*Today's world is full of ups and downs and young people must guard their mental health. Whether it is dealing with the realities of COVID-19, depression, anxiety, anger, grief, guilt, low self-esteem, or the stresses of everyday life, a person's mental health can suffer. There is no better way to guard mental health than through journaling. Unlike the complexity of other journals that prompt writing about something that is irrelevant to a person's life or steers them away from what they are truly feeling or experiencing, this journal is simple and open. It allows for TRUE expression. This journal was composed by the award-winning team at The Therapy Institute. The Therapy Institute boasts nearly two decades of working with children from all walks of life and their tried-and-true methods have been utilized to maintain the mental and physical health of children from around the world.*

Hashing algorithms scramble data and create pseudo-uniform data distributions. Bucket algorithms operate on raw untransformed data which are partitioned into groups according to membership in equal-sized  $d$ -dimensional hyperrectangles, called cells or buckets. The bucket data structure is rather sensitive to the distribution of the data. In these lecture notes, we attempt to explain the connection between the expected time of various bucket algorithms and the distribution of the data. The results are illustrated on standard searching, sorting and selection problems, as well as on a variety of problems in computational geometry and operations research. The notes grew partially from a graduate course on probability theory in computer science. I wish to thank Elizabeth Van Gulick for her help with the manuscript, and David Avis, Hanna A. INTRODUCTION 1 INTRODUCTION It is not a secret that methods based upon the truncation of data have good expected time performance. For example, for nice distributions of the data, searching is often better done via a hashing data structure instead of via a search tree. The speed one observes in practice is due to the fact that the truncation operation is a constant time operation. Chronicles the best and the worst of Apple Computer's remarkable story.

days of its 19th century origins to the game as it is today. Using NHL action photographs, illustrations, stories, and trivia, the book is a journey through time both for hockey fans and those new to the game. Kids will learn how basic equipment has changed from a ball to a puck and how the evolution of game strategy has transformed the sport, players, and equipment. Players throughout history are stacked up against each other in every position so fans can dream up the perfect fantasy team with Wayne Gretzky playing alongside Patrick Roy and Stan Mikita. A fun-filled section of the book explores everything fan culture-from the best ice rinks, to the iconic hockey sweater and the hockey haircut along with key aspects of the toughest sport around.

When a bad day at work culminates in losing out on a promotion, Jim Sanders shifts into his animal form to let off steam. Then his bad day turns into a bad night-while prowling his Atlantic City neighborhood as a large gray house cat, he's caught in a torrential downpour. What little luck he has washes down the gutter when his new boss, Andrew Wright, catches him taking shelter on his porch, brings him inside, and starts calling him Mr. Frosty. As a feline, Jim becomes the inadvertent confessor for his boss's lonely son, Tony, a victim of schoolyard bullying. As a human, he feels drawn to Andrew, a man he wanted to resent. Finding love was never part of Jim's plan for the future-not with his bizarre secret-yet suddenly he finds himself navigating that minefield anyway. But not everything is easy, especially for an interracial gay couple dealing with prejudice in the workplace, at Tony's school, and even within their own families. *Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Lately, Anviksha Punjabi can't seem to get anything right. She is in the middle of ending her second marriage, is barely keeping any friends, and repeatedly getting into trouble at work. And as if all that weren't enough, she must put up with her gregarious and over-bearing 67-year-old mother as a housemate. Afraid that if this goes on, she'll finally unravel completely, Anviksha decides that she needs a break - a Bollywood style, solo-trip across Europe kind of break. What she doesn't expect is that her mother, Smita Punjabi, will insist on coming along. The unlikely duo embarks on a journey complete with nudists, an unwelcome blast from the past, a British dog named Bhindi, and several eligible bachelors, and slowly, what was supposed to be a soul-searching journey for one, turns into a life-altering experience for two.
