Finalist in the Australian Career Book Award 2020, supported by the Royal Society of Arts Oceania Finding and following an authentic calling challenges us to bridge both the intuitive, soulful and the hard-edged, material dimensions of everyday life. From Career to Calling: A Depth Psychology Guide to Soul-Making Work in Darkening Times opens new avenues for vocational exploration and career inquiry in an imaginative way. This unique book draws on insights from the field of Jungian and archetypal psychology to reimagine our attitudes and approaches to work, money, vocational guidance and career development. As people find themselves disillusioned with or disenfranchised from capitalist notions of work and career, Suzanne Cremer's interdisciplinary approach illuminates how a creative, meaningful and influential work-life can emerge from attending to the archetypal basis of experience. Interweaving elements of her own journey, Cremer connects individual experience with the collective in an original way, spotlighting depression in the legal profession, marginalization of the feminine principle in work environments, and how understanding the roots of our cultural complexes can spark personal callings which facilitate collective transformation. Blending compelling real-life stories with robust scholarly analysis and reflective activities, this book will help practitioners to support individuals to develop a sense of their soul's calling and offer guidance on creating an authentic vocational life within the constraints of the contemporary era. Additionally, it will be invaluable to those in career transition, re-discovering their purpose at the end of a career, or commencing work-life.

In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-geniuses everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. She has learned early on the value of grit and teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In Grit, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better." (The New York Times Book Review). Among Grit's most valuable insights: any effort you make ultimately counts toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, Grit is a book about what goes through your head when you fall down, and how that—no talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal).

For instance, substantial revision to the internship, licensure, and certification processes has occurred, and are reflected in this resource. Much of the literature on clinical psychology, cultural sensitivity, and the current job market is updated. Changes in technology have large effects on teaching and practicing clinical psychology. These modifications are needed to offer appropriate and updated information for students. In short, virtually every chapter has substantial modification to ensure that the material is accurate and up to date.

As Career Paths in Psychology shows, the range of work that psychologists find themselves doing goes far beyond the traditional laboratory researcher or the individual therapist. Psychologists work in all areas of education, in government, with private companies, and in communities. Community psychology is a diverse field. Community psychologists may work for the government, for nonprofit foundations, as researchers or teachers in academic settings, at NGOs, as independent consultants, overseas in international development, and more. Despite such professional diversity, very little information has formally been made available to students and practitioners about the range of careers they can pursue when studying community psychology. Diverse Careers in Community Psychology details a range of potential career paths for someone with community psychology or related social science training, describes the different types of careers (e.g., tasks involved, benefits and challenges, salary range, etc.), and outlines steps one can take to develop such a career. The volume is built on three foundations: (1) a career survey of almost 450 respondents, which provides quantitative information about the different types of settings in which individuals with community psychology training might find themselves; (2) more than twenty chapters by contributors who share their personal stories and guidance on how to select, prepare for, find, and succeed in careers similar to theirs; (3) and interviews with community psychologists, further illustrating examples discussed in the authored chapters. This volume provides both a depth and breadth of information about the possible careers available for someone with community psychology or related training.
