented life he lived.

Sir John Herschel, one of the founders of Southern Hemisphere astronomy, was a man of extraordinarily wide interests. He made contributions to botany, geology, and ornithology, as well as to astronomy, chemistry, and mathematics. Throughout his scientific career he kept a diary, recording his public and private life. The diaries from 1834 to 1838, years he spent making astronomical observations at the Cape of Good Hope, are reproduced in this book and prove to be much more than an ordinary scientist's logbook. They present personal and social history, literary commentaries, the results of close observations of nature and numerous scientific experiments, the excitement of travel, political intrigues, gossip, and philosophical reflections—all interpreted through an alert and versatile mind. In the present transcription, the material has been enriched with selected correspondence of Sir John and his wife Lady Herschel (née Margaret Brodie Stewart). Sir John devoted his working time at the Cape primarily to a systematic observation of the southern sky, complementing his earlier "sweeping" of the northern sky at Slough, England. He later became one of the founders of photography, but at the Cape he used a simple optical device, the camera lucida, in the production of numerous landscape drawings. Many of these, along with reproductions of sketches contained in the diaries and botanical drawings made by Sir John and Lady Herschel, are used to illustrate this book. Sir John was also a leading figure in the foundation of the educational system of the Cape and a supporter of exploratory expeditions into the interior. As the son of Sir William Herschel, in his day the most famous British astronomer and the discoverer of the planet Uranus, Sir John was already celebrated when he arrived from England. Every individual of note, resident at the Cape or visiting, went to see him. He was supported in his work by his wife, who ran an enormous establishment and bore a huge family, but who nevertheless found time to travel in the country around the western Cape with him and to assist in his observations. The diaries and letters are supplemented by especially valuable editorial notes that provide much needed and highly interesting information concerning persons and events mentioned and described by Sir John. All the original manuscript material used in this volume is archived at the Harry Ransom Center at the University of Texas at Austin. Sir John's camera lucida drawings are from the South African Public Library in Cape Town.

For Griffin, all paths, all memories, converge at Cape Cod. The Cape is where he took his childhood summer vacations, where he and his wife, Joy, honeymooned, where they decided he'd leave his LA screenwriting job to become a college professor, and where they celebrated the marriage of their daughter Laura's best friend. But when their beloved Laura's wedding takes place a year later, Griffin is caught between chauffeuring his mother's and father's ashes in two urns and contending with Joy and her large, unruly family. Both he and she have also brought dates along. How in the world could this have happened? By turns hilarious, rueful, and uplifting, *That Old Cape Magic* is a profoundly involving novel about marriage, family, and all the other ties that bind.

European explorers were captivated by the seemingly endless bounty of natural resources on Cape Cod Bay. One Englishman declared that the codfish were so thick one could walk on their backs. Early settlers quickly learned how to harness the bay's resources and excelled at shore whaling, shipping and salt making. But as these new industries flourished, the native Wampanoag, who helped the fledgling colony to take root, nearly vanished. Author Theresa Mitchell Barbo's skillful narrative weaves together the natural and cultural histories of the bay, highlighting some of the region's diverse milestones- from the drafting of the Mayflower Compact in 1620 to the establishment of the Pilgrim Nuclear Power Plant 350

years later. Cape Cod Bay: A History of Salt & Sea inspires new appreciation for this storied and stunning seascape, and underscores the importance of new efforts to preserve the bay's unique ecosystem.

I started this book or writing to help Kathy and I deal with our grief in the loss our little granddaughter and the near loss of our daughter. I thought reliving the events would somehow help us cope with all the emotions one experiences during times when life hurts the most. For Kathy, it was a painful process. She would help me with certain events but could not review the writing. Reliving it was too painful for her. As for me, reliving those twelve days and the months after provided a stream for my tears to flow out of me and into the river of God's peace. In the early hours of the day, while sitting in my study I would write while the tears ran down my face. These tears were to me like small drops of rain God was sprinkling on me to wash away my sorrow. Some mornings I would feel that he too was crying with me, his tears were also running down my face. It was his tears that washed away my sorrow, my grief and replaced it with his love and his peace. His love for you and me is stronger than anything this world can throw at us. I learned many things during these days of remembrance. The one thing I learned that stands out the most is that God's hold on us is the strongest when life hurts the most. He never lets go. Our faith allows us to hold onto him while he is firmly holding onto us. He is most capable to hold on to my family and to yours in the palm of his righteous right hand.

Three sisters, Dasha, Sonia, and Zai, who were born in Russia but displaced by the Revolution, begin a new life in Paris.

