What do Wal-Mart, Dell, Fidelity Investments, Boeing, and Cabela's have in common? They're all part of a \$50 billion a year scam in which—in the name of "job creation"—corporations play states and cities against each other to win

hefty taxpayer subsidies that routinely exceed \$100,000 per job. But do they provide more jobs, higher wages, or improved living standards in exchange? Greg LeRoy exposes these deals for what they are—no-strings-attached free rides for corporations that rarely create any new jobs. In fact, after securing these packages, many companies lay people off, pay poverty wages, or even relocate to other states. This is the Great American Jobs Scam: a costly bait-and-switch that swindles communities in more ways than one. They lose jobs—or gain jobs so low-paying they do nothing to help the community—and they lose revenue through massive corporate tax breaks. That means fewer resources for maintaining schools, public services, and infrastructure. LeRoy exposes corporations' careful orchestration of this scam, dissects government and corporate mumbo-jumbo with plain talk, and offers commonsense reforms that will give taxpayers powerful new tools to protect our communities.

understanding the science behind the interaction of food, fire, heat, and smoke. This is the definitive guide to the concepts, methods, equipment, and accessories of barbecue and grilling. The founder and editor of the world's most popular BBQ and grilling website, AmazingRibs.com, "Meathead" Goldwyn applies the latest research to backyard cooking and 118 thoroughly tested recipes. He explains why dry brining is better than wet brining; how marinades really work; why rubs shouldn't have salt in them; how heat and temperature differ; the importance of digital thermometers; why searing doesn't seal in juices; how salt penetrates but spices don't; when charcoal beats gas and when gas beats charcoal; how to calibrate and tune a grill or smoker; how to keep fish from sticking; cooking with logs; the strengths and weaknesses of the new pellet cookers; tricks for rotisserie cooking; why cooking whole animals is a bad idea, which grill grates are best; and why beer-can chicken is a waste of good beer and nowhere close to the best way to cook a bird. He shatters the myths that stand in the way of perfection. Busted misconceptions include:

- *Myth: Bring meat to room temperature before cooking. Busted! Cold meat attracts smoke better.*
- *Myth: Soak wood before using it. Busted! Soaking produces smoke that doesn't taste as good as dry fast-burning wood.*
- *Myth: Bone-in steaks taste better. Busted! The calcium walls of bone have no taste and they just slow cooking.*
- *Myth: You should sear first, then cook. Busted! Actually, that overcooks the meat. Cooking at a low temperature first and searing at the end produces evenly cooked*
