

Callan Method Stage 1

Returning to Brooklyn, where his magician-father disappeared years before, twelve-year-old Kingston learns that magic is real and that if he enters the Realm, he might get his father back.

Bullying is now widely recognised as a serious problem that affects many children in schools. It can take many forms, including direct verbal and physical harassment and indirect forms such as deliberate exclusion and the targeting of individuals using cyber technology. Continual and severe bullying can cause both short term and long term damage, making it difficult for victims to form intimate relationships with others and for habitual bullies to avoid following a delinquent lifestyle and becoming perpetrators of domestic violence. Even though this type of abuse affects many of our school children, Ken Rigby believes there are grounds for optimism. This passionate and motivating book shows that there are ways of reducing the likelihood of bullying occurring in a school and effective ways of tackling cases when they do occur. Using up-to-date studies, Bullying in Schools helps us to understand the nature of bullying and why it so often takes place in schools. Importantly, it examines and evaluates what schools can do to promote more positive peer relationships within the school community and take effective and sustainable action to deal with problems that may arise. Teachers, parents, school leaders, policy makers, and health professionals will find it invaluable and empowering.

Including contributions from a team of world-renowned international scholars, this volume is a state-of-the-art survey of second language speech research, showcasing new empirical studies alongside critical reviews of existing influential speech learning models. It presents a revised version of Flege's Speech Learning Model (SLM-r) for the first time, an update on a cornerstone of second language research. Chapters are grouped into five thematic areas: theoretical progress, segmental acquisition, acquiring suprasegmental features, accentedness and acoustic features, and cognitive and psychological variables. Every chapter provides new empirical evidence, offering new insights as well as challenges on aspects of the second language speech acquisition process. Comprehensive in its coverage, this book summarises the state of current research in second language phonology, and aims to shape and inspire future research in the field. It is an essential resource for academic researchers and students of second language acquisition, applied linguistics and phonetics and phonology.

Full of fascinating information about the English language, this book will help to conquer spelling slip-ups and punctuation pitfalls. From getting to grips with grammar to discovering the perfect place to position punctuation - from a simple full stop to the more mysterious apostrophe. Learn how to: . Conquer commas . Make a sentence make sense . Triumph over tenses . Use verbs and adverbs . Simplify speech marks . Make sense of clauses . Get your head around homophones And discover: . Why there are only three ways to finish a sentence and when to use them . How an infinitive can be split, and why you shouldn't

A Creative Writing Manual for Key Stage 2 and Key Stage 3

Darkness Unknown

Research from five Continents

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

An ideal supplemental text, this instructive casebook presents in-depth illustrations of treatment based on the most important couple therapy models. An array of leading clinicians offer a window onto how they work with clients grappling with mild and more serious clinical concerns, including conflicts surrounding intimacy, sex, power, and communication; parenting issues; and mental illness. Featuring couples of varying ages, cultural backgrounds, and sexual orientations, the cases shed light on both what works and what doesn't work when treating intimate partners. Each candid case presentation includes engaging comments and discussion questions from the editor. See also Clinical Handbook of Couple Therapy, Fourth Edition, also edited by Alan S. Gurman, which provides an authoritative overview of theory and practice.

Efficient Query Processing for Scalable Web Search will be a valuable reference for researchers and developers working on This tutorial provides an accessible, yet comprehensive, overview of the state-of-the-art of Neural Information Retrieval.

This second edition of a well-received text, with 20 new chapters, presents a coherent and unified repository of recommender systems' major concepts, theories, methodologies, trends, and challenges. A variety of real-world applications and detailed case studies are included. In addition to wholesale revision of the existing chapters, this edition includes new topics including: decision making and recommender systems, reciprocal recommender systems, recommender systems in social networks, mobile recommender systems, explanations for recommender systems, music recommender systems, cross-domain recommendations, privacy in recommender systems, and semantic-based recommender systems. This multi-disciplinary handbook involves world-wide experts from diverse fields such as artificial intelligence, human-computer interaction, information retrieval, data mining, mathematics, statistics, adaptive user interfaces, decision support systems, psychology, marketing, and consumer behavior. Theoreticians and practitioners from these fields will find this reference to be an invaluable source of ideas, methods and techniques for developing more efficient, cost-effective and accurate recommender systems.

