The General Reader and the

In the period between the 1840s and the 1920s the British economy was transformed, from small-scale capitalism dominated by individual traders and partnerships to a complex financial structure dominated by large, joint-stock companies. The tremendous growth of big business created a world of new opportunities for criminal exploitation. The promotion and management of public companies and the

trading of commercial securities proved vulnerable to the white-collar crimes of fraud and embezzlement. Problems of financial fraud were exacerbated by a climate of laissez-faire which championed the most permissive commercial legislation in the world, and white-collar crime wreaked havoc on the modern British economy. This new book examines the spread of white-collar crime from the Victorian period to the early twentieth century and offers a new perspective on modern scandals.

Opening with the powerful and tender "Ode to the Hymen," Olds addresses and embodies, in this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its structures and pleasures. The poems extend parts of her narrative as a daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. The aim of Hiding Making - Showing Creation is twofold. In the first instance, we seek to trace the Nachleben of these studio topoi from the nineteenth century to today, in particular focusing on how artists have employed them as strategies for showing certain aspects of their practice (above all those which perpetuate the notions of artistic genius and autonomy), while carefully hiding others from view (routine, failure, craft). Secondly, in order to achieve these

goals, we have adopted a method that we feel not only does justice to the richness and diversity of the topic but which, we believe, will add a new dimension to the already abundant and ever growing literature on the artist's studio. More than 140 stunning duotone photographs explore the intriguing contradictions between rapid technological change and the traditions of Chinese society, offering an intimate portrait of a people and society balanced between the old and the new. This book concisely expounds the fundamental concepts, phenomena, theories and procedures in a complete and systematic sense. In this book, not only almost all the important achievements from predecessors but also the

Starting from the derivation of fundamental equations, various classical acoustical phenomena such as reflection, refraction, scattering diffraction and absorption in atmosphere, as well as the influences of gravitation and rotation of the earth on the behaviors of different atmospheric waves including acoustic waves, have been discussed in viewpoints of wave acoustics and geometrical acoustics respectively. The recent developments of several computation methods in the field of atmospheric acoustics have been introduced in some detail. As for the application aspects, atmospheric remote sensing has
