Introduction by Allen W. Wood With translations by F. Max Müller and Thomas K. Abbott The writings of Immanuel Kant became the cornerstone of all subsequent philosophical inquiry. They articulate the relationship between the human mind and all that it encounters and remain the most important influence on our concept of knowledge. As renowned Kant scholar Allen W. Wood writes in his Introduction, Kant “virtually laid the foundation for the way people in the last two centuries have confronted such widely differing subjects as the experience of beauty and the meaning of human history.” Edited and compiled by Dr. Wood, **Basic Writings of Kant** stands as a comprehensive summary of Kant’s contributions to modern thought, and gathers together the most respected translations of Kant’s key moral and political writings.

*In the fifth of the River Cottage Handbook series, John Wright reveals the rich pickings to be had on the seashore - and the team at River Cottage explain how to cook them to perfection. For the forager, the seashore holds surprising culinary potential. In this authoritative, witty book John Wright takes us on a trip to the seaside. But before introducing us to the various species to be harvested, he touches on such practicalities as conservation and the ethics of foraging; safety from tides, rocks and food poisoning; the law and access to the shore, our right to fish, landing sizes and seasons; and equipment such as nets, pots and hooks. Next comes the nitty-gritty: all the main British seashore species that one might be tempted to eat. The conservation status, taste and texture, availability, seasonality, habitat, collecting technique and biology of each species is covered; there are also quite a few gratuitous but fascinating diversions. The species covered include crustacea (brown shrimp, common crab, lobster, prawn, shore crab, spider crab, squat lobster, velvet swimming crab); molluscs (clams, cockle, dog whelk, limpet, mussel, oyster, razor clam, winkle); mushrooms; plants (alexanders, babbington's orache, fennel, frosted orache, marsh samphire, perennial wall rocket, rock samphire, sea beet, sea buckthorn, sea holly, sea kale, sea purslane, sea rocket, spear-leaved orache, wild cabbage, wild thyme); and seaweed (carragheen, dulse, gut weed, laver, pepper dulse, sea lettuce, sugar kelp, kelp). Finally, there are thirty brilliant recipes. Introduced by Hugh Fearnley-Whittingstall, *Edible Seashore* is destined to join the other handbooks in the series as an indispensable household reference.*

The cutlery spoons, knives, and forks of Germany's 3rd Reich communicates its own special history. In A Guide to 3rd Reich Cutlery, its Monograms, Logos, and Maker Marks, author James A. Yannes provides a detailed and heavily illustrated reference book containing extensive and relative

historical exposition on a broad range of personal, organizational, and commemorative cutlery of the 3rd Reich beginning in the early 1920s to its demise in 1945. Augmented with more than 430 photographs, A Guide to 3rd Reich Cutlery, its Monograms, Logos, and Maker Marks details the cutlery that was used by the people and organizations that were the 3rd Reich from the private services of Adolf Hitler, Eva Braun, Herman Goering, and Heinrich Himmler to organizations such as the SS, Red Cross, Hitler Youth, German Railway, the Armed Forces including the Wehrmacht and W-SS as well as commemoratives such as the U-47 submarine. For collectors and World War II history buffs, A Guide to 3rd Reich Cutlery, its Monograms, Logos, and Maker Marks details a unique aspect of history that can be held in the hand.

The scientific part of the Apollo 11 mission was planned and executed with great care. The samples of lunar soil and rocks returned by the astronauts will add much detailed scientific information. The photographs and observations of the crew have already answered some questions man has asked for thousands of years. The emplaced experiments have yielded data unavailable until now. This report is preliminary and covers only the initial scientific results of the Apollo 11 mission. The publication includes a summary of scientific results and chapters about photographic summary of Apollo 11 mission, crew observations, geologic setting of the lunar samples returned by the Apollo 11 mission, Apollo 11 soil mechanics investigation, preliminary examination of lunar samples, passive seismic experiment, laser ranging retroreflector, the solar-wind composition experiment, lunar surface closeup stereoscopic photography, and the modified dust detector in the early Apollo scientific experiments package.

This is the first monograph which examines the rare Buddhist and Hindu Tantric goddess, Chinnamasta, her rituals, her names and forms (namarupa) and their symbolism by comparing and contra-sting her sadhanas (spiritual practices) in Hinduism and Buddh-ism. The entire Hindu Chinnamastatantra section from the Sakta Pramoda, the Buddhist Chinnamunda Vajra-varahisadhana and the Trikayavajrayoginstuti are translated for the first time into English. Since Chinnamasta is a rare goddess, her texts were not popularized or made fashionable according to the dictates of a particular group at a particular time. The earliest extant texts dated from the ninth and tenth centuries a time when Hindu and Buddhist Tantras were developing under common influences in the same place in India. Having such texts about Chinnamasta Chinnamunda from these centuries, one can begin to understand the mutuality of a general Tantric tradition and the exclusivity of a particular Hindu or Buddhist Tantric tradition. Hence the study not only examines Chinnamasta, but also attempts to under-stand what is a Tantric tradition.

The Traffic World and Traffic Bulletin

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

The Apollo 11 Mission, primarily designed to land men on the Moon and return them safely to Earth, signaled a new phase of the manned space program. Based on the success of Apollo 11, the first of a series of missions designed for the systematic exploration of the Moon was successfully accomplished on Apollo 12. The fact that the Apollo 12 astronauts were able to achieve a pinpoint landing at a preselected site, and then spend an extended time on the lunar surface, graphically illustrates the rapid progress of the Apollo program. The Apollo 12 mission added significantly to man's knowledge of the Moon. The precise landing capability allowed the crew to accomplish a wide variety of preplanned tasks and paved the way for planning future missions to smaller, more selected landing areas with the possibility of significant scientific returns. The publication includes chapters on mission description, summary of scientific results, photographic summary of the Apollo 12 Mission, crew observations, passive seismic experiment, lunar surface magnetometer experiment, the solar-wind spectrometer experiment, suprathreshold ion detector experiment (lunar ionosphere detector), cold cathode gage (lunar atmosphere detector), the solar-wind composition experiment, Apollo 12 multispectral photography experiment, preliminary geologic investigation of the Apollo 12 landing site, lunar surface closeup stereoscopic photography, preliminary examination of lunar samples, and preliminary results from Surveyor 3 analysis.