The intimate biography of the celebrated actor Richard Harris, written with his cooperation over ten years by New York Times bestselling author and friend of Harris, Michael Feeney Callan. The book follows Harris' life from humble beginnings in Limerick, Ireland, through the teenage illness that almost killed him to triumph on the London stage and, finally, life in Hollywood. Drawing on lengthy interview sessions with Harris and his friends, co-workers and family, Callan explores the obsessions that forged Harris' success in legendary movies like This Sporting Life, Camelot and the megahit Harry Potter series. Described by The Guardian as 'thorough and entertaining', by Kirkus Reviews as 'meticulous' and by the Mail on Sunday as 'irresistible' this incident-packed account is destined to remain the definitive Life of Richard Harris. "Thorough and entertaining" Guardian "Irresistible" Mail on Sunday "Meticulous" Kirkus Reviews

The first edition of Search Methodologies: Introductory Tutorials in Optimization and Decision Support Techniques was originally put together to offer a basic introduction to the various search and optimization techniques that students might need to use during their research, and this new edition continues this tradition. Search Methodologies has been expanded and brought completely up to date, including new chapters covering scatter search, GRASP, and very large neighborhood search. The chapter authors are drawn from across Computer Science and Operations Research and include some of the world's leading authorities in their field. The book provides useful guidelines for implementing the methods and frameworks described and offers valuable tutorials to students and researchers in the field. "As I embarked on the pleasant journey of reading through the chapters of this book, I became convinced that this is one of the best sources of introductory material on the search methodologies topic to be found. The book's subtitle, "Introductory Tutorials in Optimization and Decision Support Techniques", aptly describes its aim, and the editors and contributors to this volume have achieved this aim with remarkable success. The chapters in this book are exemplary in giving useful guidelines for implementing the methods and frameworks described." Fred Glover, Leeds School of Business, University of Colorado Boulder, USA "[The book] aims to present a series of well written tutorials by the leading experts in their fields. Moreover, it does this by covering practically the whole possible range of topics in the discipline. It enables students and practitioners to study and appreciate the beauty and the power of some of the computational search techniques that are able to effectively navigate through search spaces that are sometimes inconceivably large. I am convinced that this second edition will build on the success of the first edition and that it will prove to be just as popular." Jacek Blazewicz, Institute of Computing Science, Poznan University of Technology and Institute of Bioorganic Chemistry, Polish Academy of Sciences

PLEASE NOTE - this is a replica of the print book and you will need paper and a pencil to complete the exercises. You've learnt the basics of the English language, now improve your confidence with the second practice book in the visual learning series English for Everyone. Practice Book: Level 2 Beginner will help you to feel confident in the skills you learn from the Course Book: Level 2 Beginner or from your other courses or studies. Strengthen your language for topics such as emotions, actions and activities, numbers, dates, months and seasons, and much more. Work your way through the exercises as you cover each Level 2 topic. Activities include filling in the blanks, true or false decision-making, matching the pairs, wordsearches, and more. Audio material is provided at every stage through the English For Everyone website and Android/iOS apps to provide vital experience of spoken English and make even tricky phrases easy to understand. English for Everyone is aligned to the CEFR, the international standard for language learning, and ideal for preparation for major English-language exams including IELTS, TOEIC, and TOEFL. Whether you want to improve your English for work, study, or travel, the Practice Book: Level 2 Beginner will help you to gain confidence in your new English language skills.

