The camera was unveiled as a high-performing device and brandished with high-quality features. The picturing device is easily Canon's most populous Digital Single-Lens Reflex (DSLR) camera line manufactured in the last few years. Likewise, the most intriguing aspect of it is that it gives a soft landing to those who are previously most exposed to Smartphones and other picturing devices. This leverage means that neophytes do not have to bother themselves with getting abreast with the technicalities of the camera. Canon, with this design, has provided an incredible performance level, which gives users control over the device. Embodied in the Canon EOS Rebel T8i/850D is a 24.1-megapixel Advanced Photo System type-C (APS-C) size sensor which is similar to the kind of sensor found in one of Canon's top designs, the T7i camera. Although, the image quality between both cameras is nearly identical, with the T8i given a little nudge. However, as an advantage, Canon placed in the T8i a DIGIC eight image processor which allows for the filming of Ultra High Definition (UHD) 4k video at 24 frames per second.