Chase Morse and his brother, Haydn, heirs to an auction-house empire, split their time between Manhattan and The Moorings, the idyllic family estate on Nantucket, but when a body turns up at The Moorings and a priceless painting goes missing from inside the tight-security vault at the auction house, family secrets get harder to keep. As Gabrielle, a French journalist sent to write features on the glittering New York art world, becomes entangled with the family, the police start digging, and the stakes are high—eighty million dollars, pilfered and then lost in risky Russian investments. Can an entitled one-percenter with expansive resources, and enlisting the help of a wily art forger, outsmart the art cops and the old guard within the company? The glittering, exalted world of art auctioning hides love, hate, and murder in a wealthy and socially prominent family when the forgery of an anonymous Cape Cod painting threatens to destroy them all.

Join author and historian Stauffer Miller as he chronicles the untold and riveting history of Cape Cod and the Civil War.

In 1969, the first two men landed on the moon. There were five other landings, leading to a total of twelve astronauts standing on the moon. A further six circled above while the world watched. Also in 1969, Sir Robin Knox-Johnston was the first man to sail solo non-stop around the world south of Cape Horn. He was the eighth of only eleven men who rounded the Horn alone before the final moon landing. Those eleven men had no-one watching them. This dramatic and exciting book, written so vividly you can feel the sea's spray on your face and taste the salt on your lips, tells the story of the lives of those eleven men and their sailing exploits, and compares and contrasts their voyages with what the twelve space astronauts achieved. 'One famous astronaut spoke of "e;a small step for man, one great leap for mankind"e;. For those who go to sea, rather than into space, there's no greater step than rounding the Horn.' From the preface, written by Paul Heiney

This study provides a window into the lives of ordinary South Africans more than ten years after the end of apartheid, with the promises of the democracy movement remaining largely unfulfilled. Catherine Besteman explores the emotional and personal aspects of the transition to black majority rule by homing in on intimate questions of love, family, and community and capturing the complex, sometimes contradictory voices of a wide variety of Capetonians. Her evaluation of the physical and psychic costs to individuals involved in working for social change is grounded in the experiences of the participants and illuminates two overarching dimensions of life in Cape Town: the aggregate forces determined to maintain the apartheid-era status quo, and the grassroots efforts to effect social change.

All over the world, economic inclusion has risen to the top of the development discourse. A well-performing education system is central to achieving inclusive development - but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased, but quality remains low, with weaknesses in governance comprising an important part of the explanation. The Politics and

Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process, combining practical steps to achieve incremental gains to re-orient the system towards learning. Rabbit Warrior is a captivating memoir of a transformative journey of renewal and discovery. Disoriented by intense mourning over the loss of both her mother and sister within a short time span, the author found consolation and reconciliation on a pilgrimage of solace to her beloved Cape Cod home. Emotionally overwhelmed, Janet turned inward for personal healing and wholeness. As she quietly contemplated the meaning of life and death, the Cape's wildlife became a voice for inspiration and revelation. Horseshoe crabs, lobsters, a great blue heron, and rabbits "spoke" to her of life: change and evolution, pain and suffering, death and dying. Supported on her journey by daily journal writing that exposed persons, places and memories stored deep within, she unmasked falsehoods, gave up protective "magical thinking," and examined relationships in an effort to live a more authentic life. Writers and fellow soul-searching travelers helped Janet dispel guilt, expunge destructive messages and peel away emotional layers accumulated over decades. As she traversed her soul, Janet resolved to move ever deeper towards her core, her spiritual center. A summer that began with overwhelming sorrow mixed with angry confusion, ended with transformative feelings of enlightenment, forgiveness, love and rebirth. Janet hopes that both her memoir, as well as her summer reading list, will provide a template for other Rabbit Warriors who might wish to undertake their own liberating journey as well.

A "gorgeous, thoughtful, heartbreaking" historical novel, The Cape Doctor is the story of one man's journey from penniless Irish girl to one of most celebrated and accomplished figures of his time (Lauren Fox, New York Times bestselling author of Send for Me). Beginning in Cork, Ireland, the novel recounts Jonathan Mirandus Perry's journey from daughter to son in order to enter medical school and provide for family, but Perry soon embraced the new-found freedom of living life as a man. From brilliant medical student in Edinburgh and London to eligible bachelor and quick-tempered physician in Cape Town, Dr. Perry thrived. When he befriended the aristocratic Cape Governor, the doctor rose to the pinnacle of society, before the two were publicly accused of a homosexual affair that scandalized the colonies and nearly cost them their lives. E. J. Levy's enthralling novel, inspired by the life of Dr. James Miranda Barry, brings this captivating character vividly alive.

New settlements appeared in the pine wilderness of the mainland and on the uninhabited Atlantic Ocean barrier islands. These changes caused social and political conflicts, and new development assaulted the fragile seashore environment. Fishing and shipbuilding were key industries throughout the early history of Cape May County. In addition, familiar industries such as cranberry harvesting and nearly forgotten endeavors such as goldbeating, sugar refining, and cedar shingle mining played vital roles in the county's economic development. Dorwart also traces the origins of the seashore resort industry through the history of the city of Cape May, with its unique architectural styles and heritage, as well as the founding of Wildwood, Ocean City, and the newer resort towns.