Jack Reacher races to solve the perfect crime in the fourth novel in Lee Child's New York Times bestselling series. Across the country, women are being murdered, victims of a disciplined and clever killer who leaves no trace evidence, no fatal wounds, no signs of struggle, and no clues to an apparent motive. They are, truly, perfect crimes. In fact, there's only one thing that links the victims. Each one of the women knew Jack Reacher—and it's got him running blind.

Exercise system designed to help tone and reduce the body, very similar to pilates.

Deep under Arctic waters lies an ice kingdom carved into a glacier. Those who dwell within it possess magnificent biological secrets. Due to the dangers of impending war, the Princess of Adlivun is forced to flee her undersea utopia and regroup with her sisters in Alaska. Captain Trevain Murphy is a successful king crab fisherman who has spent his life building his empire above the sea, and knows nothing of the empire beneath it. When he meets a mysterious woman in a strip club, he extends kindness towards her, unaware of her unique genetics and royal lineage. Trevain's attraction to the enigmatic Aazuria Vellamo will involve him in dangerous designs that will forever change his life, and his perspective on himself and his world. He embarks on a journey of self-discovery where he will

need to release all of his insecurities and inhibitions in order to survive.

Written for senior level or first year graduate level robotics courses, this text includes material from traditional mechanical engineering, control theoretical material and computer science. It includes coverage of rigid-body transformations and forward and inverse positional kinematics.

“Teaching English as World Language” is a book that is deeply rooted in the principle that English teachers or teachers of other languages should reassess their perceptions towards the language they teach. They must be aware that the unintentional recycling of some common terms associated with English teaching, such as “foreign” as in “foreign language” or “secondary” as in “second language” may lead to the isolation of learners from the very language they try to learn. It is this principle that inspires this book to emerge as a new breed among its kinds. Its uniqueness lies in its author’s deep understanding of how languages are learned and acquired. There no doubt, this book should be the right choice for teachers who seek to prepare their students for the whole new world within which they can easily navigate.

The Second Edition of Johnny Saldaña's international bestseller provides an in-depth guide to the multiple approaches available for coding qualitative data. Fully up to date, it includes new chapters, more coding techniques and an additional glossary. Clear, practical and authoritative, the book: -describes how coding initiates qualitative data analysis -demonstrates the writing of analytic memos -discusses available analytic software -suggests how best to use The Coding Manual for Qualitative Researchers for particular studies. In total, 32 coding methods are profiled that can be applied to a range of research genres from grounded theory to phenomenology to narrative inquiry. For each approach, Saldaña discusses the method's origins, a description of the method, practical applications, and a clearly illustrated example with analytic follow-up. A unique and

invaluable reference for students, teachers, and practitioners of qualitative inquiry, this book is essential reading across the social sciences.

Appendices include laws and legislation concerning the Army Medical Department. Maps include those of territories and frontiers and Continental Army hospital locations. Illustrations are chiefly portraits.

During recent years, huge efforts have been made to establish digital libraries, in a variety of media, offered from a variety of sources, and intended for a variety of professional and private user communities. As digital data collections proliferate, problems of resource selection and data fusion become major issues. Traditional search engines, even the best ones, are unable to provide access to the hidden web of information that is only available via digital library search interfaces. Originating from the SIGIR 2003 Workshop on Distributed Information Retrieval, held in Toronto, Canada in August 2003, this book presents extended and revised workshop papers as well as several invited papers on the topic to round off coverage of the core issues. The papers are devoted to recent research on the design and implementation of methods and tools for resource discovery, resource description, resource selection, data fusion, and user interaction.

This volume describes the methods used in the surveillance of drinking water quality in the light of the special problems of small-community supplies, particularly in developing countries, and outlines the strategies necessary to ensure that surveillance is effective.

From the author of the highly successful Magic Locket and The Silver Slippers comes this charmingly illustrated tale of hope, dreams, achievement, courage, and confidence--with a special surprise. Tucked into the front cover is a golden angel charm on a golden chain. Full-color illustrations throughout.

Draws on the actor, director, and producer's personal documents to offer insight into his complex life behind his famous roles, discussing the death of his son, his relationship with Sydney Pollack, and his establishment of the Sundance Film Festival.

(Essential Elements Guitar). Take your guitar teaching to a new level! Hal Leonard's top-selling comprehensive method for band and strings is now also available for guitar. With the time-tested classroom teaching methods of Will Schmid and Bob Morris and popular songs in a variety of styles,

Essential Elements for Guitar is sure to become a staple of guitar teachers' instruction and get beginning guitar students off to a great start. This method has been designed to meet the National Standards for Music Education, with features such as cross-curricular activities, quizzes, multicultural songs, basic improvisation and more. Concepts covered in Book 1 include: getting started; basic music theory; guitar chords; notes on each string; ensemble playing; and much more! Songs used in Book 1 include such hits as: Dust in the Wind * Eleanor Rigby * Every Breath You Take * Hey Jude * Hound Dog * Let It Be * Ode to Joy * Rock Around the Clock * Stand By Me * Surfin' USA * Sweet Home Chicago * This Land Is Your Land * You Really Got Me * and more!

Calland is hot, sexy, funny as hell, and rarely serious. He's also fiercely loyal and protective of his family and friends. But they all despair that he'll ever settle down, that he'll ever meet the one destined to knock him on his ass (in a good way). Yeah, he's never lacking female

companionship, but it's never serious. Yet, he still gets what he wants and he doesn't get turned down. Until he meets her. Dani's a stunning, tattooed, fiery red-head with an attitude that screams hands off. She's a stranger in town, there with her own agenda, a ton of secrets, and a steel

wall shielding her cynical heart. She's untouchable...and Calland really wants to touch. She's finding that Calland is hard to resist, especially when he sets his mind on something. And that something seems to be her. Is Dani the one that just might be able to settle Calland down, if he can

get past her walls? Or will her secrets tear them apart? *Recommended for readers 18+ due to HOT sexual encounters, adult situations, and language. **This is the final book in the Skin Deep Series.

Benny Lewis, who speaks over ten languages—all self-taught—runs the largest language-learning blog in the world, Fluent In 3 Months. Lewis is a full-time "language hacker," someone who devotes all of his time to finding better, faster, and more efficient ways to learn languages. Fluent in 3

Months: How Anyone at Any Age Can Learn to Speak Any Language from Anywhere in the World is a new blueprint for fast language learning. Lewis argues that you don't need a great memory or "the language gene" to learn a language quickly, and debunks a number of long-held beliefs, such as adults not being as good of language learners as children.

Leadership in Early Education in Times of Change

You have been lied to. Werewolves, vampires, ghosts ... they aren't what you think. After the death of her mother, Everly Boderleth has to go back to her spooky hometown, Shroudhaven, and she has a plan to get in and out as quick as possible. Step one, clear out the family home and antique store. Step two, watch her childhood sweetheart die violently at the hands of an indescribable, horrific creature. Wait, what? That wasn't part of the plan. But it was just a dream, wasn't it? As the evidence mounts that what she saw was real, a broken heart is the least of her problems. Everly thinks she's close to the truth, but nothing is as it seems. What is really lurking in the dark? Darkness Unknown is the first book in the Beshadowed series by S.A. Fenech. If you're looking for shifters with a twist, urban fantasy with a touch of horror, and a satisfying mystery, you'll love Beshadowed.

(Guitar Method). The Hal Leonard Guitar Method is designed for anyone just learning to play acoustic or electric guitar. It is based on years of teaching guitar students of all ages, and it also reflects some of the best guitar teaching ideas from around the world. Book 1 includes tuning; playing position; musical symbols; notes in first position; C, G, G7, D, D7, A7, and Em chords; rhythms through eighth notes; strumming and picking; over 80 great songs, riffs, and examples.
